#### 1. Organization and Summary of Significant Accounting Policies

#### Description of Business

MaxLinear, Inc. was incorporated in Delaware in September 2003. MaxLinear, Inc., together with its wholly owned subsidiaries, collectively referred to as MaxLinear, or the Company, is a provider of communications systems-on-chip (SoC) solutions used in broadband, mobile and wireline infrastructure, data center, and industrial and multi-market applications. MaxLinear is a fabless integrated circuit design company whose products integrate all or substantial portions of a high-speed communication system, including radio frequency (RF), high-performance analog, mixed-signal, digital signal processing, security engines, data compression and networking layers, and power management. MaxLinear's customers include electronics distributors, module makers, original equipment manufacturers, or OEMs, and original design manufacturers, or ODMs, who incorporate the Company's products in a wide range of electronic devices, including cable Data Over Cable Service Interface Specifications (DOCSIS), fiber and DSL broadband modems and gateways; Wi-Fi and wireline routers for home networking; radio transceivers and modems for 4G/SG base-station and backhaul infrastructure; fiber-optic modules for data center, metro, and long-haul transport networks; as well as power management and interface products used in these and many other markets.

#### Basis of Presentation and Principles of Consolidation

The accompanying unaudited consolidated financial statements include the accounts of MaxLinear, Inc. and its wholly owned subsidiaries and have been prepared in accordance with accounting principles generally accepted in the United States of America, or GAAP, for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and disclosures required by GAAP for complete financial statements. All intercompany transactions and investments have been eliminated in consolidation.

In the opinion of management, the Company's unaudited consolidated interim financial statements contain adjustments, including normal recurring accruals necessary to present fairly the Company's consolidated financial position, results of operations, comprehensive income (loss), stockholders' equity, and cash flows.

The consolidated balance sheet as of December 31, 2021 was derived from the Company's audited consolidated financial statements at that date. The accompanying unaudited consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements and related notes thereto for the year ended December 31, 2021 included in the Company's Annual Report on Form 10-K filed by the Company with the Securities and Exchange Commission, or the SEC, on February 2, 2022, or the Annual Report. Interim results for the six months ended June 30, 2022 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2022.

The functional currency of certain foreign subsidiaries is the local currency. Accordingly, assets and liabilities of these foreign subsidiaries are translated at the current exchange rate at the balance sheet date and historical rates for equity. Revenue and expense components are translated at weighted average exchange rates in effect during the period. Gains and losses resulting from foreign currency translation are included as a component of stockholders' equity. Foreign currency translation gains and losses are included in the results of operations, and to date, have not been material.

#### Use of Estimates and Significant Risks and Uncertainties

The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the unaudited consolidated financial statements and accompanying notes of the consolidated financial statements. Actual results could differ from those estimates.

During the COVID-19 global pandemic, which is still ongoing, various restrictions were put in place causing a temporary decline in demand for certain items such as automobiles. As restrictions began easing across the world, a sudden increase in demand for electronics containing semiconductor chips and stockpiling of chips by certain firms in China blacklisted by the U.S. has exacerbated bottlenecks in the supply chain, resulting in a global semiconductor supply shortage impacting the Company's industry. Some chip manufacturers are estimating this supply shortage may continuing to work closely with its suppliers and customers to minimize the potential adverse impacts of the supply shortage, such shortage may have a near-term impact on the Company's ability to meet increased demand on certain products and have a negative impact on its operating results which may continue into 2023. Global supply shortages, and uncertainty in customer demand and the worldwide economy in general has continued as a result of the COVID-19 pandemic, and may be further exacerbated by the impacts of high inflation, and the

Company may experience increased volatility in its sales and revenues in the near future. However, the magnitude of such volatility on the Company's business and its duration is uncertain and cannot be reasonably estimated at this

The Company also believes that its \$212.4 million of cash and cash equivalents at June 30, 2022 will be sufficient to fund its projected operating requirements for at least the next twelve months. A material adverse impact from the global semiconductor supply shortage could result in a need to raise additional capital or incur additional indebtedness to fund strategic initiatives or operating activities, particularly as the Company pursues additional acquisitions (Note 3). The Company's future capital requirements will depend on many factors, including changes in revenue, the expansion of engineering, sales and marketing activities, the timing and extent of expansion into new territories, the timing of introductions of new products and enhancements to existing products, the continuing market acceptance of the Company's products and potential material investments in, or acquisitions of, complementary businesses, services or technologies. Additional funds may not be available on terms favorable to the Company or at all. If the Company is unable to raise additional funds when needed, it may not be able to sustain its operations or execute its strategic

The Company is not aware of any specific event or circumstance that would require an update to its estimates or adjustments to the carrying value of its assets and liabilities as of July 27, 2022, the issuance date of this Quarterly Report on Form 10-Q. Actual results could differ from those estimates, particularly if the Company experiences material impacts from the global supply shortage.

#### Summary of Significant Accounting Policies

Refer to the Company's Annual Report for a summary of significant accounting policies. There have been no other significant changes to the Company's significant accounting policies during the six months ended June 30, 2022.

#### Recently Issued Accounting Pronouncements

In October 2021, the FASB issued ASU No. 2021-08, Business Combinations (Topic 805): Accounting for Contract Assets and Contract Liabilities from Contracts with Customers to provide specific guidance to eliminate diversity in practice on how to recognize and measure acquired contract assets and contract liabilities from revenue contracts from customers in a business combination consistent with revenue contracts with customers not acquired in an acquisition. The amendments in this update provide that the acquirer should consider the terms of the acquired contracts, such as timing of payment, identify each performance obligation in the contracts, and allocate the total transaction price to each identified performance obligation on a relative standalone selling price basis as of contract inception (that is, the date the acquiree entered into the contracts) or contract modification to determine what should be recorded at the acquisition date. These amendments are effective for the Company beginning with fiscal year 2023. The impact of the adoption of the amendments in this update will depend on the magnitude of any customer contracts assumed in a business combination in 2023 and beyond.

#### 2. Net Income (Loss) Per Share

Basic earnings per share, or EPS, is calculated by dividing net income (loss) by the weighted-average number of common shares outstanding for the period, without consideration for common stock equivalents. Diluted EPS is computed by dividing net income (loss) by the weighted-average number of common shares outstanding for the period and the weighted-average number of dilutive common stock equivalents outstanding for the period determined using the treasury-stock method. For purposes of this calculation, common stock options, restricted stock units and restricted stock awards are considered to be common stock equivalents and are only included in the calculation of diluted EPS when their effect is dilutive. In periods in which the Company has a net loss, dilutive common stock equivalents are excluded from the calculation of diluted EPS.

The table below presents the computation of basic and diluted EPS:

Three Months Ended June 30,					Six Months Ended June 30			
2022 2021				2021				
			(in thousands, ex	cept per share an	iounts)		<u></u>	
\$	31,966	\$	733	\$	65,552	\$	4,535	
	77,858		75,930		77,527		75,394	
	2,421		3,096		2,935		3,263	
	80,279		79,026		80,462		78,657	
\$	0.41	\$	0.01	\$	0.85	\$	0.06	
\$	0.40	\$	0.01	\$	0.81	\$	0.06	
	\$	\$ 31,966 77,858 2,421 80,279 \$ 0.41	\$ 31,966 \$ 77,858 2,421 80,279 \$ 0.41 \$	2022 2021 (in thousands, ex  \$ 31,966 \$ 733   77,858 75,930  2,421 3,096  80,279 79,026  \$ 0.41 \$ 0.01	2022   2021   (in thousands, except per share an   S   31,966   S   733   S	2022   2021   2022   (in thousands, except per share amounts)	2022   2021   2022   (in thousands, except per share amounts)	

For the three months ended June 30, 2022 and 2021, the Company excluded common stock equivalents for outstanding stock-based awards, which represented potentially dilutive securities of 1.0 million and 0.04 million, respectively, from the calculation of diluted net income per share due to their anti-dilutive nature.

For the six months ended June 30, 2022 and 2021, the Company excluded common stock equivalents for outstanding stock-based awards, which represented potentially dilutive securities of 1.0 million and 0.1 million, respectively, from the calculation of diluted net income per share due to their anti-dilutive nature.

#### 3. Business Combinations

#### Silicon Motion Merger

On May 5, 2022, MaxLinear entered into an agreement and plan of merger, or the Merger Agreement, with Silicon Motion Technology Corporation, or Silicon Motion, an exempted company with limited liability incorporated under the Law of the Cayman Islands, pursuant to which, subject to the terms and conditions thereof, MaxLinear agreed to acquire Silicon Motion pursuant to a statutory merger of Shark Merger Sub, a wholly-owned subsidiary of MaxLinear, with and into Silicon Motion, with Silicon Motion surviving the merger as a wholly-owned subsidiary of MaxLinear. Silicon Motion is a provider of NAND flash controllers for solid state drives, or SSDs, and other solid state drives, or SSDs, and other solid state drives.

Under the terms of the Merger Agreement, the transaction consideration will consist of \$93.54 in cash and 0.388 shares of MaxLinear stock for each Silicon Motion American Depositary Share, or ADS, and \$23.385 in cash and 0.097 shares of MaxLinear common stock for each Silicon Motion ordinary share not represented by an ADS. Upon closing of the transaction, the current MaxLinear stockholders will own approximatel \$6% of the combined company and former Silicon Motion securityholders will own approximately and the closing price of MaxLinear shares on May 4, 2022, the implied value of the total transaction consideration for Silicon Motion is approximately \$4.3 billion. MaxLinear may fund up to \$3.5 billion of cash consideration with cash on hand and fully committed debt financing from Wells Fargo Bank, N.A., or Wells Fargo Bank, and other lenders as described below. MaxLinear will also assume Silicon Motion's vested and unvested employee stock-based compensation awards.

The merger is not subject to any financing conditions but is pending satisfaction of customary closing conditions, including Silicon Motion shareholders' approval and regulatory approval in the People's Republic of China, or China. On June 27, 2022, the Hart-Scott-Rodino Antitrust Improvements Act of 1976, or HSR, waiting period expired with respect to the pending merger. On July 13, 2022, the registration statement on Form S-4 was declared effective by the SEC.

On June 17, 2022, MaxLinear entered into an amended and restated commitment letter with Wells Fargo Bank and other lenders pursuant to which, subject to the terms and conditions set forth therein, the lenders have committed to provide (i) a senior secured term B loan facility in an aggregate principal amount of up to \$2.7375 billion (ii) a senior secured term A loan facility in an aggregate principal amount of up to \$2.50.0 million, which we collectively refer to as the Senior Secured Credit Facilities. The funding of the Senior Secured Credit Facilities is contingent on the satisfaction of customary conditions, including (i) the execution and delivery of definitive documentation with respect to credit facilities in accordance with the terms in the amended and restated commitment letter, and (ii) the consummation of the acquisition by MaxLinear of Silicon Motion in accordance with the Merger Agreement. A portion of the proceeds from the Senior Secured Credit Facilities will be used to repay existing debt (Note 8) in full.

#### Acquisition of Company X

On December 8, 2021, the Company completed its acquisition of a business, or Company X, pursuant to a Purchase and Sale Agreement, or the Purchase Agreement. The initial closing transaction consideration consisted of \$5.0 million in cash. In addition, their stockholders may receive up to an additional \$3.0 million in potential contingent consideration, subject to the acquired business satisfying certain financial and personnel objectives by March 31, 2023.

Company X is headquartered in Chennai, India and operates as a Wi-Fi solutions and service provider.

#### Acquisition Consideration

The following table summarizes the fair value of purchase price consideration to acquire Company X (in thousands):

Description	Amount
Fair value of purchase consideration:	
Cash	\$ 5,000
Contingent consideration <sup>(1)</sup>	2,700
Total purchase price	\$ 7,700

<sup>(1)</sup> The fair value of contingent consideration is based on applying the Monte Carlo simulation method to forecast achievement under various contingent consideration events which may result in up to \$.0 million in payments subject to the acquired business's satisfying certain financial and personnel objectives by March 31, 2023 under the Purchase Agreement. Key inputs in the valuation include forecasted revenue, revenue volatility and discount rate. Underlying forecast mathematics were based on Geometric Brownian Motion in a risk-neutral framework and discounted back to the applicable period in which the accumulative thresholds were achieved at discount rates commensurate with the risk and expected payout term of the contingent consideration.

#### Purchase Price Allocation

An allocation of purchase price as of the December 8, 2021 acquisition closing date based upon an estimate of the fair value of the assets acquired and the liabilities assumed by the Company in the acquisition primarily includes \$4.4 million in identifiable intangible assets and \$0.6 million in net operating liabilities, with \$3.9 million in goodwill.

The following is a summary of identifiable intangible assets acquired and the related expected lives for the finite-lived intangible assets (in thousands):

Category	Estimated Life in Years	 Fair Value		
Finite-lived intangible assets:				
Licensed technology	3	\$ 4,400		
Total identifiable intangible assets acquired		\$ 4,400		

#### Assumptions in the Allocations of Purchase Price

Management prepared the purchase price allocations for Company X and in doing so considered or relied in part upon reports of a third party valuation expert to calculate the fair value of certain acquired assets, which primarily included

identifiable intangible assets and contingent consideration. Certain stockholders that are employees of Company X were not required to remain employed in order to receive the contingent consideration; accordingly, the fair value of the contingent consideration was accounted for as a portion of the purchase consideration.

Estimates of fair value require management to make significant estimates and assumptions. The goodwill recognized is attributable primarily to the acquired workforce, expected synergies, and other benefits that MaxLinear believes will result from integrating the operations of Company X with the operations of MaxLinear. Certain liabilities included in the purchase price allocations are based on management's best estimates of the amounts to be paid or settled and based on information available at the time the purchase price allocation were prepared. There were minor adjustments to various assests and liabilities that resulted in a change in the purchase price allocation reflected as of June 30, 2022 compared to the preliminary purchase price allocation as of December 31, 2021 for Company X. These adjustments resulted in a decrease of \$0.07 million in net operating assets and corresponding increase in goodwill.

The fair value of the identified intangible assets acquired from Company X was estimated using an income approach. Under the income approach, an intangible asset's fair value is equal to the present value of future economic benefits to be derived from ownership of the asset. Indications of value are developed by discounting future net cash flows to their present value at market-based rates of return. More specifically, the fair value of the licensed technology was determined using the multi-period excess earnings method, or MPEEM is an income approach to fair value measurement attributable to a specific intangible asset being valued from the asset grouping's overall cash-flow stream. MPEEM isolates the expected future discounted cash-flow stream to its net present value. Future cash flows were estimated based on forecasted revenue and costs, taking into account expected future contracts and remaining contract terms. The licensed technology began amortization immediately upon the closing of the transaction.

In connection with the acquisition of Company X, the Company assumed certain operating liabilities. The liabilities assumed in these acquisitions are included in the respective purchase price allocations above.

Goodwill recorded in connection with Company X was \$3.9 million as of June 30, 2022. The Company does not expect to deduct any of the acquired goodwill for tax purposes.

#### 4. Restructuring Activity

From time to time, the Company approves and implements restructuring plans as a result of internal resource alignment and cost saving measures. Such restructuring plans include terminating employees, vacating certain leased facilities, and cancellation of contracts.

The following table presents the activity related to the restructuring plans, which is included in restructuring charges in the consolidated statements of income:

		Three Months Ended June 30,				Six Months Ended June 30,			
	2	022		2021		2022		2021	
				(in the	ousands)				
Employee separation expenses	\$	_	\$	20	\$	_	\$	1,273	
Lease related charges		462		_		462		608	
Other		_		18		_		323	
	\$	462	\$	38	\$	462	\$	2,204	

Lease related charges for the six months ended June 30, 2022 included the impairment of leased right-of-use assets of approximately 9.5 million related to exiting a redundant facility.

Lease related charges for the six months ended June 30, 2021 included the impairment of leased right-of-use assets and leasehold improvements of approximately 8.4 million and \$0.2 million, respectively, related to exiting a redundant facility.

The following table presents a roll-forward of the Company's restructuring liability for the six months ended June 30, 2022. The restructuring liability is included in accrued expenses and other current liabilities and other long-term liabilities in the consolidated balance sheets.

	Employee S Expenses		Lease R	elated Charges	Oth	er	Total
				(in thous	sands)		
Liability as of December 31, 2021	\$	_	\$	444	\$	_	\$ 444
Restructuring charges		_		462		_	462
Cash payments		_		(170)		_	(170)
Non-cash charges and adjustments		_		(462)		_	(462)
Liability as of June 30, 2022				274			274
Less: current portion as of June 30, 2022		_		(256)		_	(256)
Long-term portion as of June 30, 2022	\$		\$	18	\$		\$ 18

#### 5. Goodwill and Intangible Assets

#### Goodwill

Goodwill arises from the acquisition method of accounting for business combinations and represents the excess of the purchase price over the fair value of the net assets and other identifiable intangible assets acquired. The fair values of net tangible assets and intangible assets acquired are based upon preliminary valuations and the Company's estimates and assumptions are subject to change within the measurement period (potentially up to one year from the acquisition date).

During the six months ended June 30, 2022, there was an increase in the carrying value of goodwill of \$0.07 million related to minor adjustments to assets and liabilities in the purchase price allocation for Company X.

The Company performs an annual goodwill impairment assessment on October 31st each year, using a quantitative assessment comparing the fair value of each reporting unit, which the Company has determined to be the entity itself, with its carrying amount, including goodwill. If the carrying amount of a reporting unit exceeds its fair value, an impairment loss is recorded.

In addition to its annual review, the Company performs a test of impairment when indicators of impairment are present. During the three and six months ended June 30, 2022 and 2021, there wereno indications of impairment of the Company's goodwill balances.

#### Acquired Intangibles

Finite-lived Intangible Assets

The following table sets forth the Company's finite-lived intangible assets resulting from business acquisitions and other purchases, which are amortized over their estimated useful lives:

				Ju	me 30, 2022				Dece	mber 31, 2021	
	Weighted Average Useful Life (in Years)	Gro:	ss Carrying ount		ccumulated tization	et Carrying lount		oss Carrying alue		ccumulated tization	t Carrying
	•					(in t	housands)				
Licensed technology	6.3	\$	22,054	\$	(3,034)	\$ 19,020	\$	16,850	\$	(2,218)	\$ 14,632
Developed technology	7.0		311,261		(209,876)	101,385		308,661		(189,244)	119,417
Trademarks and trade names	6.2		14,800		(12,381)	2,419		14,800		(11,221)	3,579
Customer relationships	5.0		128,800		(124,037)	4,763		128,800		(116,847)	11,953
Backlog	2.4		1,300		(959)	341		1,300		(941)	359
	6.2	\$	478,215	\$	(350,287)	\$ 127,928	\$	470,411	\$	(320,471)	\$ 149,940

The following table sets forth amortization expense associated with finite-lived intangible assets, which is included in the consolidated statements of income as follows:

	Three Months	s Ended June 30	,	Six Months	Ended June 30,	
	2022		2021	2022		2021
	(in th	ousands)		(in	housands)	
Cost of net revenue	\$ 9,865	\$	10,762	\$ 20,712	\$	21,527
Research and development	1		1	2		2
Selling, general and administrative	2,926		5,815	9,102		11,885
	\$ 12,792	\$	16,578	\$ 29,816	\$	33,414

Amortization of finite-lived intangible assets in cost of net revenue in the consolidated statements of income results primarily from acquired developed technology.

The following table sets forth the activity related to finite-lived intangible assets:

		2022		2021
		(in the	ousands)	
Beginning balance	\$	149,940	\$	200,066
Additions		5,204		1,112
Transfers to developed technology from IPR&D		2,600		_
Amortization		(29,816)		(33,414)
Ending balance	\$	127,928	\$	167,764

Six Months Ended June 30

The Company regularly reviews the carrying amount of its long-lived assets subject to depreciation and amortization, as well as the related useful lives, to determine whether indicators of impairment may exist that warrant adjustments to carrying values or estimated useful lives. An impairment loss is recognized when the sum of the expected future undiscounted net cash flows is less than the carrying amount of the asset. Should impairment exist, the impairment loss is measured based on the excess of the carrying amount of the asset over the asset's fair value. During each of the three and six months ended June 30, 2022 and 2021, no impairment losses related to finite-lived intangible assets were recognized.

The following table presents future amortization of the Company's finite-lived intangible assets at June 30, 2022:

		Amount
	·	(in thousands)
2022 (6 months)	\$	21,956
2023		40,315
2024		25,107
2025		13,772
2026		12,661
Thereafter		14,117
Total	\$	127,928

Indefinite-lived Intangible Assets

Indefinite-lived intangible assets consist entirely of acquired in-process research and development technology, or IPR&D. The following table sets forth the Company's activities related to indefinite-lived intangible assets:

	DIA MONTH	, Ended buile 50,	
	2022		2021
	(in t	housands)	
Beginning balance	\$ 2,600	\$	2,600
Transfers to developed technology from IPR&D	(2,600)		_
Ending balance	\$ 	\$	2,600

The Company performs its annual assessment of indefinite-lived intangible assets on October 31 each year or more frequently if events or changes in circumstances indicate that the asset might be impaired utilizing a qualitative test as a precursor to the quantitative test comparing the fair value of the assets with their carrying amount. Based on the qualitative test, if it is more likely than not that indicators of impairment exists, the Company proceeds to perform a quantitative analysis. During the three and six months ended June 30, 2022 and 2021, no indicators of impairment were identified and, as a result, no IPR&D impairment losses were recorded.

#### 6. Financial Instruments

The composition of financial instruments is as follows:

			June 30, 2022			
	-		Net Unrealized			
	Cos	st	Gains	Losses	Fair Valu	ie
			(in thousands)			
Assets						
Marketable equity investments	\$	20,005 \$	3,859 \$	_	\$	23,864
				Ju	ne 30, 2022	
				F	air Value	
				(in	thousands)	
Liabilities						
Contingent consideration (Note 3)				\$		2,824
					iber 31, 2021	
					ir Value	
				(in t	thousands)	
Liabilities						
Contingent consideration (Note 3)						2,700

At June 30, 2022, the Company held marketable equity investments with an aggregate fair value of \$3.9 million that were in an unrealized gain position for less than 12 months. The net unrealized gain of \$.9 million as of June 30, 2022 represents stock price fluctuations in the underlying securities held, and was recorded to other income (expense), net in the consolidated statement of income.

The Company evaluates securities for other-than-temporary impairment on a quarterly basis. Impairment is evaluated considering numerous factors, and their relative significance varies depending on the situation. Factors considered include the length of time and extent to which fair value has been less than the cost basis, the financial condition and near-term prospects of the issuer; including changes in the financial condition of any underlying collateral of the security; any downgrades of the security by analysts or rating agencies; nonpayment of any scheduled interest, or the reduction or elimination of dividends; as well as our intent and ability to hold the security in order to allow for an anticipated recovery in fair value.

The fair values of the Company's financial instrument is the amount that would be received in an asset sale or paid to transfer a liability in an orderly transaction between unaffiliated market participants and is recorded using a hierarchical disclosure framework based upon the level of subjectivity of the inputs used in measuring assets and liabilities. The levels are described below:

- Level 1: Quoted prices (unadjusted) in active markets that are accessible at the measurement date for assets or liabilities
- Level 2: Observable prices that are based on inputs not quoted on active markets, but corroborated by market data.
- Level 3: Unobservable inputs are used when little or no market data is available.

The Company classifies its financial instruments within Level 1 or Level 2 of the fair value hierarchy on the basis of valuations using quoted market prices or alternate pricing sources and models utilizing market observable inputs, respectively The marketable equity investment held by the Company has been valued on the basis of quoted market prices and is therefore classified as Level 1. The contingent consideration liability is associated with the Company's acquisition of Company S. (Note 3) and is classified as a Level 3 financial instrument that is subject to the acquired business's satisfaction of certain financial and personnel objectives by March 31, 2023, under the Purchase Agreement. The fair value of the contingent consideration is based on (1) applying the Monte Carlo simulation method, with underlying forecast mathematics based on Geometric Brownian motion in a risk-neutral framework, to forecast achievement of the acquired business' financial objectives under various possible contingent consideration events and (2) a probability based methodology using management's inputs and assumptions to forecast achievement of the acquired business' personnel objectives which combined may result in up to \$3.0 million in total payments to the acquired business. Key inputs in the valuation include forecasted revenue, revenue volatility, discount rate and discount term as it relates to the financial objectives and probability of achievement, discount rate as it relates to the personnel objectives.

			Fair Value Measurements at June 30, 2022			
	Balance :	nt June 30, 2022	Quoted Price in Active Markets for Identical Asso (Level 1)	•	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
				(in thousands)		
Assets						
Marketable equity securities	\$	23,864	\$	23,864 \$	— \$	_
Liabilities						
Contingent consideration	\$	2,824	\$	— \$	— \$	2,824
				Fair Value Mea	asurements at December 31, 2021	
	Balance at D	ecember 31, 2021	Quoted Price in Active Markets for Identical Asse (Level 1)		Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
				(in thousands)		
Liabilities						
Contingent consideration	\$	2,700 \$		— \$	<b>— \$</b>	2,700

The following summarizes the activity in Level 3 financial instruments:

		Six Months Er	nded June 30,	
	2022		2021	
Contingent Consideration				
Beginning balance	\$	2,700	\$	_
Accretion of discount (1)		124		_
Ending balance	\$	2,824	\$	_

<sup>(1)</sup> Changes to the balance associated with the estimated fair value of contingent consideration for the six months ended June 30, 2022 were primarily due to accretion of the related discount.

For the six months ended June 30, 2022, there were no transfers between Level 1, Level 2, or Level 3 financial instruments.

#### Financial Instruments Not Recorded at Fair Value on a Recurring Basis

Some of the Company's financial instruments are recorded at amounts that approximate fair value due to their liquid or short-term nature or by election on investments in privately-held entities as described below. Such financial assets and financial liabilities include: cash and cash equivalents, restricted cash, net receivables, investments in privately-held entities, certain other assets, accounts payable, accrued price protection liability, accrued expenses, accrued compensation costs, and other current liabilities.

The Company's long-term debt is not recorded at fair value on a recurring basis, but is measured at fair value for disclosure purposes (Note 8).

Included in other long-term assets are investments in privately held entities of \$13.3 million and \$5.0 million as of June 30, 2022 and December 31, 2021, respectively. The Company does not have the ability to exercise significant influence or control over such entity and has accounted for the investments as financial instruments. Given that fair values for such investments are not readily determinable, the Company is electing to measure these investments at cost, less any impairment, and adjust the carrying value to fair value if any observable price changes for similar investments in the same entity are identified.

#### 7. Balance Sheet Details

Cash, cash equivalents and restricted cash consist of the following:

	June 30, 2022			December 31, 2021
		(in t	housands)	•
Cash and cash equivalents	\$	211,363	\$	130,572
Short-term restricted cash		162		105
Long-term restricted cash		894		1,061
Total cash, cash equivalents and restricted cash	\$	212,419	\$	131,738

As of June 30, 2022 and December 31, 2021, cash and cash equivalents included money market funds of approximately \$9.4 million and \$20.4 million, respectively. As of June 30, 2022 and December 31, 2021, the Company had restricted cash of approximately \$1.1 million and \$1.2 million, respectively. The cash is restricted in connection with guarantees for certain import duties and office leases.

Inventory consists of the following:

	Jı	ine 30, 2022		December 31, 2021
	(in thousands)			
Work-in-process	\$	86,750	\$	72,369
Finished goods		59,681		59,334
	\$	146,431	\$	131,703

Property and equipment, net consists of the following:

Property and equipment, net consists of the following:					
	Useful Life (in Years)	Jun	ne 30, 2022		December 31, 2021
			(in the	ousands)	_
Furniture and fixtures	5	\$	3,960	\$	3,917
Machinery and equipment	3-5		70,352		65,004
Masks and production equipment	2-5		35,322		32,099

The following table summarizes the change in balances of accumulated other comprehensive income (loss) by component:

		Cumulative Translation Adjustments						Total
		(in thousands)						
Balance at December 31, 2021	\$	21	\$	2,104	\$	2,125		
Other comprehensive loss before reclassifications, net of tax		(5,063)		_		(5,063)		
Balance at June 30, 2022	\$	(5,042)	\$	2,104	\$	(2,938)		

#### 8. Debt

#### Debt

The carrying amount of the Company's long-term debt consists of the following:

		June 30, 022		December 31, 2021
Principal balance:				
Initial term loan under June 23, 2021 credit agreement	\$	250,000	\$	310,000
Total principal balance		250,000		310,000
Less:				
Unamortized debt discount		(756)		(816)
Unamortized debt issuance costs		(2,794)		(3,031)
Net carrying amount of long-term debt		246,450		306,153
Less: current portion of long-term debt		_		_
Long-term debt, non-current portion	\$	246,450	\$	306,153

As of June 30, 2022 and December 31, 2021, the weighted average effective interest rate on debt was approximately3.0% and 3.2%, respectively.

During the three months ended June 30, 2022 and 2021, the Company recognized total amortization of debt discount and debt issuance costs of \$0.2 million and \$0.5 million, respectively, to interest expense.

During the six months ended June 30, 2022 and 2021, the Company recognized total amortization of debt discount and debt issuance costs of \$3.3 million and \$1.0 million, respectively, to interest expense.

The approximate aggregate fair value of the term loans outstanding as of June 30, 2022 and December 31, 2021was \$275.0 million and \$311.0 million, respectively, which was estimated on the basis of inputs that are observable in the market and which is considered a Level 2 measurement method in the fair value hierarchy.

As of June 30, 2022, the outstanding principal balance of \$250.0 million is due in full on June 23, 2028, upon maturity of the loan.

#### Initial Term Loan and Revolving Facility under June 23, 2021 Credit Agreement

On June 23, 2021, the Company entered into a Credit Agreement, or the June 23, 2021 Credit Agreement, by and among the Company, the lenders from time to time party thereto, and Wells Fargo Bank, National Association, as administrative agent and collateral agent, that provides for a senior secured term B loan facility, or the "flevolving Facility," in an aggregate principal amount of \$350.0 million and a senior secured revolving credit facility, or the "flevolving Facility," in an aggregate principal amount of \$100.0 million. The proceeds of the Initial Term Loan under the June 23, 2021 Credit Agreement were used (i) to repay in full all outstanding indebtedness under that certain Credit Agreement dated May 12, 2017, by and among the Company, MUFG Bank Ltd., as administrative agent and MUFG Union Bank, N.A., as collateral agent and the lenders from time to time party thereto (as amended by Amendment No. 1, dated July 31, 2020 and (ii) to pay fees and expenses incurred in connection therewith. The remaining proceeds of the Initial Term Loan under the June 23, 2021 Credit Agreement are available for general corporate purposes and the proceeds of the Revolving Facility may be used to finance the working capital needs and other general corporate purposes of the Company and its subsidiaries. As of June 30, 2022, the Revolving Facility was undrawn. Under the amended and restated commitment letter with Wells Fargo Bank and other lenders entered into in connection with the pending merger with Silicon Motion (Note 3), the Company expects to repay the remaining outstanding term loans under this agreement upon closing of the merger.

The June 23, 2021 Credit Agreement permits the Company to request incremental loans in an aggregate principal amount not to exceed the sum of an amount equal to the greater of (x) \$75.0 million and (y) 100% of consolidated EBITDA, plus the amount of certain voluntary prepayments, plus an unlimited amount that is subject to pro forma compliance with certain first lien net leverage ratio, secured net leverage ratio and total net leverage ratio tests. Incremental loans are subject to certain additional conditions, including obtaining additional commitments from the lenders then party to the June 23, 2021 Credit Agreement or new lenders.

Under the June 23, 2021 Credit Agreement, the Initial Term Loan bears interest, at the Company's option, at a per annum rate equal to either (i) a base rate equal to the highest of (x) the federal funds rate, plus.50%, (y) the prime rate then in effect and (z) an adjusted LIBOR rate determined on the basis of a one-month interest period plus 1.00%, in each case, plus an applicable margin of 1.25% or (ii) an adjusted LIBOR rate, subject to a floor of 0.50%, plus an applicable margin of 2.25%. Loans under the Revolving Facility initially bear interest, at a per annum rate equal to either (i) a base rate (as calculated above) plus an applicable margin of 0.00%, or (ii) an adjusted LIBOR rate (as calculated above) plus an applicable margin of 1.00%. Following delivery of financial statements for the Company's fiscal quarter ending June 30, 2021, the applicable margin for loans under the Revolving Facility will range from 0.00% to 0.75% in the case of base rate loans and 1.00% to 1.75% in the case of LIBOR rate loans, in each case, depending on the Company's secured net leverage ratio as of the most recently ended fiscal quarter. Commencing on September 30, 2021, the Initial Term Loan under the June 23, 2021 Credit Agreement will amortize in equal quarterly installments equal to 0.25% of the original principal amount of the Initial Term Loan under the June 23, 2021 Credit Agreement, with the balance payable on the maturity date. The June 23, 2021 Credit Agreement contains customary provisions specifying alternative interest rate calculations to be employed at such time as LIBOR ceases to be available as a benchmark for establishing the interest rate to of loating interest rate borrowings.

The Company is required to make mandatory prepayments of the outstanding principal amount of term loans under the June 23, 2021 Credit Agreement with the net cash proceeds from the disposition of certain assets and the receipt of insurance proceeds upon certain casualty and condemnation events, in each case, to the extent not reinvested within a specified time period, from excess cash flow beyond stated threshold amounts, and from the incurrence of certain indebtedness. The Company

has the right to prepay its term loans under the June 23, 2021 Credit Agreement, in whole or in part, at any time without premium or penalty, subject to certain limitations and a .0% soft call premium applicable during the firstsix months following the closing date of the June 23, 2021 Credit Agreement. The Initial Term Loan under the June 23, 2021 Credit Agreement will mature on June 23, 2028, at which time all outstanding principal and accrued and unpaid interest on the Initial Term Loan under the June 23, 2021 Credit Agreement must be repaid. The Revolving Facility will mature on June 23, 2026, at which time all outstanding principal and accrued and unpaid interest under the Revolving Facility must be repaid. The Company is also obligated to pay fees customary for a credit facility of this size and type.

The Company's obligations under the June 23, 2021 Credit Agreement are required to be guaranteed by certain of its domestic subsidiaries meeting materiality thresholds set forth in the June 23, 2021 Credit Agreement. Such obligations, including the guaranties, are secured by substantially all of the assets of the Company and the subsidiary guarantors pursuant to a Security Agreement, dated as of June 23, 2021, by and among the Company, the subsidiary guarantors from time to time party thereto, and Wells Fargo Bank, National Association, as collateral agent.

The June 23, 2021 Credit Agreement contains customary affirmative and negative covenants, including covenants limiting the ability of the Company and its restricted subsidiaries to, among other things, incur debt, grant liens, undergo certain fundamental changes, make investments, make certain restricted payments, and sell assets, in each case, subject to limitations and exceptions set forth in the June 23, 2021 Credit Agreement. The Revolving Facility also prohibits the Company from having a secured net leverage ratio in excess of 3.501.00 (subject to a temporary increase to 3.7521.00 following the consummation of certain material permitted acquisitions) as of the last day of any fiscal quarter of the Company (commencing with the fiscal quarter ending September 30, 2021) if the aggregate borrowings under the Revolving Facility exceed 1% of the aggregate commitments thereunder (subject to certain exceptions set forth in the June 23, 2021 Credit Agreement) as of such date. As of June 30, 2022, the Company was in compliance with such covenants. The June 23, 2021 Credit Agreement also contains customary events of default that include, among other things, certain payment defaults, cross defaults to other indebtedness, covenant defaults, judgment defaults, and bankruptcy and insolvency defaults. If an event of default exists, the lenders may require immediate payment of all obligations under the June 23, 2021 Credit Agreement, the other loan documents and applicable law.

The debt is carried at its principal amount, net of unamortized debt discount and issuance costs, and is not adjusted to fair value each period. The issuance date fair value of the liability component of the debt in the amount of \$3,50.2 million was determined using a discounted cash flow analysis, in which the projected interest and principal payments were discounted back to the issuance date of the term loan at a market interest rate for nonconvertible debt of \$3,4%, which represents a Level 2 fair value measurement. The debt discount of \$0.9 million and debt issuance costs of \$2.9 million associated with the Initial Term Loan under the June 23, 2021 Credit Agreement are being amortized to interest expense using the effective interest method over its seven-year term. Debt issuance costs of \$0.4 million associated with the Revolving Facility are being amortized to interest expense over itsfive-year term.

#### 9. Stock-Based Compensation

#### Employee Stock-Based Compensation Plans

At June 30, 2022, the Company had stock-based compensation awards outstanding under the following plans: the 2010 Equity Incentive Plan, as amended, or 2010 Plan, and the 2010 Employee Stock Purchase Plan, or ESPP. Refer to the Company's Annual Report for a summary of its stock-based compensation and equity plans as of December 31, 2021. There have been no material changes to the terms of the Company's equity incentive plans during the six months ended June 30, 2022.

As of June 30, 2022, the number of shares of common stock available for future issuance under the 2010 Plan was 5,651,631 shares. As of June 30, 2022, the number of shares of common stock available for future issuance under the ESPP was 4,977,968 shares.

#### Employee Incentive Bonus

The Company mostly settles bonus awards for its employees, including executives, in shares of common stock under the 2010 Equity Incentive Plan. When bonus awards are settled in common stock issued under the 2010 Equity Incentive Plan, the number of shares issuable to plan participants is determined based on the closing price of the Company's common stock as determined in trading on the applicable stock exchange, on a date approved by the Board of Directors. In connection with the Company's bonus programs, in February 2022, the Company issued 0.5 million freely-tradable shares of the Company's common stock in settlement of bonus awards to employees, including executives, for the 2021 performance period. At June 30, 2022, the Company a carried of \$19.0 million for bonus awards for employees for year-to-date achievement in the 2022 performance period. The Company's compensation committee retains discretion to effect payment in cash, stock, or a combination of cash and stock.

#### Stock-Based Compensation

The Company recognizes stock-based compensation in the consolidated statements of income, based on the department to which the related employee reports, as follows:

		i iree Months Ended June 30,				SIX MOIITIIS	is Ended June 30,		
	·	2022	2021		2022			2021	
		(in thousands)				(in th	ousands)		
Cost of net revenue	\$	162	\$	148	\$	325	\$	317	
Research and development		9,983		7,267		19,659		14,429	
Selling, general and administrative		9,324		6,551		18,039		12,175	
	\$	19,469	\$	13,966	\$	38,023	\$	26,921	

The total unrecognized compensation cost related to unvested restricted stock units as of June 30, 2022 was \$12.8 million, and the weighted average period over which these equity awards are expected to vest is 2.50 years.

The total unrecognized compensation cost related to unvested performance-based restricted stock units as of June 30, 2022 was \$8.8 million, and the weighted average period over which these equity awards are expected to vest is 1.12 years.

The total unrecognized compensation cost related to unvested stock options as of June 30, 2022 was \$0.01 million, and the weighted average period over which these equity awards are expected to vest is 0.02 years.

#### Restricted Stock Units

A summary of the Company's restricted stock unit activity is as follows:

	Number of Shares (in thousands)	d-Average Grant-Date Fair llue per Share
Outstanding at December 31, 2021	5,233	\$ 25.14
Granted	1,697	60.58
Vested	(1,814)	36.60
Canceled	(214)	29.06
Outstanding at June 30, 2022	4,902	\$ 33.00

#### Performance-Based Restricted Stock Units

Performance-based restricted stock units are eligible to vest at the end of each fiscal year in athree-year performance period based on the Company's annual growth rate in net sales and non-GAAP diluted earnings per share (subject to certain adjustments) over baseline results relative to the growth rates for a peer group of companies for the same metrics and periods.

For the performance-based restricted stock units granted to date, 60% of each performance-based award is subject to the net sales metric for the performance period and 40% is subject to the non-GAAP diluted earnings per share metric for the performance period. The maximum percentage for a particular metric is 250% of the target number of units subject to the award related to that metric, however, vesting of the performance stock units is capped a60% and 100%, respectively, of the target number of units subject to the award in years one and two, respectively, of thethree-year performance period.

As of June 30, 2022, the Company believes that it is probable that it will achieve certain performance metrics specified in the respective award agreements based on its expected revenue and non-GAAP diluted EPS results over the performance periods and calculated growth rates relative to its peers' expected results based on data available, as defined in the respective award agreements.

A summary of the Company's performance-based restricted stock unit activity is as follows:

	Number of Shares (in thousands)	Weig	hted-Average Grant-Date Fair Value per Share
Outstanding at December 31, 2021	2,005	\$	19.80
Granted <sup>(1)</sup>	376		75.40
Vested	(701)		17.85
Canceled	(4)		35.73
Outstanding at June 30, 2022	1,676	\$	33.04

<sup>(1)</sup> Number of shares granted is based on the maximum percentage achievable in the performance-based restricted stock unit award.

#### Employee Stock Purchase Rights and Stock Options

Employee Stock Purchase Rights

During the six months ended June 30, 2022 and 2021 there were83,404 and 113,510 shares, respectively, of common stock purchased under the ESPP at a weighted average price of \$34.92 and \$23.21, respectively.

The fair values of employee stock purchase rights for the latest ESPP offering period were estimated using the Black-Scholes option pricing model at their respective grant date using the following assumptions:

	Three Months Ended suite 50,					
	2022			2021		
Weighted-average grant date fair value per share	\$	14.25		\$	10.85	
Risk-free interest rate		1.54	%		0.04	%
Dividend yield		_	%		_	%
Expected life (in years)			0.50			0.50
Volatility		69.74	%		61.10	%

The risk-free interest rate assumption was based on rates for United States (U.S.) Treasury zero-coupon bonds with maturities similar to those of the expected term of the award being valued. The assumed dividend yield was based on the Company's expectation of not paying dividends in the foreseeable future. The expected term is the duration of the offering period for each grant date. In addition, the estimated volatility incorporates the historical volatility over the expected term based on the Company's daily closing stock prices.

#### Stock Options

A summary of the Company's stock options activity is as follows:

	Number of Options (in thousands)	Weighted-Average Exercise Price		Weighted-Average Contractual Term (in years)	te Intrinsic Value usands)
Outstanding at December 31, 2021	417	\$	17.05		
Exercised	(18)		14.47		
Outstanding at June 30, 2022	399	\$	17.16	2.89	\$ 16,449
Vested and expected to vest at June 30, 2022	399	\$	17.16	2.89	\$ 16,449
Exercisable at June 30, 2022	392	\$	17.14	2.89	\$ 16,170

No stock options were granted by the Company during the six months ended June 30, 2022.

The intrinsic value of stock options exercised was \$0.4 million and \$6.7 million in the three months ended June 30, 2022 and 2021, respectively. The intrinsic value of stock options exercised was \$0.7 million and \$9 million in the six months ended June 30, 2022 and 2021, respectively.

Cash received from exercise of stock options was \$0.1 million and \$2.6 million during the three months ended June 30, 2022 and 2021, respectively. Cash received from exercise of stock options was \$0.2 million and \$3.9 million during the six months ended June 30, 2022 and 2021, respectively.

The tax benefit from stock options exercised was \$0.6 million and \$10.6 million during the three months ended June 30, 2022 and 2021, respectively. The tax benefit from stock options exercised was \$.0 million and \$13.3 million during the six months ended June 30, 2022 and 2021, respectively.

#### 10. Income Taxes

The provision for income taxes primarily relates to projected federal, state, and foreign income taxes. To determine the quarterly provision for income taxes, the Company uses an estimated annual effective tax rate, which is generally based on expected annual income and statutory tax rates in the various jurisdictions in which the Company operates. In addition, the tax effects of certain significant or unusual items are recognized discretely in the quarter during which they occur and can be a source of variability in the effective tax rates from quarter to quarter.

The Company utilizes the asset and liability method of accounting for income taxes, under which deferred taxes are determined based on temporary differences between the financial statement and tax basis of assets and liabilities using tax rates expected to be in effect during the years in which the temporary differences reverse. The Company records a valuation allowance to reduce its deferred taxes to the amount it believes is more likely than not to be realized. In making such determination, the Company considers all available positive and negative evidence quarterly, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies, bar recent financial performance. Forming a conclusion that a valuation allowance is not required is difficult when there is negative evidence such as cumulative losses in recent years. Based upon the Company's review of all positive and negative evidence, the Company continues to have a valuation allowance on its state deferred tax assets, certain of its federal deferred tax assets in jurisdictions where the Company has cumulative losses or otherwise is not expected to utilize certain tax attributes. The Company does not incur expense or benefit in certain tax free jurisdictions in which it operates.

The Company recorded an income tax provision of \$11.9 million in the three months ended June 30, 2022 and an income tax benefit of \$8.0 million in the three months ended June 30, 2021.

The Company recorded an income tax provision of \$23.3 million in the six months ended June 30, 2022 and an income tax benefit of \$0.2 million in the six months ended June 30, 2021.

The difference between the Company's effective tax rate and the 21.0% U.S. federal statutory rate for the six months ended June 30, 2022 primarily related to the mix of pre-tax income among jurisdictions, permanent tax items including a tax on global intangible low-taxed income, stock based compensation, excess tax benefits related to stock-based compensation, release of uncertain tax positions under ASC 740-10, and release of the valuation allowance on certain federal research and development credits. The permanent tax item related to global intangible low-taxed income also reflects recent legislative changes requiring the capitalization of research and experimentation costs, as well as limitations on the creditability of certain foreign income taxes.

The difference between the Company's effective tax rate and the 21.0% U.S. federal statutory rate for the six months ended June 30, 2021 primarily related to the mix of pre-tax income among jurisdictions, permanent tax items including the tax on global intangible low-taxed income, stock based compensation, excess tax benefits related to stock-based compensation, and release of certain reserves for uncertain tax positions under ASC 740-10.

Income tax positions must meet a more-likely-than-not threshold to be recognized. Income tax positions that previously failed to meet the more-likely-than-not threshold are recognized in the first subsequent financial reporting period in which that threshold is met. Previously recognized tax positions that no longer meet the more-likely-than-not threshold are derecognized in the first financial reporting period in which that threshold is no longer meet. The Company records potential penalties and interest accrued related to unrecognized tax benefits within the consolidated statements of income as income tax expense.

During the six months ended June 30, 2022, the Company's unrecognized tax benefits increased by \$4.4 million. The Company does not expect its unrecognized tax benefits to change significantly over the next 12 months. Accrued interest and

penalties associated with uncertain tax positions as of June 30, 2022 were approximately \$0.4 million and \$0.03 million, respectively.

The Company is subject to federal and state income tax in the United States and is also subject to income tax in certain other foreign tax jurisdictions. At June 30, 2022, the statutes of limitations for the assessment of federal, state, and foreign income taxes are closed for the years before 2018, 2017, and 2016, respectively.

The Company's subsidiary in Singapore operates under certain tax incentives in Singapore, which are generally effective through March 2027, and are conditional upon meeting certain employment and investment thresholds in Singapore. Under the incentives, qualifying income derived from certain sales of the Company's integrated circuits is taxed at a concessionary rate over the incentive period, and there are reduced Singapore withholding taxes on certain intercompany royalties during the incentive period. The Company recorded a tax provision in the six months ended June 30, 2022 at the incentive rate. In the six months ended June 30, 2021, due to the Company's Singapore net operating losses and a full valuation allowance in Singapore, the incentives did not have a material impact on the Company's income tax provision.

#### 11. Concentration of Credit Risk, Significant Customers and Geographic Information

Financial instruments, which potentially subject the Company to concentrations of credit risk, consist primarily of cash and cash equivalents and accounts receivable. Collateral is generally not required for customer receivables. The Company limits its exposure to credit loss by placing its cash with high credit quality financial institutions. At times, such deposits may be in excess of insured limits. The Company has not experienced any losses on its deposits of cash and cash equivalents.

#### Significant Customers

The Company markets its products and services to manufacturers of a wide range of electronic devices (Note 1). The Company sells its products both directly to end-customers and through third-party distributors, both of which are referred to as the Company's customers (Note 12). The Company makes periodic evaluations of the credit worthiness of its customers.

Customers comprising greater than 10% of net revenues for each of the periods presented are as follows:

	Thre	e Months Ended June 30,		Six Months Ended June 30,						
	2022	2021		2022	2021					
Percentage of total net revenue										
Customer A (direct)	18	% 15	%	17 %	15	%				
Customer B (direct)	11	% 11	%	11 %	12	%				

The following table presents balances that are 10% or greater of accounts receivable, based on the Company's billings to its customers.

	June 30, 2022	2021		
Percentage of gross accounts receivable				_
Customer B (direct)		*	14 %	6
Customer C (distributor)	14	%	*	*
Customer D (direct)		*	17 %	%

<sup>\*</sup> Represents less than 10% of the gross accounts receivable as of the respective period end.

#### Significant Suppliers

Suppliers comprising greater than 10% of total inventory purchases are as follows:

		Three Months Ended June 30,				Six Months Ended Julie 50,				
		2022		2021		2022		2021		
V	endor A	30	%	38	%	29	%	41	%	
V	endor B	23	%	24	%	25	%	22	%	
V	endor C	13	%	10	%	12	%	10	%	

#### Geographic Information

The Company's consolidated net revenues by geographic area based on ship-to location are as follows (in thousands):

	Three Months Ended June 30,									Six Months Ended June 30,								
			2022			2021					2022	2021						
		Amount	% of tota revenue	al net		Amount	% of total	% of total net revenue		Amount	% of total net revenue		Amount		% of total n revenue			
Asia	\$	227,655	81	%	\$	169,088	82	%	\$	439,320	81	%	\$	340,248	82	%		
United States		9,684	3	%		8,027	4	%		18,552	3	%		18,327	4	%		
Rest of world		42,670	16	%		28,261	14	%		86,064	16	%		56,160	14	%		
Total	\$	280,009	100	%	\$	205,376	100	%	\$	543,936	100	%	\$	414,735	100	%		

The products shipped to individual countries or territories representing greater than 10% of net revenue for each of the periods presented are as follows:

	Three Mo	onths Ended June 30,	Six Months Ended June 30,						
	2022	2021	2022	2021					
Percentage of total net revenue	•								
Hong Kong	40 %	6 44 %	39 %	40 %					
China	22 %	0	17 %	11 %					
Vietnam	•	* 14 %	*	13 %					

\* Represents less than 10% of the net revenue for the respective period.

The determination of which country a particular sale is allocated to is based on the destination of the product shipment. No other individual country accounted for more than 10% of net revenue during these periods. Although a large percentage of the Company's products is shipped to Asia, and in particular, Hong Kong, China and Vietnam, the Company believes that a significant number of the systems designed by customers and incorporating the Company's semiconductor products are subsequently sold outside Asia to Europe, Middle East, and Africa markets and North American markets.

Long-lived assets, which consists of property and equipment, net, leased right-of-use assets, intangible assets, net, and goodwill by geographic area are as follows (in thousands):

		June 50,	December 31,							
		2022	2021							
	Amount	% of total		Amount	% of total					
United States	\$ 369,041	69	%	\$	382,650	70	%			
Singapore	116,901	22	%		122,474	22	%			
Rest of world	46,015	9	%		42,277	8	%			
Total	\$ 531,957	100	%	\$	547,401	100	%			

#### 12. Revenue from Contracts with Customers

#### Revenue by Market

The table below presents disaggregated net revenues by market (in thousands):

		Thr	ree Month	s Ended June 30	,		Six Months Ended June 30,						
	2022			2021			2022			2021			
Broadband	\$	139,098		\$	112,765		\$	273,654		\$	236,955		
% of net revenue		50	%		55	%		50	%		57	%	
Connectivity		56,400			31,292			116,579			58,741		
% of net revenue		20	%		15	%		21	%		14	%	
Infrastructure		35,889			29,369			69,070			58,161		
% of net revenue		13	%		14	%		13	%		14	%	
Industrial and multi-market		48,622			31,950			84,633			60,878		
% of net revenue		17	%		16	%		16	%		15	%	
Total net revenue	\$	280,009		\$	205,376		\$	543,936		\$	414,735		

Revenues from sales through the Company's distributors accounted for 45% and 45% of net revenue for the three months ended June 30, 2022 and 2021, respectively.

Revenues from sales through the Company's distributors accounted for 46% and 45% of net revenue for the six months ended June 30, 2022 and 2021, respectively.

#### Contract Liabilities

As of June 30, 2022 and December 31, 2021, customer contract liabilities were approximately \$\mathbb{S}\$.3 million and \$\mathbb{S}\$1.0 million, respectively, and consisted primarily of advanced payments received for which performance obligations have not been completed. Revenue recognized in each of the three and six months ended June 30, 2022 and 2021 that was included in the contract liability balance as of the beginning of each of those respective periods was important to the contract liability balance as of the beginning of each of those respective periods was important to the contract liability balance as of the beginning of each of those respective periods was important to the contract liability balance as of the beginning of each of those respective periods was important to the contract liability balance as of the beginning of each of those respective periods was important to the contract liability balance as of the beginning of each of those respective periods was important to the contract liability balance as of the beginning of each of those respective periods was important to the contract liability balance as of the beginning of each of those respective periods was important to the contract liability balance as of the beginning of each of those respective periods was important to the contract liability balance as of the beginning of each of the contract liability balance as of the beginning of each of the contract liability balance as of the beginning of each of the contract liability balance as of the beginning of each of the contract liability balance as of the beginning of each of the contract liability balance as of the beginning of each of the contract liability balance as of the beginning of each of the contract liability balance as of the beginning of each of the contract liability balance as of the beginning of each of the contract liability balance as of the beginning of each of the beginning

There were no material changes in the contract liabilities balance during the six months ended June 30, 2022 and 2021.

#### Obligations to Customers for Price Adjustments and Returns and Assets for Right-of-Returns

As of June 30, 2022 and December 31, 2021, obligations to customers consisting of estimates of price protection rights offered to the Company's end customers totaled \$\mathbb{1}0.6\$ million and \$40.5\$ million, respectively, and are included in accrued price protection liability in the consolidated balance sheets. For activity in this account, including amounts included in net revenue, refer to Note 7. Other obligations to customers representing estimates of price adjustments to be claimed by distributors upon sell-through of their inventory to their end customer and \$1.2\$ million, respectively, and as of December 31, 2021 were \$6.7\$ million and \$2.8\$ million and \$2.8\$ million and \$2.8\$ million and \$0.2\$ mere so and other current liabilities in the consolidated balance sheets (Note 7). The increase in revenue in the three and six months ended June 30, 2022 and 2021 from net changes in transaction prices for amounts included in obligations to customers for price adjustments as of the beginning of those respective periods was not material.

As of June 30, 2022 and December 31, 2021, right of return assets under customer contracts representing the estimates of product inventory the Company expects to receive from customers in stock rotation returns were approximately \$0.4 million and \$1.1 million, respectively. Right of return assets are included in inventory in the consolidated balance sheets.

As of June 30, 2022 and December 31, 2021, there wereno impairment losses recorded on customer accounts receivable.

#### 13. Leases

#### **Operating Leases**

Operating lease arrangements primarily consist of office leases expiring in various years through 2028. These leases have original terms of approximately to 8 years and some contain options to extend the lease up to 5 years or terminate the lease,

which are included in right-of-use assets and lease liabilities when the Company is reasonably certain it will renew the underlying leases. Since the implicit rate of such leases is unknown and the Company is not reasonably certain to renew its leases, the Company has elected to apply a collateralized incremental borrowing rate to facility leases on the original lease term in calculating the present value of future lease payments. As of June 30, 2022 and December 31, 2021, the weighted average discount rate for operating leases was 3.6% and 3.6%, respectively, and the weighted average remaining lease term for operating leases was 4.2 years and 4.6 years, respectively, as of the end of each of these periods

The table below presents aggregate future minimum payments due under leases, reconciled to total lease liabilities included in the consolidated balance sheet as of June 30, 2022:

	Operating Leases
	(in thousands)
2022 (6 months)	\$ 5,834
2023	11,427
2024	8,182
2025	7,292
2026	5,171
Thereafter	4,054
Total minimum payments	41,960
Less: imputed interest	(2,920)
Total lease liabilities	39,040
Less: short-term lease liabilities	(11,202)
Long-term lease liabilities	\$ 27,838

Operating lease cost was \$2.3 million and \$2.3 million for the three months ended June 30, 2022 and 2021, respectively.

Operating lease cost was \$4.8 million and \$4.8 million for the six months ended June 30, 2022 and 2021, respectively.

Short-term lease costs for the three and six months ended June 30, 2022 and 2021 were not material.

There were \$4.1 million and \$0 of right-of-use assets obtained in exchange for new lease liabilities for the three months ended June 30, 2022 and 2021, respectively.

There were \$11.9 million and \$5.2 million of right-of-use assets obtained in exchange for new lease liabilities for the six months ended June 30, 2022 and 2021, respectively.

#### 14. Employee Defined Benefit Retirement Plans

#### Pension and Other Defined Benefit Retirement Obligations

In connection with a 2020 acquisition, the Company assumed an obligation of \$7.9 million associated with certain defined benefit retirement plans, including a pension plan. As of June 30, 2022 and December 31, 2021, the defined benefit obligation was \$4.5 million and \$4.5 million, respectively. The benefit is based on a formula applied to eligible employee earnings.

Net periodic benefit costs were \$0.1 million and \$0.1 million for the three months ended June 30, 2022 and 2021 and were recorded to research and development expenses in the consolidated statements of income.

Net periodic benefit costs were \$0.2 million and \$0.2 million for the six months ended June 30, 2022 and 2021 and were recorded to research and development expenses in the consolidated statements of income.

#### 15. Commitments and Contingencies

#### Inventory Purchase and Other Contractual Obligations

As of June 30, 2022, future minimum payments under inventory purchase and other obligations are as follows:

Inventory Purchase Obligations					Total
\$	195,849	\$	12,624	\$	208,473
	12,597		15,548		28,145
	_		841		841
	_		109		109
\$	208,446	\$	29,122	\$	237,568
	S S	\$ 195,849 12,597 —	\$ 195,849 \$ 12,597 —	\$ 195,849 \$ 12,624 12,597 15,548 — 841 — 109	\$ 195,849 \$ 12,624 \$ 12,597 15,548

Other obligations consist of contractual payments due for software licenses.

#### Jointly Funded Research and Development

From time to time, the Company enters into contracts for jointly funded research and development projects to develop technology that may be commercialized into a product in the future. As the Company may be required to repay all or a portion of the funds provided by the other parties under certain conditions, certain funds received from the other parties of \$4.0 million have been deferred in other long-term liabilities. Additional amounts under the contracts are tied to certain milestones and will also be recorded as a long-term liability as payment due under such milestones are received. The Company de-recognizes the liabilities when the contingencies associated with the repayment conditions have been resolved. During the three and six months ended June 30, 2022, the Company recognized \$0 and \$3.8 million in previously deferred amounts from other parties due to resolution of such repayment conditions

#### Other Matters

From time to time, the Company is subject to threats of litigation or actual litigation in the ordinary course of business, some of which may be material. The Company is not currently a party to any pending legal proceedings that, if determined adversely to the Company's interests, would, in management's opinion, have a material effect on the Company's financial position, results of operations, or cash flows or that would not be covered by the Company's existing liability insurance. The results of any litigation cannot be predicted with certainty, and regardless of the outcome, litigation can have an adverse impact on the Company because of defense and settlement costs, diversion of management resources, and other factors.

#### 16. Stock Repurchases

On February 23, 2021, the Company's board of directors authorized a plan to repurchase up to \$100 million of the Company's common stock over a period ending February 16, 2024. The amount and timing of repurchases are subject to a variety of factors including liquidity, share price, market conditions, and legal requirements. Any purchases will be funded from available working capital and may be effected through open market purchases, block transactions, and privately negotiated transactions. The share repurchase program does not obligate the Company to make any repurchases and may be modified, suspended, or terminated by the Company at any time without prior notice. The share repurchase program has been temporarily suspended since July 2022 due to the Company's pending merger with Silicon Motion.

During the three months ended June 30, 2022, the Company repurchased 124,000 shares of its common stock at a weighted average price of \$12.0213 per share at an aggregate value of approximately \$5.2 million under the repurchase program.

During the six months ended June 30, 2022, the Company repurchased 564,449 shares of its common stock at a weighted average price of \$5.7972 per share at an aggregate value of approximately \$1.5 million under the repurchase program.

At June 30, 2022, the aggregate value of common stock repurchased under the program was approximately \$5.0 million and approximately \$45.0 million remained available for repurchase under the program.

#### ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

#### Forward-Looking Statements

The following discussion and analysis of the financial condition and results of our operations should be read in conjunction with the consolidated financial statements and related notes included elsewhere in this report. This discussion contains forward-looking statements that involve risks and uncertainties. Our actual results could differ materially from those discussed below. Factors that could cause or contribute to such differences include, but are not limited to, those identified below, and those discussed in the section titled "Risk Factors" included in Part II, Item 1A in this report.

#### Overview

We are a provider of communications systems-on-chip solutions used in broadband, mobile and wireline infrastructure, data center, and industrial and multi-market applications. We are a fabless integrated circuit design company whose products integrate all or substantial portions of a high-speed communication system, including radio frequency, or RF, high-performance analog, mixed-signal, digital signal processing, security engines, data compression and networking layers, and power management. In most cases, these products are designed on a single silicon-die, using standard digital complementary metal oxide semiconductor, or CMOS, processes and conventional packaging technologies. We believe this approach enables our solutions to achieve superior power, performance, and cost relative to our industry competition. Our customers include electronics distributors, module makers, original equipment manufacturers, or OEMs, and original design manufacturers, or ODMs, who incorporate our products in a wide range of electronic devices. Examples of such devices include cable Data Over Cable Service Interface Specifications, or DOCSIS, fiber and DSL broadband modems and gateways; Wi-Fi and wireline routers for home networking; radio transceivers and modems for 4G/5G base-station and backhaul infrastructure; fiber-optic modules for data center, metro, and long-haul transport networks; as well as power management and interface products used in these and many other markets.

Our highly integrated semiconductor devices and platform-level solutions are primarily manufactured using low-cost CMOS process technology. CMOS processes are ideally suited for large digital logic implementations targeting high-volume and low-cost consumer applications. Importantly, our ability to design analog and mixed-signal circuits in CMOS allows us to efficiently combine analog functionality and complex digital signal processing logic in the same integrated circuit. As a result, our solutions have exceptional levels of functional integration and performance, low manufacturing cost, and reduced power consumption. In addition, our proprietary CMOS-based radio and digital system architectures also enable shorter design cycles, significant design flexibility and low system-level cost across a wide range of broadband communications, wired and wireless infrastructure, and industrial and multi-market customer applications.

In the six months ended June 30, 2022, revenues of \$543.9 million were derived from sales of RF receivers and RF receiver systems-on-chip and connectivity solutions into broadband operator voice and data modems and gateways and connectivity adapters, global analog and digital RF receiver products, radio and modem solutions into wireless carrier access and backhaul infrastructure platforms, high-speed optical interconnect solutions sold into optical modules for data-center, metro and long-haul networks, and high-performance interface and power management solutions into a broad range of communications, industrial, automotive and multi-market applications. Our ability to achieve revenue growth in the future will depend, among other factors, on our ability to further penetrate existing markets; our ability to expand our target addressable markets by developing new and innovative products; changes in government trade policies; and our ability to obtain design wins with device manufacturers, in particular manufacturers of set-top boxes, data modems, and gateways for the broadband service provider, storage networking market, cable infrastructure market, industrial and automotive markets, and optical module and telecommunications infrastructure markets.

Products shipped to Asia accounted for 81% and 82% of net revenue during the three months ended June 30, 2022 and 2021, respectively, including 40% from products shipped to Hong Kong and 22% from products shipped to mainland China during the three months ended June 30, 2022 and 44% from products shipped to Hong Kong and 14% from products shipped to Vietnam during the three months ended June 30, 2021.

Products shipped to Asia accounted for 81% and 82% of net revenue during the six months ended June 30, 2022 and 2021, respectively, including 39% from products shipped to Hong Kong and 17% from products shipped to mainland China during the six months ended June 30, 2022 and 40% from products shipped to Hong Kong, 11% from products shipped to mainland China, and 13% from products shipped to Vietnam during the six months ended June 30, 2021. Although a large percentage of our products is shipped to Asia, we believe that a significant number of the systems designed by these customers and incorporating our semiconductor products are then sold outside Asia. For example, revenue generated from sales of our products during the six months ended June 30, 2022 and 2021 related principally to sales to Asian ODMs and contract manufacturers delivering products into European and North American markets. To date, all of our sales have been denominated in United States dollars.

A significant portion of our net revenue has historically been generated by a limited number of customers. Sales to customers comprise both direct sales to customers and indirect sales through distributors. In the three months ended June 30, 2022, our top two customers accounted for 29% of our net revenue, and our ten largest customers collectively accounted for 71% of our net revenue, of which distributor customers accounted for 29% of our net revenue. In the six months ended June 30, 2022, our top two customers accounted for 28% of our net revenue, and our ten largest customers collectively accounted for 71% of our net revenue, of which distributor customers accounted for 30% of our net revenue. For certain customers, we sell multiple products into disparate end user applications such as cable modems, satellite set-top boxes and broadband gateways.

Our business depends on winning competitive bid selection processes, known as design wins, to develop integrated circuits for use in our customers' products. These selection processes are typically lengthy, and as a result, our sales cycles will vary based on the specific market served, whether the design win is with an existing or a new customer and whether our product being designed in our customer's device is a first generation or subsequent generation product. Considering the complex and, if our engagement results in a design win, can require significant time to define, design and result in volume production. Because the sales cycle for products is long, we can incur significant design and development expenditures in circumstances where we do not ultimately recognize any revenue. We do not have any long-term purchase commitments with any of our customers, all of whom purchase our products on a purchase order basis. Once one of our products is incorporated into a customer's design, however, we believe that our product is likely to remain a component of the customer's product for its life cycle because of the time and expense associated with redesigning the product or substituting an alternative chip. Product life cycles in our target markets will vary by application. For example, in the cable operator modem and gateway sectors, a design-in can have a product life cycle of 24 to 48 months. In the industrial and wired and wireless infrastructure markets, a design-in can have a product life cycle of 24 to 60 months and beyond.

Impact of COVID-19 and the Global Semiconductor Supply Shortage

During the COVID-19 global pandemic, which is still ongoing, various restrictions were put in place causing a temporary decline in demand for certain items such as automobiles. As restrictions began easing across the world, a sudden increase in demand for electronics containing semiconductor chips and stockpiling of chips by certain firms in China blacklisted by the U.S. has exacerbated bottlenecks in the supply chain, resulting in a global semiconductor supply shortage impacting our industry. Some chip manufacturers are estimating this supply shortage may continue into 2023. While these chip manufacturers are working to increase capacity in the future, and we are continuing to work closely with our suppliers and customers to minimize the potential adverse impacts of the supply shortage may have a near-term impact on our ability to meet increased demand on certain products which may continue into 2023.

Global supply shortages, and uncertainty in customer demand and the worldwide economy has continued as a result of the COVID-19 pandemic and may be further exacerbated by the impacts of high inflation, and we may experience increased volatility in our sales and revenues in the near future. However, the magnitude of such volatility on our business and its duration is uncertain and cannot be reasonably estimated at this time.

#### Recent Developments

Silicon Motion Merger

On May 5, 2022, we entered into an agreement and plan of merger, or the Merger Agreement, with Silicon Motion Technology Corporation, or Silicon Motion, an exempted company with limited liability incorporated under the Law of the Cayman Islands, pursuant to which, subject to the terms and conditions thereof, we agreed to acquire Silicon Motion pursuant to a statutory merger of Shark Merger Sub, a wholly-owned subsidiary of MaxLinear, with and into Silicon Motion is a provider of NAND flash controllers for solid state drives and other solid state storage devices.

Under the terms of the Merger Agreement, the transaction consideration will consist of \$93.54 in cash and 0.388 shares of our stock for each Silicon Motion American Depositary Share, or ADS, and \$23.385 in cash and 0.097 shares of our common stock for each Silicon Motion ordinary share not represented by an ADS. Upon closing of the transaction, our current stockholders will own approximately 86% of the combined company and former Silicon Motion securityholders will own approximately 14% of the combined company. Based on the closing price of our common shares on May 4, 2022, the implied value of the total transaction consideration for Silicon Motion is approximately \$4.3 billion. We may fund up to \$3.5 billion of cash consideration with cash on hand and fully committed debt financing from Wells Fargo Bank, N.A., or Wells Fargo Bank, and other lenders as described below. We will also assume Silicon Motion's vested and unvested employee stock-based compensation awards.

The merger is not subject to any financing conditions but is pending satisfaction of customary closing conditions, including Silicon Motion shareholders' approval and regulatory approval in the People's Republic of China, or China. On June 27, 2022, the Hart-Scott-Rodino Antitrust Improvements Act of 1976, or HSR, waiting period expired with respect to the pending merger. On July 13, 2022, the Form S-4 was declared effective by the SEC.

On June 17, 2022, we entered into an amended and restated commitment letter with Wells Fargo Bank and other lenders pursuant to which, subject to the terms and conditions set forth therein, the lenders have committed to provide (i) a senior secured term B loan facility in an aggregate principal amount of up to \$2.7375 billion (ii) a senior secured term A loan facility in an aggregate principal amount of up to \$512.5 million and (iii) a senior secured revolving credit facility in an aggregate principal amount of up to \$520.0 million, which we collectively refer to as the Senior Secured Credit Facilities. The funding of the Senior Secured Credit Facilities is contingent on the satisfaction of customary conditions, including (i) the execution and delivery of definitive documentation with respect to credit facilities in accordance with the terms in the amended and restated commitment letter, and (ii) the consummation of the acquisition by us of Silicon Motion in accordance with the Merger Agreement. A portion of the proceeds from the Senior Secured Credit Facilities will be used to repay existing debt in full.

#### Critical Accounting Policies and Estimates

Management's discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements which are prepared in accordance with accounting principles that are generally accepted in the United States of America. The preparation of these consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, related disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. We continually evaluate our estimates and judgments, the most critical of which are those related to business combinations, revenue recognition, inventory valuation, production masks, goodwill and other intangible assets valuation, and income taxes. We base our estimates and judgments on historical experience and other factors that we believe to be reasonable under the circumstances. Materially different results can occur as circumstances change and additional information becomes known.

We believe that accounting policies we have identified as critical involve a greater degree of judgment and complexity than our other accounting policies. Accordingly, those are the policies we believe are the most critical to understanding and evaluating our consolidated financial condition and results of operations.

For a summary of our critical accounting policies and estimates, refer to Management's Discussion and Analysis section of our Annual Report on Form 10-K for the year ended December 31, 2021, which we filed with the Securities and Exchange Commission, or SEC, on February 2, 2022, or our Annual Report. There have been no material changes to our critical accounting policies and estimates during the six months ended June 30, 2022.

#### Recently Issued Accounting Pronouncements

See Note 1 to our condensed consolidated financial statements included elsewhere in this Quarterly Report on Form 10-Q for recently issued accounting pronouncements not yet adopted as of the date of this report.

#### Results of Operations

The following describes the line items set forth in our unaudited consolidated statements of income.

Net Revenue. Net revenue is generated from sales of radio-frequency, analog, digital, and mixed-signal integrated circuits for access and connectivity, wired and wireless infrastructure, and industrial and multi-market applications. A significant portion of our sales are to distributors, who then resell our products.

Cost of Net Revenue. Cost of net revenue includes the cost of finished silicon wafers processed by third-party foundries; costs associated with our outsourced packaging and assembly, test and shipping; costs of personnel, including stock-based compensation, and equipment associated with manufacturing support, logistics and quality assurance; amortization of acquired developed technology intangible assets; amortization of certain production mask costs; cost of production load boards and sockets; and an allocated portion of our occupancy costs.

Research and Development. Research and development expense includes personnel-related expenses, including salaries and benefits, stock-based compensation, new product engineering mask costs, prototype integrated circuit packaging and test costs, computer-aided design software license costs, intellectual property license costs, reference design development costs, development testing and evaluation costs, depreciation expense and allocated occupancy costs. Research and development activities include the design of new products, refinement of existing products and design of test methodologies to ensure compliance with required specifications. All research and development costs are expensed as incurred.

Selling, General and Administrative. Selling, general and administrative expense includes personnel-related expenses, including salaries and benefits, stock-based compensation, amortization of certain acquired intangible assets, merger, acquisition and integration costs, third-party sales commissions, field application engineering support, travel costs, professional and consulting fees, legal fees, depreciation expense and allocated occupancy costs.

Restructuring Charges. Restructuring charges consist of severance, lease and leasehold impairment charges, and other charges related to restructuring plans.

Loss on Extinguishment of Debt. Loss on extinguishment of debt consists of the charge-off of remaining unamortized debt discount and issuance cost on debt we repaid early with a majority of the proceeds from a new term loan.

Interest and Other Income (Expense), Net. Interest and other income (expense), net includes interest income, interest expense and other income (expense). Interest income consists of interest earned on our cash, cash equivalents and restricted eash balances. Interest expense consists of interest accrued on debt and amortization of discounts on debt and other liabilities. Other income (expense) generally consists of income (expense) generated from non-operating transactions and unrealized holding gains (losses) from certain investments required to be marked to market value.

Income Tax Provision (Benefit). We make certain estimates and judgments in determining income taxes for financial statement purposes. These estimates and judgments occur in the calculation of certain tax assets and liabilities, which arise from differences in the timing of recognition of revenue and expenses for tax and financial statement purposes and the realizability of assets in future years.

The following table sets forth our consolidated statement of income data as a percentage of net revenue for the periods indicated:

	Three Months Ended	June 30,	Six Months Ended June 30,						
	2022	2021	2022	2021					
Net revenue	100 %	100 %	100 %	100 %					
Cost of net revenue	41	45	41	46					
Gross profit	59	55	59	54					
Operating expenses:									
Research and development	29	36	27	33					
Selling, general and administrative	16	17	16	17					
Restructuring charges		<u> </u>	<u> </u>	1					
Total operating expenses	45	54	43	51					
Income from operations	14	1	16	3					
Interest income	_	_	_	_					
Interest expense	(1)	(2)	(1)	(2)					
Loss on extinguishment of debt	_	(3)	_	(1)					
Other income (expense), net	3	_	_	_					
Total other income (expense), net	2	(5)	_	(3)					
Income (loss) before income taxes	16	(4)	16	_					
Income tax provision (benefit)	4	(4)	4	(1)					
Net income	11 %	— %	12 %	1 %					

#### Net Revenue

Net revenue increased \$74.6 million to \$280.0 million for the three months ended June 30, 2022, as compared to \$205.4 million for the three months ended June 30, 2021, due to improvement in supply and market strength attributed to the work-from-home environment. The increase in broadband net revenue of \$26.5 million was primarily from gateway revenues. The increase in connectivity revenue of \$25.1 million was primarily driven by higher Wi-Fi and ethernet revenues as our supply improved and an increase in MoCA product shipments. The increase in infrastructure revenues of \$6.5 million was primarily driven by increased shipments of high-performance analog, MoCA last-mile access, and wireless access products in this category. The increase in industrial and multi-market revenue of \$16.7 million was related to increased shipments of component and high-performance analog products.

Net revenue increased \$129.2 million to \$543.9 million for the six months ended June 30, 2022, as compared to \$414.7 million for the six months ended June 30, 2021, due to improvement in supply and market strength attributed to the work-from-home environment. The increase in broadband net revenue of \$36.7 million was primarily from gateway revenues and, to a lesser extent, improvements in satellite shipments. The increase in connectivity revenue of \$57.8 million was primarily driven by higher Wi-Fi and ethernet revenues as our supply improved and an increase in MoCA product shipments. The increase in infrastructure revenues of \$10.9 million was primarily driven by an increase in 5G wireless access and high-performance analog product shipments. The increase in industrial and multi-market revenue of \$23.8 million was related to increased shipments of component and high-performance analog product shipments.

We currently expect that revenue will fluctuate in the future, from period-to-period, based on evolving customer demand for existing products, the pace of adoption of newer products, and macroeconomic conditions. Further, due to heightened volatility and uncertainty in customer demand resulting from the COVID-19 pandemic, as well as uncertainty in supply from the global semiconductor chip shortage, we may experience increased volatility in our sales and revenues.

Cost of Net Revenue and Gross Profit

		Thre	ee Months	Ended Jun	e 30,						Six Mo	onths Ended	June 30,				
		2022			2021		S	Change	% Cha	nge	2022		2021		\$ Change	% Cha	ange
				(dollars	in thousands)							(dolla	rs in thousands)				
Cost of net revenue	s	115,658		\$	92,833		\$	22,825	25	%	\$ 224,995		190,473		34,522	18	%
% of net revenue		41	%		45	%					41	%	46	%			
Gross profit		164,351			112,543			51,808	46	%	318,941		224,262		94,679	42	%
% of net revenue		59	%		55	%					59	%	54	%			

Cost of net revenue increased \$22.8 million to \$115.7 million for the three months ended June 30, 2022, as compared to \$92.8 million for the three months ended June 30, 2021. The increase was primarily driven by higher sales and incremental expenses. Gross profit percentage improved for the three months ended June 30, 2022, as compared to the three months ended June 30, 2021, due primarily to revenue mix and improved absorption of amortization of intancible assets.

Cost of net revenue increased \$34.5 million to \$225.0 million for the six months ended June 30, 2022, as compared to \$190.5 million for the six months ended June 30, 2021. The increase was primarily driven by higher sales and incremental expenses. Gross profit percentage improved for the six months ended June 30, 2022, as compared to the six months ended June 30, 2021, due primarily to revenue mix and improved absorption of amortization of intangible assets.

We currently expect that gross profit percentage will fluctuate in the future, from period-to-period, based on changes in product mix, average selling prices, and average manufacturing costs. Further, due to heightened volatility and uncertainty in customer demand resulting from the COVID-19 pandemic and global semiconductor supply shortages, we may experience increased volatility in our cost of net revenues as a result.

Research and Development

	Thi	ee Month	s Ended Jui	1e 30,					Si	x Months	Ended June	30,					
	2022			2021		\$ Change	% C	hange	2022			2021		s	Change	% Cł	hange
			(dollars	in thousands)							(dollars	in thousands)					
Research and development	\$ 80,395		\$	74,416		\$ 5,979	8	%	\$ 146,281		\$	137,582		\$	8,699	6	%
% of net revenue	29	%		36	%				27	%		33	%				

Research and development expense increased \$6.0 million to \$80.4 million for the three months ended June 30, 2022 from \$74.4 million in the three months ended June 30, 2021. The increase was primarily driven by increased headcount.

Research and development expense increased \$8.7 million to \$146.3 million for the six months ended June 30, 2022 from \$137.6 million in the six months ended June 30, 2021. The increase was primarily driven by increased headcount.

We expect our research and development expenses to increase in future years as we continue to expand our product portfolio and enhance existing products.

Selling, General and Administrative

	Three Months Ended June 30,						Six Months Ended June 30,													
-		2022			2021	\$ Change		Change	% Ch	ange		2022			2021		s	Change	% C	hange
-	(dollars in thousands)									(dollars in thousands)										
Selling, general and administrative	\$	44,487		\$	35,885		\$	8,602	24	%	\$	85,064		\$	72,354		\$	12,710	18	%
% of net revenue		16	%		17	%						16	%		17	%				

Selling, general and administrative expense increased \$8.6 million to \$44.5 million for the three months ended June 30, 2022, as compared to \$35.9 million for the three months ended June 30, 2021. The increase was primarily due to merger costs of approximately \$6.4 million, as well as increased headcount.

Selling, general and administrative expense increased \$12.7 million to \$85.1 million for the six months ended June 30, 2022, as compared to \$72.4 million for the six months ended June 30, 2021. The increase was primarily due to increased headcount as well as increased acquisition and integration costs of \$4.8 million.

We expect selling, general and administrative expenses to increase in future years as we grow our sales and marketing organization to expand into existing and new markets.

#### Restructuring Charge

_	Three Months Ended June 30,						Six Months Ended June 30,										
	2022			2021		\$ (	Change	% Ch	ange		2022			2021		\$ Change	% Change
		(dollars in tho	ousands)									(dollars in th	ousands)				
Restructuring charges	\$ 462		\$	38		\$	424	1,116	%	\$	462		\$	2,204		\$(1,742)	(79)%
% of net revenue	_	%		_	%						_	%		1	%		

Restructuring charges increased \$0.4 million to \$0.5 million for the three months ended June 30, 2022, compared to \$0.04 million for the three months ended June 30, 2021. Restructuring charges in the three months ended June 30, 2022 primarily consisted of \$0.5 million of lease-related charges, which consisted of impairment of leased right-of-use assets from partial abandonment of a facility. Restructuring charges in the three months ended June 30, 2021 primarily consisted of \$0.02 million in employee severance-related charges.

Restructuring charges decreased \$1.7 million to \$0.5 million for the six months ended June 30, 2022, compared to \$2.2 million for the six months ended June 30, 2021. Restructuring charges in the six months ended June 30, 2022 primarily consisted of \$0.5 million of lease-related charges, which consisted of impairment of leased right-of-use assets from partial abandonment of a facility. Restructuring charges in the six months ended June 30, 2021 included \$1.3 million in employee severance-related charges and \$0.6 million of lease-related charges, which primarily consisted of impairment of leased right-of-use assets and leasehold improvements.

## Loss on Extinguishment of Debt

Loss on Extinguis	snment oj .	Dent																
		Th	ree Month	s Ended Ju	ne 30,							Si	ix Month:	s Ended June	30,			
_		2022			2021		S	Change	%	Change		2022			2021		\$ Change	% Change
				(dollar	s in thousands)									(dollars in	thousands)			
Loss on extinguishment of debt	\$	_		\$	(5,221)		\$	5,221	(100	)) (	%	\$ _		\$	(5,221)		\$5,221	(100)%
% of net revenue		_	%		(3)	%						_	%		(1)	%		

Loss on extinguishment of debt in the three and six months ended June 30, 2021 consists of the charge-off of remaining unamortized debt discount and issuance costs on debt under a prior term loan which we repaid early with proceeds from a new term loan in June 2021.

Interest and Other Income (Expense)

	Three Months E	nded June 30,		Six Months Ended June 30,								
	 2022	2021	\$ C	Change	% Change	2022		2	021	s	Change	% Change
	 (dollars in th	ousands)				(6	lollars i	n thousands)				
Interest and other income (expense), net	\$ 4,845 \$	(4,260)	\$	9,105	(214)%	\$ 1	,757	\$	(8,570)	\$	10,327	(121)%
% of net revenue	2 %	(2)%					%		(2)%			

Interest and other income (expense), net changed by \$9.1 million from a net expense of \$4.3 million in the three months ended June 30, 2021 to a net income of \$4.8 million for the three months ended June 30, 2022. The change in interest and other income (expense), net was primarily due to the impact of a \$7.7 million change in other income (expense), net, from expense of \$0.5 million in the 2021 period to income of \$7.2 million in the 2022 period, and a \$1.3 million decrease in interest expense.

The \$7.7 million change in other income (expense), net primarily related to \$4.8 million in unrealized holding gain on equity securities that are marked to market value on the balance sheet and \$2.7 million impact from foreign currency fluctuations. The \$1.3 million decrease in interest expense primarily relates to a decrease in interest expense on outstanding debt, mostly related to a lower average balance of term loan debt outstanding.

Interest and other income (expense), net changed by \$10.3 million from a net expense of \$8.6 million in the six months ended June 30, 2021 to a net income of \$1.8 million for the six months ended June 30, 2022. The change in interest and other income (expense), net was primarily due to the impact of a \$7.1 million decrease in other income (expense), net, from expense of \$0.6 million in the 2021 period to income of \$6.4 million in the 2022 period and a \$3.2 million decrease in interest expense.

The \$7.1 million change in other income (expense), net primarily related to \$3.9 million in net unrealized holding gain on equity securities that are marked to market value on the balance sheet and \$3.1 million impact from foreign currency fluctuations. The \$3.2 million decrease in interest expense primarily relates to a decrease in interest expense on outstanding debt, mostly related to a lower average balance of term loan debt outstanding.

Income Tax Provision (Benefit)

	Three Months Ended Ju	ne 30,			Six Months E	Ended June 30,		
	 2022	2021	\$ Change	% Change	2022	2021	\$ Change	% Change
	 (dollars in thousand	s)			(dollars in thousands)			
Income tax provision (benefit)	\$ 11,886 \$	(8,010) \$	19,896	(248)%	\$ 23,339	\$ (6,204)	\$ 29,543	(476)%

The income tax provision for the three months ended June 30, 2022 was \$11.9 million compared to an income tax benefit of \$8.0 million for the three months ended June 30, 2021.

The income tax provision for the six months ended June 30, 2022 was \$23.3 million compared to an income tax benefit of \$6.2 million for the six months ended June 30, 2021.

The difference between our effective tax rate and the 21.0% U.S. federal statutory rate for the six months ended June 30, 2022 primarily related to the mix of pre-tax income among jurisdictions, permanent tax items including a tax on global intangible low-taxed income, stock based compensation, excess tax benefits related to stock-based compensation, release of uncertain tax positions under ASC 740-10, and release of the valuation allowance on certain federal research and development credits. The permanent tax item related to global intangible low-taxed income also reflects recent legislative changes requiring the capitalization of research and experimentation costs, as well as limitations on the creditability of certain foreign income taxes.

The difference between our effective tax rate and the 21.0% U.S. federal statutory rate for the six months ended June 30, 2021 primarily related to the mix of pre-tax income among jurisdictions, permanent tax items including the tax on global intangible low-taxed income, stock based compensation, excess tax benefits related to stock-based compensation, and release of certain reserves for uncertain tax positions under ASC 740-10.

We continue to maintain a valuation allowance to offset state and certain federal and foreign deferred tax assets, as realization of such assets does not meet the more-likely-than-not threshold required under accounting guidelines. In making such determination, we consider all available positive and negative evidence quarterly, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies, and recent financial performance. Based upon our review of all positive and negative evidence, we continue to have a valuation allowance on state deferred tax assets, cartain federal deferred tax assets, and certain foreign deferred tax assets in jurisdictions where we have cumulative losses or otherwise are not expected to utilize certain tax attributes. We do not incur income tax expense or benefit in certain tax-free jurisdictions in which we operate.

Our subsidiary in Singapore operates under certain tax incentives in Singapore, which are effective through March 2027. Under these incentives, qualifying income derived from certain sales of our integrated circuits is taxed at a concessionary rate over the incentive period. We also receive a reduced withholding tax rate on certain intercompany royalty payments made by our Singapore subsidiary during the incentive period. We recorded a tax provision in the six months ended June 30, 2022 at the incentive rate. In the six months ended June 30, 2021, due to our Singapore net operating losses and a full valuation allowance in Singapore, the incentives did not have a material impact on our income tax provision. The incentives are conditional upon our meeting certain minimum employment and investment thresholds within Singapore over time, and we may be required to return certain tax benefits in the event we do not achieve compliance related to that incentive period. We currently believe that we will be able to satisfy these conditions without material risk.

### Liquidity and Capital Resources

As of June 30, 2022, we had cash and cash equivalents of \$211.4 million, restricted cash of \$1.1 million and net accounts receivable of \$137.1 million. Additionally, as of June 30, 2022, our working capital was \$222.5 million.

Our primary uses of cash are to fund operating expenses and purchases of inventory, property and equipment, and from time to time, the acquisition of businesses. In May 2022, we entered into the Merger Agreement to acquire Silicon Motion. As described in Note 3 to our unaudited consolidated financial statements, the implied value of the total transaction consideration for Silicon Motion is approximately \$4.3 billion. MaxLinear may fund up to \$3.5 billion of cash consideration with cash on hand and fully committed debt financing from Wells Fargo Bank and other lenders. In June 2022, we entered into a memded and restated commitment letter with Wells Fargo Bank and other lenders pursuant to which, subject to the terms and conditions set forth therein, the lenders have committed to provide (i) a senior secured term B loan facility in an aggregate principal amount of up to \$2.7375 billion (ii) a senior secured term A loan facility in an aggregate principal amount of up to \$512.5 million and (iii) a senior secured revolving credit facility in an aggregate principal amount of up to \$520.0 million. Funding of the Senior Secured Credit Facilities is contingent on customary conditions, including, but not limited to the consummation of the merger and execution of definitive loan agreements. A portion of the proceeds from the Senior Secured Credit Facilities will be used to repay our existing debt in full.

We also use cash to pay down outstanding debt, repurchase our common stock under our stock repurchase plan, and from time to time, make investments. As of June 30, 2022, \$250.0 million of principal was outstanding under a senior secured term B loan facility or the "Initial Term Loan under the June 23, 2021 Credit Agreement." The Company also has available a senior secured revolving credit facility, in an aggregate principal amount of up to \$100.0 million which remained undrawn as of June 30, 2022. The proceeds of the revolving facility may be used to finance the working capital needs and other general corporate purposes of the Company and its subsidiaries.

Commencing on September 30, 2021, the Initial Term Loan under the June 23, 2021 Credit Agreement has amortized in equal quarterly installments equal to 0.25% of the original principal amount of the Initial Term Loan under the June 23, 2021 Credit Agreement, with the balance payable on June 23, 2028.

Heightened volatility, global semiconductor supply shortages, and uncertainty in customer demand and the worldwide economy in general continues to impact business and financial markets as a result of the COVID-19 pandemic and may be further exacerbated by the impacts of high inflation, and we may experience decreased sales and revenues in the near future. A material adverse impact from COVID-19 and the global semiconductor supply shortage could result in a need to raise additional carditional indebtedness to fund strategic initiatives or operating activities, particularly if we pursue additional acquisitions. Our future capital requirements will depend on many factors, including changes in revenue, the expansion of our engineering, sales and marketing activities, the timing and extent of our expansion into new territories, the timing of introductions of new products and enhancements to existing products, the continuing market acceptance of our products, our pending merger with Silicon Motion, and any other potential material investments in, or acquisitions of, complementary businesses, services or technologies. Additional funds may not be available on terms favorable to us or at all. If we are unable to raise additional funds when needed, we may not be able to sustain our operations or execute our strategic plans.

Our cash and cash equivalents are impacted by the timing of when we pay expenses as reflected in the change in our outstanding accounts payable and accrued expenses. Cash used to fund operating expenses in our consolidated statements of cash flows excludes the impact of non-cash items such as amortization and depreciation of acquired intangible assets and leased right-of-use assets and property and equipment, stock-based compensation, impairment of leased right-of-use assets and related leasehold improvements and unrealized holding gains or losses on marketable equity securities. Cash used to fund capital purchases and acquisitions of businesses and investments are included in investing activities in our consolidated statements of cash flows. Cash proceeds from issuance of common stock and debt and cash used to pay down outstanding debt or repurchase common stock are included in financing activities in our consolidated statements of cash flows.

As of June 30, 2022, our material cash requirements include long-term debt, non-cancelable operating leases, inventory purchase obligations and other obligations, which primarily consist of contractual payments due for computer-aided design software, as follows:

				Pa	yments due			
	Total	Les	s than 1 year		1-3 years	 3-5 years	Moi	re than 5 years
				(in	thousands)			<u>.</u>
Long-term debt obligations	\$ 250,000	\$	_	\$	_	\$ _	\$	250,000
Operating lease obligations	41,960		5,834		19,609	12,463		4,054
Inventory purchase obligations	208,446		195,849		12,597	_		_
Other obligations	29,122		12,624		16,389	109		_
Total	\$ 529,528	\$	214,307	\$	48,595	\$ 12,572	\$	254,054

Our planned capital expenditures as of June 30, 2022 were not material. Our consolidated balance sheet at June 30, 2022 included \$9.4 million in other long-term liabilities for uncertain tax positions, some of which may result in cash payment. The future payments related to uncertain tax positions recorded as other long-term liabilities have not been presented in the table above due to the uncertainty of the amounts and timing of cash settlement with the taxing authorities.

Our primary sources of cash are cash receipts on accounts receivable from our shipment of products to distributors and direct customers. Aside from the amounts billed to our customers, net cash collections of accounts receivable are impacted by the efficiency of our cash collections process, which can vary from period to period depending on the payment cycles of our major distributor customers, and relative linearity of shipments period-to-period. The June 23, 2021 Credit Agreement, under which we entered into a senior secured term B loan facility and a revolving credit facility, permits us to request incremental loans in an aggregate principal amount not to exceed the sum of an amount equal to the greater of (x) \$175.0 million and (y) 100% of "Consolidated EBITDA" (as defined in such agreement), plus the amount of certain voluntary prepayments, plus an unlimited amount that is subject to pro forma compliance with certain first lien net leverage ratio, secured net leverage ratio and total net leverage ratio tests.

Following is a summary of our working capital, cash and cash equivalents, and restricted cash for the periods indicated:

	June 30, 2022			December 31, 2021
		(in	thousands)	
Working capital	\$	222,543	\$	196,709
Cash and cash equivalents	\$	211,363	\$	130,572
Short-term restricted cash		162		105
Long-term restricted cash		894		1,061
Total cash, cash equivalents, and restricted cash	\$	212,419	\$	131,738

Following is a summary of our cash flows provided by (used in) operating activities, investing activities and financing activities for the periods indicated:

ronowing is a summary of our cash flows provided by (used in) operating activities, investing activities and financing activities for the periods i	naicatea.			
		Six Months	Ended June 30,	
		2022		2021
		(in t	housands)	
Net cash provided by operating activities	\$	257,603	\$	68,123
Net cash used in investing activities		(59,035)		(50,922)
Net cash used in financing activities		(116,525)		(35,088)
Effect of exchange rate changes on cash, cash equivalents and restricted cash		(1,362)		(713)
Increase (decrease) in cash, cash equivalents and restricted cash	\$	80,681	\$	(18,600)

Cash Flows from Operating Activities

Net cash provided by operating activities was \$257.6 million, non-cash items of \$76.5 million, and changes in operating assets and liabilities of \$117.6 million, partially offset by excess tax benefits and deferred income taxes totaling \$2.1 million. Non-cash items included in net income for the six months ended June 30, 2022 primarily consisted of depreciation and amortization of property, equipment, acquired intangible assets and leased right-of-use assets of \$43.4 million and stock-based compensation of \$38.0 million, partially offset by \$3.9 million in unrealized holding gain on investments that are marked to market on the balance sheet.

Net cash provided by operating activities was \$68.1 million for the six months ended June 30, 2021. Net cash provided by operating activities consisted of the positive impact of net income of \$4.5 million and non-cash items of \$80.0 million, partially offset by the negative impact of deferred income taxes and excess tax benefits totaling \$10.1 million and changes in operating assets and liabilities of \$6.3 million. Non-cash items included in net income for the six months ended June 30, 2021 primarily consisted of depreciation and amortization of property, equipment, acquired intangible assets and leased right-of-use assets of \$44.3 million and stock-based compensation of \$26.9 million, loss on extinguishment of debt of \$5.2 million and amortization of issuance costs and discounts on debt and leases of \$2.1 million.

Cash Flows from Investing Activities

Net cash used in investing activities was \$59.0 million for the six months ended June 30, 2022 and consisted of purchases of investments of \$28.3 million, purchases of property and equipment of \$15.5 million, proceeds loaned under notes receivable of \$10.0 million, and purchases of intangible assets of \$5.2 million.

Net cash used in investing activities was \$50.9 million for the six months ended June 30, 2021 and consisted of payments of purchase price that were previously deferred from our 2020 acquisition of NanoSemi of \$27.5 million, purchases of property and equipment of \$17.3 million, purchases of investments of \$5.0 million, and purchases of intangible assets of \$1.1 million.

Cash Flows from Financing Activities

Net cash used in financing activities was \$116.5 million for the six months ended June 30, 2022. Net cash used in financing activities consisted primarily of repayments of debt of \$60.0 million, common stock repurchases of \$31.5 million, and minimum tax withholding paid on behalf of employees for restricted stock units of \$28.1 million, partially offset by \$3.1 million in net proceeds from issuance of our common stock upon exercise of stock options and numbers made under our ESPP

Net cash used in financing activities was \$35.1 million for the six months ended June 30, 2021. Net cash used in financing activities consisted primarily of repayments of debt of \$369.8 million, minimum tax withholding paid on behalf of employees for restricted stock units of \$10.1 million, common stock repurchases of \$7.1 million, and debt issuance costs of \$4.1 million, partially offset by cash inflows from net proceeds from the issuance of debt of \$350.0 million and from net proceeds from issuance of common stock upon exercise of stock options and purchases made under our ESPP of \$6.1 million.

We believe that our \$211.4 million of cash and cash equivalents at June 30, 2022 will be sufficient to fund our projected operating requirements for at least the next twelve months, excluding the pending merger and related integration costs. As of June 30, 2022, our indebtedness totaled \$250.0 million, which consists of outstanding principal under the Initial Term Loan under the June 23, 2021 Credit Agreement. Upon consumnation of our merger with Silicon Motion and execution of related merger financing agreements, we expect that a portion of the proceeds from the Senior Secured Credit Facilities associated with the merger, described in more detail above, will be used to repay our existing indebtedness in full, and our indebtedness may increase up to \$3.5 billion under the Senior Secured Credit Facilities. The June 23, 2021 Credit Agreement also provides the Company with the Revolving Facility in an aggregate principal amount of up to \$100.0 million, which remained undrawn as of June 30, 2022. The Initial Term Loan under the June 23, 2021 Credit Agreement has a seven-year term expiring in June 2028 and bears interest, at the Company's option, at a per annum rate equal to either (i) a base rate equal to the highest of (i) the federal funds rate, plus 0.50%, (y) the primer rate then in effect and (z) an adjusted LIBOR rate (as calculated above) plus an applicable margin of 1.05% or (ii) an adjusted LIBOR rate (as calculated above) plus an applicable margin of 1.05%, or (ii) an adjusted LIBOR rate (as calculated above) plus an applicable margin of 1.00%. Following delivery of financial statements for the Company's fiscal quarter ending June 30, 2021, the applicable margin for loans under the Revolving Facility will range from 0.00% to 1.75% in the case of base rate loans and 1.00% for 1.75% in the case of LIBOR rate loans, in each case, depending on the Company's secured net leverage ratio as of the most recently ended fiscal quarter. Commencing on September 30, 2021, the Initial Term Loan under the June 23, 2021 C

Our cash and cash equivalents in recent years have been favorably affected by our implementation of an equity-based bonus program for our employees, including executives. In connection with that bonus program, in February 2022, we issued 0.5 million freely-tradable shares of our common stock in settlement of bonus awards for the 2021 performance period. We expect to implement a similar equity-based plan for fiscal 2022, but our compensation committee retains discretion to effect payment in cash, stock, or a combination of cash and stock.

# ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk represents the risk of loss that may impact our financial position due to adverse changes in financial market prices and rates. Our market risk exposure is primarily a result of fluctuations in foreign currency exchange rates and interest rates.

## Foreign Currency Risk

To date, our international customer and vendor agreements have been denominated mostly in United States dollars. Accordingly, we have limited exposure to foreign currency exchange rates and do not enter into foreign currency hedging transactions. The functional currency of certain foreign subsidiaries is the local currency. Accordingly, the effects of exchange rate fluctuations on the net assets of these foreign subsidiaries' operations are accounted for as translation gains or losses in accumulated other comprehensive income within stockholders' equity. A hypothetical change of 100 basis points in such foreign currency exchange rates during the six months ended June 30, 2022 would result in a change to translation gain in accumulated other comprehensive income of approximately \$0.9 million.

#### Interest Rate Risk

We are subject to a variable amount of interest on the principal balance of our credit agreements described above and could be adversely impacted by rising interest rates in the future. If LIBOR interest rates had increased by 10% during the periods presented, the rate increase would have resulted in an immaterial increase to interest expense.

## ITEM 4. CONTROLS AND PROCEDURES

#### Evaluation of Disclosure and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our periodic reports filed with the SEC is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and no evaluation of controls and procedures can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected. Management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As required by Rule 13a-15(b) of the Securities Exchange Act of 1934, as amended, or the Exchange Act, prior to filing this Quarterly Report, we carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act) as of the end of the period covered by this Quarterly Report. Based on their evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this Quarterly Report.

# Changes in Internal Control over Financial Reporting

An evaluation was performed under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, to determine whether any change in our internal control over financial reporting occurred during the fiscal quarter ended June 30, 2022 that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Rule 13a-15 or Rule 15d-15 of the Securities Exchange Act of 1934, as amended, that occurred during the fiscal quarter ended June 30, 2022 that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

## PART II — OTHER INFORMATION

# ITEM 1. LEGAL PROCEEDINGS

From time to time, we are subject to threats of litigation or actual litigation in the ordinary course of business, some of which may be material. We are not currently a party to any pending legal proceedings that, if determined adversely to us, would, in our opinion, have a material effect on our financial position, results of operations, or cash flows or that would not be covered by our existing liability insurance. The results of any litigation cannot be predicted with certainty, and regardless of the outcome, litigation can have an adverse impact on us because of defense and settlement costs, diversion of management resources and other factors.

#### ITEM 1A. RISK FACTORS

This Quarterly Report on Form 10-Q, or Form 10-Q, including any information that may be incorporated by reference herein, contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, referred to as the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, referred to as the Exchange Act. In some cases, you can identify forward-looking statements by terms such as "may," "will," "should," "expect," "plan," "intend," "forecast," "anticipate," "believe," "estimate," "predict," "predict," "potential," "continue" or the negative of these terms or other comparable terminology. The forward-looking statements contained in this Form 10-Q involve known and unknown risks, uncertainties and situations that may cause our or our industry's actual results, level of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these statements. These factors include those listed below in this Item IA and those discussed elsewhere in this Form 10-Q. We encourage investors to review these factors carefully. We may from time to time make additional written and oral forward-looking statements, including statements contained in our filings with the SEC. However, we do not undertake to update any forwardlooking statement that may be made from time to time by or on behalf of us, whether as a result of new information, future events, or otherwise, except as required by law.

Before you invest in our securities, you should be aware that our business faces numerous financial and market risks, including those described below, as well as general economic and business risks. The following discussion provides information concerning the material risks and uncertainties that we have identified and believe may adversely affect our business, our financial condition and our results of operations. Before you decide whether to invest in our securities, you should carefully consider these risk factors together with all of the other information included in this Quarterly Report on Form 10-Q, and in our other public filings, which could materially affect our business, financial condition or future results. Our risk factors are not guarantees that no such conditions exist as of the date of this report and should not be interpreted as an affirmative statement that such risks or conditions have not materialized, in whole or in part.

For the risks relating to our pending merger with Silicon Motion, please refer to the section of these risk factors captioned "Risks Relating to the Proposed Merger with Silicon Motion."

#### Risk Factor Summary

## Risks Relating to the Proposed Merger with Silicon Motion

- If the merger is completed, our actual financial and operating results could differ materially from any expectations or guidance, including with respect to any cost savings and other potential synergies.
- Failure to integrate Silicon Motion with our business successfully in the expected time-frame may adversely affect our results and financial condition if the merger is completed. Our business relationships may be subject to disruption due to uncertainty associated with the merger.

- Our obsiness retainonishings may be subject to distribution due to internating associated with the integer.

  We and Silicon Motion may have difficulty motivating and retaining executives and other key personnel in light of the pending merger.

  The merger agreement contains provisions that could require us to pay Silicon Motion a termination fee of \$160 million under certain circumstances.

  If the proposed merger is not completed, we will have incurred substantial costs.

  Our ability to complete the merger is subject to various closing conditions, including approval of Silicon Motion's shareholders and certain required regulatory approvals, which may contain burdensome conditions, that could have an adverse effect on our operation of the business following the merger.

- As a result of the transaction, we will materially increase our secured term loan indebtedness which adversely affects our operating results and cash-flows and our new loan agreements will likely contain covenants that could adversely affect our operational freedom and ability to pursue strategic transactions.
- We may not have sufficient cash flow from our business to pay our substantial indebtedness
- Additional shareholder lawsuits could be filed in the future challenging the merger, which may delay or prevent the consummation of the merger, cause us and/or Silicon Motion to incur substantial defense or settlement costs, or otherwise adversely affect us or Silicon Motion.
- The fact that there is a merger pending could materially harm us or Silicon Motion and our results of operations. Counterparties of Silicon Motion may acquire certain rights which could negatively affect us following the merger.
- If the merger is consummated, the issuance of shares of our common stock to Silicon Motion securityholders will reduce the percentage interests of our stockholders. After completion of the merger, we will be exposed to intensified risks associated with doing business in Taiwan because of tense regional geopolitical risk with China
- The COVID-19 pandemic may delay or prevent the completion of the merger.
- We expect to incur substantial expenses related to the merger of MaxLinear and Silicon Motion.

  We will record goodwill that could become impaired and adversely affect our future operating result:
- The market value of our common stock could decline if large amounts of our common stock are sold following the merger.

- We face intense and increasing competition, which could have an adverse effect on our revenue, revenue growth rate and market share.
- Impacts of the global semiconductor supply shortage and high inflation could adversely affect our business, financial condition, and results of operations.
- Our business, financial condition and results of operations could be adversely affected by geopolitical conflicts and economic conditions and other factors related to our international operations. The loss of, or a significant reduction in orders from our major customers that comprise a substantial portion of our revenue could have a material adverse effect on our revenue and operating results.
- Average selling prices of our products could decrease rapidly.
- If we fail to penetrate new applications and markets, our revenue, revenue growth rate, if any, and financial condition could be materially and adversely affected.

  Development delays and consolidation trends among cable and satellite Pay-TV and broadband operators could adversely affect our future revenues and operating results.
- We may be unable to make the substantial and productive research and development investments that are required to remain competitive in our business.

  A significant variance in our operating results or rates of growth, if any, could lead to substantial volatility in our stock price. We may not sustain our current growth rate and/or manage future growth effectively.
- The complexity of our products could result in unforeseen delays or expenses caused by undetected defects or bugs, which could reduce the market acceptance of our new products, damage our reputation and adversely affect our operating costs.
- If we are unable to attract and retain qualified design and technical personnel, we may not be able to effectively execute our strategy.
- Failure to timely develop and introduce new or enhanced products could impair our ability to attract and retain customers and harm our competitive position.

  Differences between our estimates of customer demand and product mix and our actual results could negatively affect our inventory levels, sales and operating results.
- We may have difficulty accurately predicting our future revenue and appropriately budgeting our expenses particularly in new markets. Our business would be adversely affected by the departure of existing members of our senior management team.

- Our customers require our products and our third-party contractors to undergo a lengthy and expensive qualification process which does not assure product sales.

  We incur significant expenditures to win business and customers may decide to cancel or change their product plans, which could cause us to generate no revenue from a product and adversely affect our results of operations.

  Our operating results are subject to substantial quarterly and annual fluctuations that could adversely affect our business and our stock price.
- We are subject to the cyclical nature of the semiconductor industry.

- If we fail to maintain compliance with various governmental regulations, we may be forced to recall products and cease their manufacture and distribution, and we could be subject to civil or criminal penalties.

  We have incurred material secured term loan indebtedness which adversely affects our operating results and cash-flows and contains covenants that could adversely affect our operational freedom and ability to pursue strategic
- We may still incur substantially more debt or take other actions, which would intensify the risks.

# Risks Relating to Intellectual Property

- We may face future claims of intellectual property infringement, which could be time-consuming, costly to defend or settle and result in the loss of significant rights. If we are unable to protect our significant amount of intellectual property, our business could be adversely affected.
- We have been and may be subject to future information technology failures, including data protection breaches and cyber-attacks, that could disrupt our operations, damage our reputation and adversely affect our business, operations, and financial results.

# Risks Relating to Reliance on Third Parties

- Failure to manage our third-party relationships successfully, or mitigate negative impacts from using third parties, could adversely affect our ability to market and sell our products. Should any of our distributors cease or be forced to stop distributing our products, our business would suffer.
- We do not have any long-term supply contracts, and any disruption in our supply of products or materials could have a material adverse effect on our business, revenue and operating results. Any failure of third parties to provide services and technology necessary for the operation of our business could have a material adverse effect on our business.

- Our management team may use our available cash and cash equivalents in ways with which you may not agree or in ways which may not yield a return.

  Anti-takeover provisions in our charter documents and under Delaware law could make an acquisition of us more difficult, limit attempts by our stockholders to replace or remove our current management and limit the market
- price of our common stock.

  Our share price may be volatile as a result of various factors.

# Risks Relating to our Proposed Merger with Silicon Motio

If the merger is completed, our actual financial and operating results could differ materially from any expectations or guidance provided by us concerning future results, including (without limitation) expectations or guidance with respect to the financial impact of any cost savings and other potential synergies.

We currently expect to realize material synergies as a result of our proposed merger with Silicon Motion, and as a result, we currently believe that the merger will, in aggregate, be accretive to our free cash-flow and non-GAAP earnings per share, excluding upfront non-recurring charges, transaction related expenses, the amortization of purchased intangible assets, and inventory and property and equipment fair value adjustments. The expectations and guidance we have provided with respect to the potential financial impact of the merger are subject to numerous assumptions, however, including assumptions derived from our diligence efforts concerning the status of and prospects for Silicon Motion's business, which we do not currently control, and assumptions relating to the near-term prospects for the semiconductor industry generally and the markets for Silicon Motion's products in particular. Additional assumptions we have made relate to numerous matters, including (without limitation) the following:

- · projections of Silicon Motion's future revenues;
- · the anticipated financial performance of Silicon Motion's products and products currently in development;
- anticipated cost savings and other synergies associated with the merger, including potential revenue synergies;
- our capital structure after the merger:
- the amount of goodwill and intangibles that will result from the merger;

- · certain other purchase accounting adjustments that we expect to record in our financial statements in connection with the merger;
- · merger costs, including restructuring charges and transaction costs payable to our financial, legal, and accounting advisors;
- · our ability to maintain, develop, and deepen relationships with customers of Silicon Motion; and
- other financial and strategic risks of the merger, including the possible impact of reduced liquidity of MaxLinear resulting from deal-related cash outlays, the credit risk associated from the potential debt facility described below, and continued uncertainty arising from the COVID-19 pandemic.

We cannot provide any assurances with respect to the accuracy of our assumptions, including our assumptions with respect to future revenues or revenue growth rates, if any, of Silicon Motion, and we cannot provide assurances with respect to our ability to realize the cost savings that we currently anticipate. Risks and uncertainties that could cause our actual results to differ materially from currently anticipated results include, but are not limited to, risks relating to our ability to integrate Silicon Motion successfully; currently unanticipated incremental costs that we may incur in connection with integrating the two companies; risks relating to our ability to realize incremental revenues from the merger in the amounts that we currently anticipate; risks relating to the willingness of Silicon Motion's customers and other partners to continue to conduct business with MaxLinear; and numerous risks and uncertainties that affect the semiconductor industry generally and the markets for our products and those of Silicon Motion specifically. We believe the continuing pandemic enhances certain of these risks and presents additional uncertainty in our ability to achieve the financial and strategic objectives of the merger. Any failure to integrate Silicon Motion successfully and to realize the financial benefits we currently anticipate from the merger would have a material adverse impact on our future operating results and financial condition and could materially and adversely affect the trading price or trading volume of our common stock.

Failure to integrate our business and operations successfully with those of Silicon Motion in the expected time-frame or otherwise may adversely affect our operating results and financial condition if the merger is completed.

The success of the proposed merger with Silicon Motion will depend, in substantial part, on our ability to integrate Silicon Motion's business and operations successfully with those of MaxLinear and to realize fully the anticipated benefits and potential synergies from combining our companies, including, among others, currently expected cost savings from duplicative functions; potential operational efficiencies in our respective supply chains and in research and development investments; and potential revenue growth resulting from the addition of Silicon Motion's product portfolio. Historically, we and Silicon Motion have been independent companies, and we will continue to operate as such until the consummation of the merger. We expect that the integration will be complex and time consuming and will require substantial management time and attention, which may divert attention and resources from other important areas, including our existing businesses. We may face significant challenges in consolidating our operations with Silicon Motion, integrating the two companies' technologies, and addressing the different corporate cultures of the two companies. Additional unanticipated costs may be incurred in the course of integrating our respective businesses. If the companies are not successfully integrated, the anticipated benefits of the merger may not be realized fully or at all or may take longer to realize than expected. In such a case, we would expect our operating results and financial condition to be materially and adversely affected, which could also have a material and adverse effect on the trading price or trading volume of our common stock.

Our business relationships, including customer relationships, and those of Silicon Motion may be subject to disruption due to uncertainty associated with the merger

In response to the announcement of the merger, customers, vendors, licensors, and other third parties with whom we or Silicon Motion do business or otherwise have relationships may experience uncertainty associated with the merger, and this uncertainty could materially affect their decisions with respect to existing or future business relationships with MaxLinear or Silicon Motion while the merger is pending or with MaxLinear after the merger is consummated. As a result, we are in many instances unable to evaluate the impact of the merger on certain assumed contract rights and obligations, including intellectual property rights.

These business relationships may be subject to disruption as customers and others may elect to delay or defer purchase or design-win decisions or switch to other suppliers due to the uncertainty about the direction of our offerings, any perceived unwillingness on our part to support existing Silicon Motion products after the merger is consummated, or any general perceptions by customers or other third parties that impute operational or business challenges to us arising from the merger. In addition, customers or other third parties may attempt to negotiate changes in existing business relationships, which may result

in additional obligations imposed on us. These disruptions could have a material adverse effect on our business, operating results, and financial condition while the merger is pending or after it is consummated. The adverse effect of any such disruptions could be exacerbated by a delay in the consummation of the merger for any reason, including delays associated with obtaining regulatory approvals, or termination of the merger agreement. Any loss of customers, customer products, design win opportunities, or other important strategic relationships could have a material adverse effect on our business, operating results, and financial condition and could have a material and adverse effect on the trading price or trading volume of our common stock.

We and Silicon Motion may have difficulty motivating and retaining executives and other key personnel in light of the pending merger

Uncertainty about the effect of the merger on our employees and those of Silicon Motion may have an adverse effect on MaxLinear or Silicon Motion while the merger is pending or on MaxLinear after the merger is consummated. This uncertainty may impair our or Silicon Motion's ability to retain and motivate key personnel in the months leading up to the consummation of the merger and our ability to retain and motivate them following the merger. Employee retention may be particularly challenging as our and Silicon Motion's employees may experience frustrations during the integration process and uncertainty about their future roles with us following consummation of the merger. For the merger to be successful, we and Silicon Motion must continue to retain and motivate executives and other key employees during the period before the merger is completed. Furthermore, after the merger is consummated, MaxLinear must be successful at retaining and motivating key employees in order for the benefits of the transaction to be fully realized. If key employees depart, we may incur significant costs in identifying, hiring, and retaining replacements, which could substantially reduce or delay our ability to realize the merger, which could have a material adverse effect on our business, operating results, and financial condition.

The merger agreement with Silicon Motion contains provisions that could require us to pay Silicon Motion a termination fee of \$160 million under certain circumstances.

The consummation of the merger is subject to certain customary closing conditions such as regulatory approval in China. Under certain circumstances, we could be required to pay Silicon Motion as termination fee if the merger agreement is terminated by MaxLinear or Silicon Motion as a result of a court or other competent authority issuing an order pursuant to regulatory law permanently prohibiting the consummation of the merger, or merger is not consummated by February 6, 2023, or the Outside Date. The Outside Date will be automatically extended to May 5, 2023 and further to August 7, 2023, if all conditions to closing have been met, other than certain exceptions related to regulatory matters. However, in certain circumstances, the right to terminate the merger agreement would not be available to a party in material breach of the merger agreement.

If the proposed merger is not completed, we will have incurred substantial costs that may adversely affect our operating results and financial condition as well as the market price of our common stock.

If the merger is not consummated, the price of our common stock may decline to the extent that such market price reflects a market assumption that the merger will be completed. In addition, we have incurred and will incur substantial costs in connection with the proposed merger. These costs are primarily associated with the fees of our financial advisors, accountants, lenders, and legal counsel and, with limited exceptions relating to a portion of our financial advisor fees, will be payable regardless of whether the merger is completed. In addition, we have diverted significant management resources in an effort to complete the merger and are subject to restrictions contained in the merger agreement on the conduct of our business during the pendency of the merger is not completed, we will have received little or no benefit in respect of such costs incurred. If the merger is not completed under certain circumstances specified in the merger agreement, we may be required to pay a termination fee to Silicon Motion of \$160 million, as described above. Furthermore, if the merger is not consummated, we may experience negative reactions from the financial markets and our suppliers, customers, customer prospects, and employees. Any of these factors could have an adverse effect on our business, operating results, and financial condition or on the trading price of our common stock.

Our ability to complete the merger is subject to various closing conditions, including approval of Silicon Motion's shareholders and certain required regulatory approvals, which may contain burdensome conditions, that could have an adverse effect on our operation of the business following the merger.

To complete the merger, Silicon Motion's shareholders must approve the merger pursuant to the terms of the merger agreement by not less than two-thirds of the votes cast by Silicon Motion shareholders present and voting at Silicon Motion's extraordinary general meeting. In addition, completion of the merger is subject to the satisfaction of the remaining customary

closing conditions, including receipt of clearance from the People's Republic of China State Administration for Market Regulation, among other things. Even if these approvals are obtained, governmental authorities could impose conditions on the completion of the merger that could delay consummation of the acquisition or have an adverse effect on our business following the acquisition.

If we are unable to complete the merger, we would be subject to a number of risks, including the following:

- · we would not realize the anticipated benefits of the acquisition, including, among other things, increased operating efficiencies;
- · the attention of our management may have been diverted to the merger rather than to our own operations and the pursuit of other opportunities that could have been beneficial to us;
- · the potential loss of key personnel during the pendency of the merger as employees and other service providers may experience uncertainty about their future roles with us following completion of the merger; and
- · the trading price of our common stock may decline to the extent that the current market prices reflect a market assumption that the merger will be completed.

We can provide no assurance that the various closing conditions will be satisfied, that the necessary regulatory approvals will be obtained, or that any required conditions will not materially adversely affect our business following the merger. If we are required to undertake divestitures or to commit to certain behavioral remedies in order to obtain any approvals required to complete the acquisition, we may be less able to realize anticipated benefits of the acquisition, and our business, operating results, and financial condition after the merger may be adversely affected. In addition, we can provide no assurance that these conditions will not result in the abandonment or delay of the merger. The occurrence of any of these events individually or in combination could have a material adverse effect on our business, financial condition, and results of operations and on the trading price of our common stock.

In order to consummate the merger and distribute the cash consideration payable to Silicon Motion securityholders, we will incur material indebtedness of up to \$3.5 billion and we may also use a portion of Silicon Motion's and our cash resources. This material increase in our indebtedness will adversely affect our operating results and cash-flows as we satisfy our underlying interest and principal payment obligations. The loan agreement is also expected to contain financial and operational covenants that would adversely affect our operational freedom or ability to pursue strategic transactions that we would otherwise consider to be in the best interests of stockholders, including obtaining additional indebtedness to finance such transactions.

As previously disclosed, MaxLinear will finance the merger in part with the Senior Secured Credit Facilities, which will provide funding of up to \$3.5 billion. A portion of the proceeds from the Senior Secured Credit Facilities will be used to repay existing debt in full. As of June 30, 2022, our aggregate indebtedness was \$250.0 million.

The material increase in our indebtedness to up to \$3.5 billion will adversely affect our operating expenses through materially increased interest payment obligations and will adversely affect our ability to use cash generated from operations as we repay interest and principal under the term loans and revolving credit facility, as applicable. In addition, the loan agreements will likely contain financial and operational covenants that may adversely affect our ability to engage in certain activities, including certain financing and acquisition transactions, stock repurchases, guarantees, and similar transactions, without obtaining the consent of the lenders, which may or may not be forthcoming. Accordingly, outstanding indebtedness could adversely affect our operational freedom or ability to pursue strategic transactions that we would otherwise consider to be in the best interests of stockholders.

Specifically, our materially increased indebtedness could have important consequences to investors in our common stock, including the following:

- we could be subject to substantial variable interest rate risk because our interest rate under term loans typically vary based on a fixed margin over an indexed rate or an adjusted base rate. If interest rates were to increase substantially, it would adversely affect our operating results and could affect our ability to service the indebtedness;
- · our ability to obtain any necessary financing in the future for working capital, capital expenditures, debt service requirements, or other purposes may be limited or financing may be unavailable;

- · a substantial portion of our cash flows must be dedicated to the payment of principal and interest on our indebtedness and other obligations and will not be available for use in our business;
- · our level of indebtedness could limit our flexibility in planning for, or reacting to, changes in our business and the markets in which we operate; and
- our high degree of indebtedness will make us more vulnerable to changes in general economic conditions and/or a downturn in our business, thereby making it more difficult for us to satisfy our obligations.

If we fail to make required debt payments, or if we fail to comply with other covenants in our debt service agreements, we would be in default under the terms of these agreements. Subject to customary cure rights, any default would permit the holders of the indebtedness to accelerate repayment of this debt and could cause defaults under other indebtedness that we have, any of which could have a material adverse effect on the trading price of our common could be accelerated by the could have a material adverse effect on the trading price of our common could be accelerated by the could have a material adverse effect on the trading price of our common could be accelerated by the could have a material adverse effect on the trading price of our common could be accelerated by the could have a material adverse effect on the trading price of our common could be accelerated by the could have a material adverse effect on the trading price of our common could be accelerated by the could have a material adverse effect on the trading price of our common could be accelerated by the could have a material adverse effect on the trading price of our common could be accelerated by the could have a material adverse effect on the trading price of our common could be accelerated by the could have a material adverse effect on the trading price of our common could be accelerated by the could be accelera

Servicing our indebtedness will require a significant amount of cash, and we may not have sufficient cash flow from our business to pay our substantial indebtedness.

Under the Senior Secured Credit Facilities, we may incur up to \$3.5 billion in aggregate principal amount of senior indebtedness. Our substantial indebtedness may increase our vulnerability to any generally adverse economic and industry conditions.

Our ability to make scheduled payments of the principal and interest when due, or to refinance our borrowings under the Senior Secured Credit Facilities, will depend on our future performance, which is subject to economic, financial, competitive and other factors beyond our control. Our business may not continue to generate cash flow from operations in the future sufficient to satisfy our obligations under our indebtedness, and any future indebtedness we may incur and to make necessary capital expenditures. If we are unable to generate such cash flow, we may be required to adopt one or more alternatives, such as reducing or delaying investments or capital expenditures, selling assets, refinancing or obtaining additional equity capital on terms that may be onerous or highly dilutive. Our ability to refinance the term loans or existing or future indebtedness will depend on the capital markets and our financial condition at such time. We may not be able to engage in any of these activities or engage in these activities or desirable terms, which could result in a default on the Senior Secured Credit Facilities or future indebtedness.

Stockholders of MaxLinear or Silicon Motion securityholders could file additional lawsuits in the future challenging the merger, which may delay or prevent the consummation of the merger and cause us and/or Silicon Motion to incur substantial defense or settlement costs, or otherwise adversely affect us or Silicon Motion.

As of the date of this filing of our quarterly report on Form 10-Q, there are four pending lawsuits challenging the merger with Silicon Motion. However, potential plaintiffs may file additional lawsuits challenging the merger. The outcome of any current or future litigation is uncertain. Such litigation, if not resolved, could prevent or delay completion of the merger and result in substantial costs to us and/or Silicon Motion, including any costs associated with the indemnification of directors and officers. One of the conditions to the closing is the absence of applicable law or order by any court or governmental entity (subject to certain limited exceptions) that has the effect of restraining, enjoining or otherwise prohibiting the consummation of the merger. Therefore, if a plaintiff were successful in obtaining an injunction prohibiting the consummation of the merger on the agreed-upon terms, then such injunction may prevent the merger from being completed, or from being completed within the expected timeframe. The defense or settlement of any lawsuit or claim that remains unresolved at the time the merger is completed may adversely affect our or Silicon Motion's business, financial conditions, results of operations and eash flows.

The fact that there is a merger pending could materially harm our or Silicon Motion's businesses and results of operations.

While the merger is pending, we and Silicon Motion are subject to a number of risks that may harm either business and results of operations, including:

- · the diversion of management and employee attention from implementing growth strategies in existing markets or in new markets we or Silicon Motion are targeting;
- · potential diversion of public attention from positioning of our or Silicon Motion's independent brand and products in a manner that appeals to customers;

- · the fact that we and Silicon Motion have and will continue to incur expenses related to the merger prior to its closing;
- the potential inability to respond effectively to competitive pressures, industry developments and future opportunities, in particular, given the restrictions on the conduct of our or Silicon Motion's business during the interim period between signing and closing due to the pre-closing covenants in the merger agreement;
- · We or Silicon Motion could be subject to costly litigation associated with the merger; and
- current and prospective employees may be uncertain about their future roles and relationships with us or Silicon Motion following completion of the merger, which may adversely affect the ability of us or Silicon Motion to attract and retain key personnel.

Counterparties of Silicon Motion may acquire certain rights upon the merger, which could negatively affect us following the merger.

Silicon Motion is party to numerous contracts, agreements, licenses, permits, authorizations and other arrangements that contain provisions giving counterparties certain rights (including, in some cases, termination rights) in the event of an "assignment" of such agreement or a "change in control" of Silicon Motion or its subsidiaries. The definitions of "assignment" and "change in control" vary from contract to contract and, in some cases, the "assignment" or "change in control" provisions may be implicated by the merger. If an "assignment" or "change in control" occurs, a counterparty may be permitted to terminate its contract with Silicon Motion or to exercise other remedies thereunder.

Whether a counterparty would have cancellation rights or other rights in connection with the merger depends upon the language and governing law of its agreement with Silicon Motion. Whether a counterparty exercises any cancellation rights or other rights it has would depend on, among other factors, such counterparty's views with respect to our financial strength and business reputation following the merger, prevailing market conditions and the business implications of exercising any such rights. We and Silicon Motion cannot presently predict the effects, if any, if the merger is deemed to constitute an assignment or change in control under certain of Silicon Motion's contracts and other arrangements, including the extent to which cancellation rights or other rights would be exercised, if at all, or the effect on our financial condition, results of operations or cash flows following the merger, but such effect could be material

If the merger with Silicon Motion is consummated, the issuance of shares of our common stock to Silicon Motion securityholders will reduce the percentage interests of our stockholders.

At the completion of the proposed merger with Silicon Motion, we expect to issue shares of our common stock to former Silicon Motion securityholders entitled to receive consideration pursuant to the merger agreement. If the merger is consummated, we expect that our stockholders will own approximately 86% and that Silicon Motion stockholders will own approximately 14% of our outstanding capital stock following completion of the merger. The issuance of shares of our common stock to Silicon Motion securityholders in the acquisition and the assumption by us of Silicon Motion restricted stock units will cause a reduction in the relative percentage voting and economic interests of our current stockholders.

After completion of the merger, we will be exposed to intensified risks associated with doing business in Taiwan because of tense regional geopolitical risk with China.

Following the merger, the revenue and operations of Silicon Motion will form a substantial portion of our revenue and operations, and since most of Silicon Motion's business operations are in Taiwan and its principal executive offices are in Hong Kong, risks of conducting business in Taiwan and Hong Kong, as described in the section "Risks Related to Our Business" under the risk factor "We are also subject to risks associated with international geopolitical conflicts involving the U.S. and other governments such as China and Russia" will be further intensified.

Past and recent developments in relations between Taiwan and China have on occasion depressed the market prices of the securities of companies with significant business activities in Taiwan. We cannot assure you that any contentious situation between Taiwan and China will always resolve in maintaining the current status quo or remain peaceful. Relations between Taiwan and China, potential confrontations between the United States and China and other factors affecting military, political, social or economic conditions in Taiwan and Hong Kong could have a material adverse effect on the Company's financial condition and results of operations, as well as the market price and the liquidity of our common stock.

The COVID-19 pandemic may delay or prevent the completion of the merger.

Given the ongoing and dynamic nature of the COVID-19 pandemic, it is difficult to predict its future impact on our or Silicon Motion's business, and there is no guarantee that efforts by us or Silicon Motion to address any adverse impacts will be effective. The merger may also be delayed or adversely affected by the COVID-19 pandemic, or become more costly due to our or Silicon Motion's respective policies or government policies and actions to protect the health and safety of individuals, or government policies or actions to maintain the functioning of national or global economies and markets could delay or prevent the completion of the merger. We and Silicon Motion may also incur additional costs to remedy damages caused by such disruptions, which could adversely affect our or Silicon Motion's financial condition or results of operations.

We expect to incur substantial expenses related to the merger of MaxLinear and Silicon Motion.

We expect to incur substantial expenses in connection with the pending merger and subsequent integration of Silicon Motion's business with MaxLinear. We expect operational integration to require substantial management attention. Numerous factors, many of which are beyond our control, could affect the total cost or the timing of expected merger and integration expenses. Moreover, many of the expenses that will be incurred are by their nature difficult to estimate accurately at the present time. These expenses could, particularly in the near term, reduce the savings that we expect to achieve from the elimination of duplicative expenses and the realization of economies of scale and cost savings related to the integration of Silicon Motion. These merger and integration expenses may result in MaxLinear's taking significant charges against earnings.

We will record goodwill in connection with the Silicon Motion merger that could become impaired and adversely affect our future operating results.

The merger with Silicon Motion will be accounted for as a business combination using the acquisition method of accounting by MaxLinear in accordance with accounting principles generally accepted in the United States. Under the acquisition method of accounting, the assets and liabilities of Silicon Motion will be recorded, as of completion, at their respective fair values and added to our assets and liabilities. Our reported financial condition and results of operations after completion of the merger will reflect Silicon Motion for periods prior to the merger. As a result, comparisons of future results against prior period results will be more difficult for investors.

Under the acquisition method of accounting, the total purchase price will be allocated to Silicon Motion's tangible assets and liabilities and identifiable intangible assets based on their fair values as of the date of completion of the merger. The excess of the purchase price over those fair values will be recorded as goodwill. We expect that the merger will result in the creation of a material amount of intangible assets and goodwill based upon the application of the acquisition method of accounting. To the extent the value of goodwill or intangibles becomes impaired, we may be required to incur material charges relating to such impairment. Any such impairment charge could have a material impairment or our operating results in future periods, and the announcement of a material impairment could have an adverse effect on the trading price and trading volume of our common stock.

The market value of our common stock could decline if large amounts of our common stock are sold following the merger with Silicon Motion

Following the merger with Silicon Motion, our stockholders and former securityholders of Silicon Motion will own interests in a company operating an expanded business with more assets and a different mix of liabilities. Our current stockholders (and the securityholders of Silicon Motion who will receive our common stock in connection with the merger) may not wish to continue to invest in us, or may wish to reduce their investment in us, in order to comply with institutional investing guidelines, to increase diversification or to track any rebalancing of stock indices in which our common stock and Silicon Motion ADS are or were included. If, following the merger, large amounts of our common stock are sold, the price of our common stock out decline.

#### Risks Related to Our Rusiness

We face intense competition and expect competition to increase in the future, which could have an adverse effect on our revenue, revenue growth rate, if any, and market share.

The global semiconductor market in general, and the broadband, wired and wireless infrastructure, and broader industrial and communications analog and mixed-signal markets in particular, are highly competitive. We compete in different target markets to various degrees on the basis of a number of principal competitive factors, including our products' performance, features and functionality, energy efficiency, size, ease of system design, customer support, product roadmap, reputation, reliability and price. We expect competition to increase and intensify as a result of industry consolidation and the resulting

creation of larger semiconductor companies. Large semiconductor companies resulting from industry consolidation could enjoy substantial market power, which they could exert through, among other things, aggressive pricing that could adversely affect our customer relationships and revenues. In addition, we expect the internal resources of large, integrated original equipment manufacturers, or OEMs, may continue to enter our markets. Increased competition could result in price pressure, reduced profitability and loss of market share, any of which could materially and adversely affect our business, revenue, revenue growth rates, if any, and operating results.

As our products are integrated into a variety of communications and industrial platforms, our competitors range from large, international merchant semiconductor companies offering a wide range of semiconductor products to smaller companies specializing in narrow markets, to internal or vertically integrated engineering groups within certain of our customers. Our primary merchant semiconductor competitors include Silicon Laboratories, Inc., Narroell Technology Group Ltd., M/A-COM Technology Solutions Holdings, Inc., Semtech Corporation, Qorvo Inc., Texas Instruments Incorporated, HiSilicon Technologies Co., Ltd., Analog Devices, Inc., Reneasa Electronics Corporation, Monolithic Power Systems, Inc., Microchip Technology, Inc., Ambarella, Inc., and Infineon Technologies AG. It is quite likely that competition in the markets in which we participate will increase in the future as existing competitors improve or expand their product offerings. In addition, it is quite likely that a number of other public and private companies are in the process of developing competing products for our current and target markets. Because our products often are building block semiconductors which provide functions that in some cases can be integrated into more complex integrated circuits, we also face competition from manufacturers of integrated circuits, some of which may be existing customers or platform partners that develop their own integrated circuit products. If we cannot offer an attractive solution for applications where our competitors offer more fully integrated products, we may lose significant market share to our competitors. Some of our targeted customers for our optical interconnect solutions are module makers who are vertically integrated, where we compete with internally supplied components, and we compete with much larger analog and mixed-signal catalog competitors in the multi-market high-performance analog markets.

Our ability to compete successfully depends on factors both within and outside of our control, including industry and general economic trends. During past periods of downturns in our industry, competition in the markets in which we operate intensified as manufacturers of semiconductors reduced prices in order to combat production overcapacity and high inventory levels. Many of our competitors have substantially greater financial and other resources with which to withstand similar adverse economic or market conditions in the future. Moreover, the competitive landscape is changing as a result of intense consolidation within our industry as some of our competitors have merged with or been acquired by other competitors, and other competitors have begun to collaborate with each other. In addition, changes in government trade policies, including the imposition of tariffs and export restrictions, could limit our ability to sell our products to certain customers and adversely affect our ability to compete successfully. These developments may materially and adversely affect our current and future target markets and our ability to compete successfully in

Impacts of the global semiconductor supply shortage and high inflation could adversely affect our business, financial condition, and results of operations.

During the COVID-19 global pandemic, which is still ongoing, various restrictions were put in place causing a temporary decline in demand for certain items such as automobiles. As restrictions began easing across the world, a sudden increase in demand for electronics containing semiconductor chips and stockpiling of chips by certain firms in China blacklisted by the U.S. has exacerbated bottlenecks in the supply chain, resulting in a global semiconductor supply shortage impacting our industry. Some chip manufacturers are estimating this supply shortage may continue into 2023. While these chip manufacturers are working to increase capacity in the future, and we are continuing to work closely with our suppliers and customers to minimize the potential adverse impacts of the supply shortage, such shortage may have a near-term impact on our ability to meet increased demand on certain products and have a negative impact on our operating results, which may continue into 2023. The global supply shortages and uncertainty in customer demand and the worldwide economy in general has continued as a result of the COVID-19 pandemic and may be exacerbated by the impacts of high inflation, and we may experience increased volatility in sales and revenues in the near future, including those from local outbreaks which may cause customers to delay our order fulfillment in response to disrupted shipments. However, the magnitude of such volatility on our business and its duration is uncertain and cannot be reasonably estimated at this time.

Other areas of our business which could be disrupted or subject to negative impacts may include, but may not be limited to, the following:

• Further supply constraints, including prolonged global semiconductor supply shortages, foundry, assembly or test capacity limitations, and delays in production from temporary facility closures;

- · Disruptions in product shipments from travel and shipping restrictions imposed in response to local outbreaks, or from customer postponement requests;
- Governmental closures beyond our control;
- Reduced ability to accurately predict our future revenue and budget future expenses;
- Inefficiencies, delays and additional costs in design win, product development, production and fulfillment which may be exacerbated by measures against the spread of COVID-19;
- Accounts receivable collection issues should any of our limited and significant customers experience liquidity concerns;
- · Material impacts to the value of our common stock, which may result in impairment of our goodwill;
- · Material impairment of our assets, if recoverability thereof becomes a concern;
- · Decreased availability of capital or access thereto in the United States and from other jurisdictions in which we operate; and
- Increased data and system security risks from remote working arrangements of our customers and vendors.

Although we currently expect that our present cash and cash equivalent balances and cash flows that are generated from operations will be sufficient to meet our operating requirements for at least the next twelve months, a material adverse impact from the global semiconductor supply shortages could result in a need to raise additional capital or incur additional indebtedness to fund strategic initiatives or operating activities, particularly if we pursue additional acquisitions. Additional funds may not be available on terms favorable to us or at all. If we are unable to raise additional funds when needed, we may not be able to sustain our operations or execute our strategic plans.

Our business, financial condition and results of operations could be adversely affected by the political and economic conditions of the countries in which we conduct business and other factors related to our international operations.

We sell our products throughout the world. Products shipped to Asia accounted for 81% of our net revenue in the six months ended June 30, 2022. In addition, as of June 30, 2022, approximately 75% of our employees are located outside of the United States. The majority of our products are manufactured, assembled and tested in Asia, and our major distributors are located in Asia. Multiple factors relating to our international operations and to particular countries in which we operate could have a material adverse effect on our business, financial condition and results of operations. These factors include:

- changes in political, regulatory, legal or economic conditions;
- restrictive governmental actions, such as restrictions on the transfer or repatriation of funds and foreign investments and trade protection measures, including export duties and quotas and customs duties and tariffs;
- · disruptions of capital and trading markets;
- · changes in import or export licensing requirements;
- · transportation delays;
- · civil disturbances or political instability;
- · geopolitical turmoil, including terrorism, war or political or military coups;
- · public health emergencies, including the COVID-19 pandemic;
- · differing employment practices and labor standards;
- · limitations on our ability under local laws to protect our intellectual property;
- · local business and cultural factors that differ from our customary standards and practices;
- · nationalization and expropriation;

- changes in tax laws;
- · currency fluctuations relating to our international operating activities; and
- · difficulty in obtaining distribution and support.

In addition to a significant portion of our wafer supply coming from Taiwan, Singapore, and China, substantially all of our products undergo packaging and final testing in Taiwan, Singapore, China, South Korea, and Thailand. Any conflict or uncertainty in these countries, including due to natural disaster, public health or safety concerns, could have a material adverse effect on our business, financial condition and results of operations. In addition, if the government of any country in which our products are manufactured or sold sets technical standards for products manufactured in or imported into their country that are not widely shared, it may lead some of our customers to suspend imports of their products into that country, require manufacturers in that country to manufacture products with different technical standards and disrupt cross-border manufacturing relationships which, in each case, could have a material adverse effect on our business, financial condition and results of operations.

We also are subject to risks associated with international geopolitical conflicts involving the U.S. and other governments such as China and Russia.

In recent years, diplomatic and trade relationships between the U.S. government and China have been frayed. Events in Hong Kong and the threat of a takeover of Taiwan by China have also prompted other governments such as that of the United Kingdom to reconsider its trade and business relationships with China and with certain Chinese companies. Difficulties in these relationships have in a number of cases required us to take actions adverse to our business to comply with governmental restrictions on business and trade with China. In May 2019 and subsequently, we ceased business operations that were prohibited with entities affiliated with Huawei Technologies Co., Ltd., or Huawei and certain other entities, when the Bureau of Industry and Security at the U.S. Department of Commerce, or BIS, amended the Export Administration Regulations, or EAR, to add such entities to the Restricted Entity List for acting contrary to the national security or foreign policy interests of the United States. In September 2020, we further ceased business operations that were prohibited with additional entities affiliated with Huawei when the BIS again amended the EAR to add such entities to the Restricted Entity List. We are required to obtain special licenses to conduct business with Restricted Entities, and the BIS continues to add entities which may be potential customers on the Restricted Entity List.

We believe direct impacts of the economic sanctions against Russia and the military conflict in Ukraine are currently limited to volatility in the prices of metals used by our outsourced semiconductor assembly and test, or OSAT, supply chain, in particular around the supply of palladium, for which Russia is the top producer in the world, as well as increased fuel costs, which has global impact on transportation costs, including the shipping and delivery of our products. However, the magnitude of such price volatility on the Company's business and its duration is uncertain and cannot be reasonably estimated at this time.

We cannot provide assurances that similar disruptions of distribution arrangements in the future, the imposition of governmental prohibitions on selling our products to particular customers, and/or increases in costs of certain raw materials and transportation will not also adversely affect our revenues and operating results. Loss of a key distributor or customer under similar circumstances could have an adverse effect on our business, revenues and operating

We depend on a limited number of customers for a substantial portion of our revenue, and the loss of, or a significant reduction in orders from one or more of our major customers could have a material adverse effect on our revenue and operating results

In the six months ended June 30, 2022, our top two customers accounted for 28% of our net revenue, and our ten largest customers collectively accounted for 71% of our net revenue, of which distributor customers accounted for 30% of our net revenue. We expect that our operating results for the foreseeable future will continue to show a substantial percentage of sales dependent on a relatively small number of customers. In the future, these customers may decide not to purchase our products at all, may purchase fewer products than they did in the past, or may defer or cancel purchases or otherwise alter their purchasing patterns. Factors that could affect our revenue from these large customers include the following:

- substantially all of our sales to date have been made on a purchase order basis, which permits our customers to cancel, change or delay product purchase commitments with little or no notice to us and without penalty;
- · some of our customers have sought or are seeking relationships with current or potential competitors which may affect their purchasing decisions;

- service provider and OEM consolidation across cable, satellite, and fiber markets could result in significant changes to our customers' technology development and deployment priorities and roadmaps, which could affect our ability to forecast demand accurately and could lead to increased volatility in our business; and
- technological changes in our markets could lead to substantial volatility in our revenues based on product transitions, and particularly in our broadband markets, we face risks based on changes in the way consumers are accessing and using broadband and cable services, which could affect operator demand for our products.

In addition, delays in development could impair our relationships with our strategic customers and negatively impact sales of the products under development. Moreover, it is possible that our customers may develop their own products or adopt a competitor's solution for products that they currently buy from us. If that happens, our sales would decline and our business, financial condition and results of operations could be materially and adversely affected.

Our relationships with some customers may deter other potential customers who compete with these customers from buying our products. To attract new customers or retain existing customers, we may offer these customers favorable prices on our products. In that event, our average selling prices and gross margins would decline. The loss of a key customer, a reduction in sales to any key customer or our inability to attract new significant customers could seriously impact our revenue and materially and adversely affect our results of operations.

A significant portion of our revenues are from sales of product to distributors, who then resell our product. Our agreements with certain of these distributors provide protection against price reduction on their inventories of our products. The loss of certain distributors could have a substantial adverse effect on our business and results of operating results in the event of a dramatic decline in selling prices for these products.

In addition, the current situation relating to trade with China and governmental and regulatory concerns relating to specific Chinese companies continue to remain fluid and unpredictable. Our current and future operating results could be materially and adversely affected by limitations on our ability to sell to one or more Chinese customers and by tariffs and other trade barriers that may be implemented by governmental authorities.

Despite a relatively short-term positive pricing environment, average selling prices of our products could decrease rapidly, which would have a material adverse effect on our revenue and gross margins.

We may experience substantial period-to-period fluctuations in future operating results due to the erosion of our average selling prices. From time to time, we have reduced the average unit price of our products due to competitive pricing pressures, new product introductions by us or our competitors, and for other reasons, and we expect that we will have to do so again in the future, despite a relatively short-term positive pricing period entour positive pricing prices impact on selling prices in provided a number of larger semiconductor companies with substantial market power, which has had an adverse impact on selling prices in some of our markets. If we are unable to offset any reductions in our average selling prices by increasing our sales volumes or introducing new products with higher margins, our revenue and gross margins will suffer. To support our gross margins, we must develop and introduce new products and product enhancements on a timely basis and continually reduce our and our customers' costs. Our inability to do so would cause our revenue and gross margins to decline. In addition, under certain of our agreements with key distributors we provide protection for reductions in selling prices of the distributors' inventory, which could have a significant adverse effect on our operating results if the selling prices for those products fell dramatically.

If we fail to penetrate new applications and markets, our revenue, revenue growth rate, if any, and financial condition could be materially and adversely affected.

We sell a significant portion of our products to manufacturers of cable broadband voice and data modems and gateways, Pay-TV set-top boxes and gateways into cable and satellite operator markets, satellite outdoor units or LNB's, optical modules for long-haul and metro telecommunications markets, and RF transceivers and modem solutions for wireless infrastructure markets. Our product offerings also include broadband data access, power management and interface technologies which are ubiquitous functions in new and existing markets such as wireless and wireline communications infrastructure, broadband access, industrial, enterprise network, and automotive applications. We have further expanded our product offerings to include Wi-Fi, ethernet and broadband gateway processor systems-on-chip, or SoCs, and intellectual property that utilizes patented machine learning techniques to improve signal integrity and power efficiency in SoCs, application-specific integrated circuits, or ASICs, and field-programmable gate arrays, or FPGAs, used in next-generation communication and artificial intelligence systems. Our future revenue growth, if any, will depend in part on our ability to further penetrate into, and expand beyond,

these markets with analog, digital and mixed-signal solutions targeting the markets for Wi-Fi and broadband, high-speed optical interconnects for data center, metro, and long-haul optical modules, telecommunications wireless infrastructure, and cable DOCSIS 3.1 network infrastructure products. Each of these markets presents distinct and substantial risks. If any of these markets do not develop as we currently anticipate, or if we are unable to penetrate them successfully, it could materially and adversely affect our revenue and revenue growth rate, if any.

Broadband data modems and gateways and Pay-TV and satellite set-top boxes and video gateways continue to represent a significant North American and European revenue generator. The North American and European Pay-TV market is dominated by only a few OEMs, including Technicolor, Commiscope Holding Company, Inc., Hitron Technologies, Inc., Compal Broadband Networks, Humax Co., Ltd., and Samsung Electronics Co., Ltd. Samsung Electronics Co., Ltd. Samsung Electronics Co., Ltd., and Samsung Electronics Co.,

If we fail to penetrate these or other new markets upon which we target our resources, our revenue and revenue growth rate, if any, likely will decrease over time and our financial condition could suffer.

A significant portion of our revenue is attributable to demand for our products in markets for broadband solutions, and development delays and consolidation trends among cable and satellite Pay-TV and broadband operators could adversely affect our future revenues and operating results.

For the six months ended June 30, 2022 and 2021, revenue directly attributable to broadband applications accounted for approximately 50% and 57% of our net revenue, respectively. Delays in the development of, or unexpected developments in the broadband markets could have an adverse effect on order activity by original equipment manufacturers in these markets and, as a result, on our business, revenue, operating results and financial condition. In addition, consolidation trends among Pay-TV and broadband operators may continue, which could have a material adverse effect on our future operating results and financial condition.

We may be unable to make the substantial and productive research and development investments that are required to remain competitive in our business.

The semiconductor industry requires substantial investment in research and development in order to develop and bring to market new and enhanced technologies and products. Many of our products originated with our research and development efforts, which we believe have provided us with a significant competitive advantage. For the six months ended June 30, 2022 and 2021, our research and development expense was \$146.3 million and \$137.6 million, respectively. We monitor such expenditures as part of our strategy of devoting focused research and development efforts on the development of innovative and sustainable product platforms. We are committed to investing in new product development internally in order to stay competitive in our markets and plan to maintain research and development and design capabilities for new solutions in advanced semiconductor process nodes such as 16nm and 5nm and beyond. However, we do not know whether we will have sufficient resources to maintain the level of investment in research and development required to remain competitive as semiconductor process nodes continue to shrink and become increasingly complex. In addition, we cannot assure you that the technologies that are the focus of our research and development expenditures will become commercially successful.

We are currently benefiting from an uptick in demand for certain products due in part to the work-from-home environment caused by the COVID-19 pandemic. A significant variance in our operating results or rates of growth, if any, could lead to substantial volatility in our stock price. We may not sustain our current growth rate, and we may not be able to manage future growth effectively.

Our net revenue increased from \$414.7 million in the six months ended June 30, 2021 to \$543.9 million in the six months ended June 30, 2022 due to market strength attributed to the work-from-home environment that is driving an increase in demand for certain of our products, particularly those in our broadband market. Impacts from the COVID-19 pandemic, such as global supply shortages, uncertainty in customer demand, as well as the global economy could result in increased volatility in our sales and revenues. You should not rely on our operating results for any prior quarterly or annual periods as an indication of our future operating performance. Please refer to the Risk Factor entitled "Our operating results are subject to substantial"

quarterly and annual fluctuations and may fluctuate significantly due to a number of factors that could adversely affect our business and our stock price for a discussion of factors contributing to variances in our operating results or rates of growth. If we are unable to sustain adequate revenue growth, our financial results could suffer and our stock price could decline.

To sustain and manage any future growth successfully, we believe we must effectively, among other things:

- · successfully develop new products and penetrate new applications and markets;
- · recruit, hire, train and manage additional qualified engineers for our research and development activities, especially in the positions of design engineering, product and test engineering and applications engineering;
- · add sales personnel and expand customer engineering support offices;
- · implement and improve our administrative, financial and operational systems, procedures and controls; and
- · enhance our information technology support for enterprise resource planning and design engineering by adapting and expanding our systems and tool capabilities, and properly training new hires as to their use.

If we are unable to sustain and manage our growth effectively, we may not be able to take advantage of market opportunities or develop new products and we may fail to satisfy customer requirements, maintain product quality, execute our business plan, or respond to competitive pressures.

The complexity of our products could result in unforeseen delays or expenses caused by undetected defects or bugs, which could reduce the market acceptance of our new products, damage our reputation with current or prospective customers and adversely affect our operating costs.

Highly complex products like our Wi-Fi and broadband RF receivers and RF receiver SoCs, physical medium devices for optical modules, RF transceiver and modem solutions for wireless infrastructure markets, and high-performance analog solutions may contain defects and bugs when they are first introduced or as new versions are released. Where any of our products, including legacy acquired products, contain defects or bugs, or have reliability, quality or compatibility problems, we may not be able to successfully correct these problems. Consequently, our reputation may be damaged and customers may be reluctant to buy our products, which could materially and adversely affect our ability to retain existing customers and attract new customers, and our financial results. In addition, these defects or bugs could interrupt or delay sales to our customers. If any of these problems are not found until after we have commenced commercial production of a new product, we may be required to incur additional development costs and product recall, repair or replacement costs, and our operating costs could be adversely affected. These problems may also incur costs if we compensate the affected customer. We maintain product liability insurance, but this insurance is limited in amount and subject to significant deductibles. There is no guarantee that our insurance will be available or adequate to protect against all claims. We also may incur costs and expenses relating to a recall of one of our customers' products containing one of our devices. The process of identifying a recalled product in devices that have been widely distributed may be lengthy and require significant resources, and we may incurs ignificant replacement costs, contract damage claims from our customers and reputational harm. Costs or payments made in connection with warranty and product liability claims and product recalls could materially affect our financial condition and results of operations.

If we are unable to attract, train and retain qualified personnel, especially our design and technical personnel, we may not be able to execute our business strategy effectively.

Our future success depends on our ability to retain, attract and motivate qualified personnel, including our management, sales and marketing and finance teams, and especially our design and technical staff. We do not know whether we will be able to attract and retain all of these personnel as we continue to pursue our business strategy. Historically, we have encountered difficulties in hiring and retaining qualified engineers because there is a limited pool of engineers with the expertise required in our field. Competition for these personnel is intense in the semiconductor industry. As the source of our technological and product innovations, our design and technical personnel represent a significant asset. The loss of the services of one or more of our key employees, especially our key design and technical personnel, or our inability to retain, attract and motivate qualified design and technical personnel, could have a material adverse effect on our business, financial condition and results of operations.

If we fail to develop and introduce new or enhanced products on a timely basis, our ability to attract and retain customers could be impaired and our competitive position could be harmed.

We operate in a dynamic environment characterized by rapidly changing technologies and industry standards and technological obsolescence. To compete successfully, we must design, develop, market and sell new or enhanced products that provide increasingly higher levels of performance and reliability and meet the cost expectations of our customers. The introduction of new products by our competitors, the market acceptance of products based on new or alternative technologies, or the emergence of new industry standards could render our existing or future products obsolete. Our failure to anticipate or timely develop new or enhanced products or technological shifts could result in decreased revenue and our competitors winning more competitive bid processes, known as "design wins." In particular, we may experience difficulties with product design, manufacturing, marketing or certification that could delay or prevent our development, introduction or marketing of new or enhanced products. If we fail to introduce new or enhanced products that meet the needs of our customers or penetrate new markets in a timely fashion, we will lose market share and our operating results will be adversely affected.

In particular, we believe that we will need to develop new products in part to respond to changing dynamics and trends in our end user markets, including (among other trends) consolidation among cable and satellite operators, potential industry shifts away from the hardware devices and other technologies that incorporate certain of our products, and changes in consumer television viewing habits and how consumers access and receive broadcast content and digital broadband services. We cannot predict how these trends will continue to develop or how or to what extent they may affect our future revenues and operating results. We believe that we will need to continue to make substantial investments in research and development in an attempt to ensure a product roadmap that anticipates these types of changes; however, we cannot provide any assurances that we will accurately predict the direction in which our markets will evolve or that we will be able to develop, market, or sell new products that respond to such changes successfully or in a timely manner, if at all.

We are subject to order and shipment uncertainties, and differences between our estimates of customer demand and product mix and our actual results could negatively affect our inventory levels, sales and operating results.

Our revenue is generated on the basis of shipments of products under purchase orders with our customers rather than long-term purchase commitments. In addition, our customers can cancel purchase orders or defer the shipments of our products under certain circumstances. Our products are manufacturied using a silicon foundry according to our estimates of customer demand, which requires us to make separate demand forecast assumptions for every customer, each of which may introduce significant variability into our aggregate estimate. We have limited visibility into future customer demand and the product introductsomers will require, which could adversely affect our revenue forecasts and operating margins. Moreover, because our target markets are relatively new, many of our customers have difficulty accurately forecasting their product requirements and estimating the timing of their new product introductions, which ultimately affects their demand for our products. Historically, because of this limited visibility, actual results have been different from our forecasts of customer demand. Some of these differences have been material, leading to excess inventory or products shortages and revenue and margin forecasts above those we were actually able to achieve. These differences may occur in the future, and the adverse impact of these differences between forecasts and actual results could grow if we are successful in selling in and expanding the customer base for our products. In addition, the rapid pace of innovation in our industry could render significant portions of our inventory obsolete. Excess or obsolete inventory levels could result in unexpected expenses or increases in our reserves that could adversely affect our business, operating results and financial condition. Conversely, if we were to underestimate customer demand or if sufficient manufacturing capacity were unavailable, we could forego revenue opportunities, potentially lose market share and damage our customer relationships. In addition, any significa

We may have difficulty accurately predicting our future revenue and appropriately budgeting our expenses particularly as we seek to enter new markets where we may not have prior experience.

Our operating history has historically focused on developing integrated circuits for specific terrestrial, cable and satellite television, and broadband voice and data applications, satellite set-top and gateway boxes and outdoor units and physical medium devices for the optical interconnect markets. However, as part of our growth strategy, we seek to expand our addressable market into new product categories. For example, we expanded into the markets for the wired whole-home broadband connectivity market and entered the markets for wireless telecommunications infrastructure and power management and interface technologies which are ubiquitous functions in wireless and wireline communications infrastructure, broadband access, industrial, enterprise network, and automotive applications. We have also expanded into the markets for Wi-Fi, Ethernet

and Broadband Gateway Processor SoCs and intellectual property that utilizes patented machine learning techniques to improve signal integrity and power efficiency in SoCs, ASICs, and FPGAs used in next-generation communication and artificial intelligence systems. Our limited operating experience in new markets or potential markets we may enter, combined with the rapidly evolving nature of our markets in general, substantial uncertainty concerning how these markets may develop and other factors beyond our control reduces our ability to accurately forecast quarterly or annual revenue. If our revenue does not increase as anticipated, we could incur significant losses due to our higher expense levels if we are not able to decrease our expenses in a timely manner to offset any shortfall in future revenue.

Our business would be adversely affected by the departure of existing members of our senior management team.

Our success depends, in large part, on the continued contributions of our senior management team. None of our senior management team is bound by written employment contracts to remain with us for a specified period. In addition, we have not entered into non-compete agreements with members of our senior management team. We are fortunate that many members of our executive management team have long tenures with us, but from time to time we also have been required to recruit new executive officers. With respect to executive officer recruitment and retention, we need to ensure that our executive compensation programs provide sufficient programs provide sufficient programs provide sufficient sententions, we need to ensure that our executive compensation programs provide sufficient sententions, incentives to achieve our long-term strategic business and financial objectives. We expect competition for individuals with our required skill sets, particularly technical and engineering skills, to remain intense even in weak global macroeconomic environments. The loss of any member of our senior management team. None of our senior management team is bound by written employment contracts to remain with us for a specified period. In

Our customers require our products and our third-party contractors to undergo a lengthy and expensive qualification process which does not assure product sales.

Prior to purchasing our products, our customers require that both our products and our third-party contractors undergo extensive qualification processes, which involve testing of the products in the customer's system and rigorous reliability testing. This qualification process may continue for six months or more. However, qualification of a product by a customer does not assure any sales of the product to that customer. Even after successful qualification and sales of a product to a customer, a subsequent revision to our solutions, or changes in our customer is nanufacturing process or our selection of a new supplier may require a new qualification process, which may result in delays and in us holding excess or obsolete inventory. After our products are qualified, it can take six months or more before the customer commences volume production of components or devices that incorporate our products. Despite these uncertainties, we devote substantial resources, including design, engineering, sales, marketing and management efforts, to qualifying our products with a customer, sales of this product to the customer may be precluded or delayed, which may result in a decrease in our revenue and cause our business to suffer.

Winning business is subject to lengthy competitive selection processes that require us to incur significant expenditures. Even if we begin a product design, customers may decide to cancel or change their product plans, which could cause us to generate no revenue from a product and adversely affect our results of operations.

We are focused on securing design wins to develop RF receivers and RF receiver SoCs, MoCA and G.hn SoCs, DBS-ODU SoCs, physical medium devices for optical modules, interface and power management devices, and SoC solutions targeting infrastructure opportunities within the telecommunications, wireless, industrial and multimarket and Wi-Fi and broadband operator markets for use in our customers' products. These selection processes typically are lengthy and can require us to incur significant design and development expenditures and dedicate scarce engineering resources in pursuit of a single customer opportunity. We may not win the competitive selection process and may never generate any revenue despite incurring significant design and development expenditures. These risks are exacerbated by the fact that some of our customers' products likely will have short life cycles. Although this has not occurred to date, failure to obtain a design win could prevent us from offering an entire generation of a product. This could cause us to lose revenue and require us to write off obsolete inventory, and could weaken our position in future competitive selection processes. After securing a design win, we may experience delays in generating revenue from our products as a result of the lengthy development cycle typically required. Our customers generally take a considerable amount of time to evaluate our products. The typical time from early engagement by our sales force to actual product introduction runs from nine to twelve months for the consumer market, to as much as 18 to 24 months for the satellite markets, and 36 months or longer for industrial, wired and wireless infrastructure markets. The delays inherent in these lengthy sales cycles increase the risk that a customer will decide to cancel, curtail, reduce or delay its product plans, causing us to lose anticipated sales. In addition, any delay or cancellation of a customer's plans could materially and adversely affect our financial results, as we may have incurred signif

our business, financial condition and results of operations. If we were unable to generate revenue after incurring substantial expenses to develop any of our products, our business would suffer.

Our operating results are subject to substantial quarterly and annual fluctuations and may fluctuate significantly due to a number of factors that could adversely affect our business and our stock price.

Our revenue and operating results have fluctuated in the past and are likely to fluctuate in the future. These fluctuations may occur on a quarterly and on an annual basis and are due to a number of factors, many of which are beyond our control. These factors include, among others:

- · changes in end-user demand for the products manufactured and sold by our customers;
- · the receipt, reduction or cancellation of significant orders by customers;
- · fluctuations in the levels of component inventories held by our customers;
- the gain or loss of significant customers;
- · market acceptance of our products and our customers' products;
- our ability to develop, introduce, and market new products and technologies on a timely basis:
- · the timing and extent of product development costs;
- · new product announcements and introductions by us or our competitors;
- · incurrence of research and development and related new product expenditures;
- · seasonality or cyclical fluctuations in our markets;
- · government actions, by the United States, China or other countries, that impose barriers or restrictions that would impact our ability to sell or ship products to customers;
- · currency fluctuations:
- · fluctuations in IC manufacturing yields;
- significant warranty claims, including those not covered by our suppliers;
- · changes in our product mix or customer mix;
- intellectual property disputes;
- loss of key personnel or the shortage of available skilled workers;
- · impairment of long-lived assets, including masks and production equipment;
- · the effects of competitive pricing pressures, including decreases in average selling prices of our products; and
- · uncertainties arising from the impact of the COVID-19 pandemic on the market and our business operations.

These factors are difficult to forecast, and these, as well as other factors, could materially adversely affect our quarterly or annual operating results. We typically are required to incur substantial development costs in advance of a prospective sale with no certainty that we will ever recover these costs. A substantial amount of time may pass between a design win and the generation of revenue related to the expenses previously incurred, which can potentially cause our operating results to fluctuate significantly from period to period. In addition, a significant amount of our operating expenses are relatively fixed in nature due to our significant sales, research and development costs. Any failure to adjust spending or our operations quickly enough to compensate for a revenue shortfall could magnify its adverse impact on our results of operations.

We are subject to the cyclical nature of the semiconductor industry.

The semiconductor industry is highly cyclical and is characterized by constant and rapid technological change, rapid product obsolescence and price erosion, evolving standards, short product life cycles and wide fluctuations in product supply

and demand. Any future downturns may result in diminished product demand, production overcapacity, high inventory levels and accelerated erosion of average selling prices. Furthermore, any upturn in the semiconductor industry could result in increased competition for access to third-party foundry and assembly capacity. We are dependent on the availability of this capacity to manufacture and assemble all of our products. None of our third-party foundry or assembly contractors has provided assurances that adequate capacity will be available to us in the future. A significant downturn or upturn could have a material adverse effect on our business and operating results.

Our business is subject to various international and U.S. laws and governmental regulations, and compliance with these laws and regulations may cause us to incur significant expenses. If we fail to maintain compliance with applicable laws and regulations, we may be forced to recall products and cease their manufacture and distribution, and we could be subject to civil or criminal penalties.

Our business is subject to various international and U.S. laws, regulations and other legal requirements, including those related to packaging, product content, labor, import/export control regulations, anticorruption laws such as the Foreign Corrupt Practices Act, privacy, cybersecurity, competition and antitrust and others. These laws and regulations are complex, change frequently, occasionally are conflicting or ambiguous, and have generally become more stringent over time. We may be required to incur significant costs to comply with these laws and regulations or to remedy violations. Any failure by us to comply with applicable laws and regulations could result in cessation of our operations or portions of our operations, product recalls or impositions of fines and restrictions on our ability to conduct our operations. In addition, because many of our products are regulated or sold into regulated industries, we must comply with additional regulations in marketing our products.

Our products and operations are also subject to the rules of industrial standards bodies, like the International Standards Organization, as well as regulation by other agencies, such as the U.S. Federal Communications Commission. If we fail to adequately address any of these rules or regulations, our business could be harmed.

For example, as indicated elsewhere in this report, we do a substantial portion of our business in Asia and particularly in China. In prior years, there has been a substantial focus by regulators in the United States and Europe on the business practices of major Chinese technology companies such as Huawei and ZTE. ZTE is our current customer, but in May 2019 and subsequent months, and again in September 2020 with additional affiliated entities, we ceased prohibited business operations with Huawei and its affiliates and certain other restricted entities. We hile we intend to continue to conduct our businesses in compliance with all applicable laws, including laws relating to export controls and anti-corruption, it is possible that the nature of our business and customers could result in a review of our relationships and practices by regulatory authorities. We could incur increased administrative and legal costs in order to respond to any inquiries, and any failure to comply with applicable laws could adversely affect our business and operating results. We have implemented policies and procedures, including adoption of an anti-corruption policy and procedures to ensure compliance with applicable export control laws, but there can be no assurance that our policies and procedures will prove effective.

We must conform the manufacture and distribution of our semiconductors to various laws and adapt to regulatory requirements in all countries as these requirements change. If we fail to comply with these requirements in the manufacture or distribution of our products, we could be required to pay civil penalties, face criminal prosecution and, in some cases, be prohibited from distributing our products in commerce until the products or component substances are brought into compliance.

Our products must conform to industry standards in order to be accepted by end users in our markets.

Generally, our products comprise only a part or parts of a communications device. All components of these devices must uniformly comply with industry standards in order to operate efficiently together. We depend on companies that provide other components of the devices to support prevailing industry standards. Many of these companies are significantly larger and more influential in driving industry standards than we are. Some industry standards may not be widely adopted or implemented uniformly, and competing standards may emerge that may be preferred by our customers or end users. If larger companies do not support the same industry standards that we do, or if competing standards emerge, market acceptance of our products could be adversely affected, which would harm our business.

Products for communications applications are based on industry standards that are continually evolving. Our ability to compete in the future will depend on our ability to identify and ensure compliance with these evolving industry standards. The emergence of new industry standards could render our products incompatible with products developed by other suppliers. As a result, we could be required to invest significant time and effort and to incur significant expense to redesign our products to ensure compliance with relevant standards. If our products are not in compliance with prevailing industry standards for a significant period of time, we could miss opportunities to achieve crucial design wins. We may not be successful in developing

or using new technologies or in developing new products or product enhancements that achieve market acceptance. Our pursuit of necessary technological advances may require substantial time and expense

As of June 30, 2022, our aggregate indebtedness was \$250.0 million. Such indebtedness adversely affects our operating results and cash-flows as we satisfy our underlying interest and principal payment obligations and contains financial and operational covenants that could adversely affect our operational freedom or ability to pursue strategic transactions that we would otherwise consider to be in the best interests of stockholders, including obtaining additional indebtedness to figures well transactions.

As of June 30, 2022, our aggregate indebtedness was \$250.0 million from an initial term loan under the June 23, 2021 Credit Agreement. The June 23, 2021 Credit Agreement also provides for the Revolving Facility of up to \$100.0 million, which remains undrawn as of June 30, 2022. The credit agreement also permits the Company to request incremental loans in an aggregate principal amount not to exceed the sum of an amount equal to the greater of (x) \$175.0 million and (y) 100% of "Consolidated EBITDA" (as defined in such agreement), plus the amount of certain voluntary prepayments, plus an unlimited amount that is subject to pro forma compliance with certain first lien net leverage ratio, secured net leverage ratio and total net leverage ratio tests.

The Initial Term Loan under the June 23, 2021 Credit Agreement has a seven-year term expiring in June 2028 and bears interest at either an Adjusted LIBOR plus a fixed applicable margin of 2.25% or an Adjusted Base Rate plus a fixed applicable margin of 1.25%, at our option. Commencing on September 30, 2021, the Initial Term Loan under the June 23, 2021 Credit Agreement will amortize in equal quarterly installments equal to 0.25% of the original principal amount, with the balance payable on June 23, 2028. The Company is subject to commitment fees ranging from 0.175% to 0.25% on the undrawn portion of the revolving facility, and any outstanding loans under the revolving facility will bear interest at either an Adjusted LIBOR plus a margin of 1.00% to 1.75% or an Adjusted Base Rate plus a margin of 0% to 0.75%. The Company's obligations under the June 23, 2021 Credit Agreement are required to be guaranteed by certain of its domestic subsidiaries meeting materiality thresholds set forth in the credit agreement. Such obligations, including the guaranties, are secured by substantially all of the assets of the Company and the subsidiary guarantors.

Our material indebtedness adversely affects our operating expenses through increased interest payment obligations and adversely affects our ability to use cash generated from operations as we repay interest and principal under the term loans. In addition, the revolving credit facility provisions under the June 23, 2021 Credit Agreement include financial covenants such as an initial maximum secured net leverage ratio of 3.5 to 1, which temporarily increases to 3.75 to 1 following the consummation of certain material permitted acquisitions, and operational covenants that may adversely affect our ability to engage in certain activities, including obtaining additional financing, granting liens, undergoing certain fundamental changes, or making investments or certain restricted payments, and selling assets, and similar transactions, without obtaining the consent of the lenders, which may or may not be forthcoming. The initial secured term loan under the June 23, 2021 Credit Agreement is only subject to operational covenants. Lastly, our borrowing costs can be affected by periodic credit ratings from independent rating agencies. Such ratings are largely based on our performance, which may be measured by credit metrics such as leverage and interest coverage ratios. Accordingly, outstanding indebtedness could adversely affect our operational freedom or ability to pursue strategic transactions that we would otherwise consider to be in the best interests of stockholders, including obtaining additional indebtedness to finance such transactions.

Specifically, our indebtedness has important consequences to investors in our common stock, including the following:

- we are subject to variable interest rate risk because our interest rate under Initial Term Loan under the June 23, 2021 Credit Agreement varies based on a fixed margin of 2.25% per annum over an adjusted base rate and our interest rate for any outstanding principal under the revolving credit facility varies based a margin of 0% to 0.75% over adjusted base rate or a margin of 1.00% to 1.75% over an adjusted LIBOR rate, and we are also subject to commitment fees ranging from 0.175% to 0.25% on the undrawn portion of the revolving facility. If interest rates were to increase substantially, it would adversely affect our operating results and could affect our ability to service our indebtedness;
- · a portion of our cash flows is dedicated to the payment of interest and when applicable, principal, on our indebtedness and other obligations and will not be available for use in our business;
- · our level of indebtedness could limit our flexibility in planning for, or reacting to, changes in our business and the markets in which we operate; and

· our high degree of indebtedness may make us more vulnerable to changes in general economic conditions and/or a downturn in our business, thereby making it more difficult for us to satisfy our obligations.

If we fail to make required debt payments, or if we fail to comply with financial or other covenants in our debt service agreements, which include a maximum leverage ratio, we would be in default under the terms of these agreements. Subject to customary cure rights, any default would permit the holders of the indebtedness to accelerate repayment of this debt and could cause defaults under other indebtedness that we have, any of which could have a material adverse effect on the trading price of our common stock.

We may still incur substantially more debt or take other actions, which would intensify the risks discussed immediately above.

We and our subsidiaries may, subject to any limitations in the terms of our existing loan facilities or the Senior Secured Credit Facilities, incur additional debt, secure existing or future debt, recapitalize our debt or take a number of other actions that are not limited by the terms of our term loans that could have the effect of diminishing our ability to make payments under the indebtedness when due. If we incur any additional debt, the related risks that we and our subsidiaries face could intensify.

In addition to pending merger with Silicon Motion, we may, from time to time, make additional business acquisitions or investments, which involve significant risks.

We have completed multiple acquisitions in the past six years. We may also enter into alliances or make investments in other businesses to complement our existing product offerings, augment our market coverage or enhance our technological capabilities. Any such transactions could result in:

- · issuances of equity securities dilutive to our existing stockholders;
- · substantial cash payments;
- · the incurrence of substantial debt and assumption of unknown liabilities;
- · large one-time write-offs;
- · amortization expenses related to intangible assets;
- · a limitation on our ability to use our net operating loss carryforwards;
- the diversion of management's time and attention from operating our business to acquisition integration challenges;
- stockholder or other litigation relating to the transaction;
- adverse tax consequences;
- · costs and expenses associated with any undisclosed or potential liabilities; and
- · the potential loss of key employees, customers and suppliers of the acquired businesses.

To the extent we pay the purchase price of any acquisition or investment in cash or through borrowings under our Revolving Facility, it would reduce our cash balances and/or result in indebtedness we must service, which may have a material and adverse effect on our business and financial condition. If the purchase price is paid with our stock, it would be dilutive to our stockholders. In addition, we may assume liabilities associated with a business acquisition or investment, including unrecorded liabilities that are not discovered at the time of the transaction, and the repayment of those liabilities may have a material and adverse effect on our financial condition.

Integrating acquired organizations and their products and services, including the integration of completed acquisitions, may be expensive, time-consuming and a strain on our resources and our relationships with employees, customers, distributors and suppliers, and ultimately may not be successful. The benefits or synergies we may expect from the acquisition of complementary or supplementary businesses may not be realized to the extent or in the time frame we initially anticipate. Some of the risks that may affect our ability to successfully integrate acquired businesses include those associated with:

failure to successfully further develop the acquired products or technology;

- · conforming the acquired company's standards, policies, processes, procedures and controls with our operations;
- coordinating new product and process development, especially with respect to highly complex technologies;
- · loss of key employees or customers of the acquired business:
- · hiring additional management and other critical personnel;
- in the case of foreign acquisitions, the need to integrate operations across different cultures and languages and to address the particular economic, currency, political and regulatory risks associated with specific countries;
- · increasing the scope, geographic diversity and complexity of our operations;
- · consolidation of facilities, integration of the acquired businesses' accounting, human resource and other administrative functions and coordination of product, engineering and sales and marketing functions;
- · the geographic distance between the businesses:
- liability for activities of the acquired businesses before the acquisition, including patent and trademark infringement claims, violations of laws, commercial disputes, tax liabilities and other known and unknown liabilities; and
- · litigation or other claims in connection with the acquired businesses, including claims for terminated employees, customers, former stockholders or other third parties.

We may not be able to identify suitable acquisition or investment candidates, or even if we do identify suitable candidates, they may be difficult to finance, expensive to fund and there is no guarantee that we can obtain any necessary regulatory approvals or complete such transactions on terms that are favorable to us.

We have in the past been and may in the future be party to ligation related to acquisitions. Any adverse determination in litigation resulting from acquisitions could have a material adverse effect on our business and operating results.

### Risks Relating to Intellectual Property

We have settled in the past intellectual property litigation and may face additional claims of intellectual property infringement. Any future litigation could be time-consuming, costly to defend or settle and result in the loss of significant rights.

The semiconductor industry is characterized by companies that hold large numbers of patents and other intellectual property rights and that vigorously pursue, protect and enforce intellectual property rights. Third parties have in the past and may in the future assert against us and our customers and distributors their patent and other intellectual property rights to technologies that are important to our business. In particular, from time to time, we receive correspondence from competitors and other third parties seeking to engage us in discussions concerning potential claims against us, and we receive correspondence from customers seeking indemnification for potential claims related to infringement claims asserted against down-stream users of our products. We investigate these requests and claims as received and could be required to enter license agreements with respect to third party intellectual property rights or indemnify third parties, either of which could have an adverse effect on our future operating results.

Claims that our products, processes or technology infringe third-party intellectual property rights, regardless of their merit or resolution are costly to defend or settle and could divert the efforts and attention of our management and technical personnel. In addition, many of our customer and distributor agreements require us to indemnify and defend our customers or distributors from third-party infringement claims and pay damages and attorneys' fees in the case of adverse rulings. Claims of this sort also could harm our relationships with our customers or distributors and might deter future customers from doing business with us. In order to maintain our relationships with existing customers and secure business from new customers, we have been required from time to time to provide additional assurances beyond our standard terms. If any future proceedings result in an adverse outcome, we could be required to:

- · cease the manufacture, use or sale of the infringing products, processes or technology;
- · pay substantial damages, indemnification expenses and attorneys' fees;
- · expend significant resources to develop non-infringing products, processes or technology;

- · license technology from the third-party claiming infringement, which license may not be available on commercially reasonable terms, or at all;
- · cross-license our technology to a competitor to resolve an infringement claim, which could weaken our ability to compete with that competitor; or
- pay substantial damages to our customers or end users to discontinue their use of or to replace infringing technology sold to them with non-infringing technology.

Any of the foregoing results could have a material adverse effect on our business, financial condition, and results of operations.

We utilize a significant amount of intellectual property in our business. If we are unable to protect our intellectual property, our business could be adversely affected.

Our success depends in part upon our ability to protect our intellectual property. To accomplish this, we rely on a combination of intellectual property rights, including patents, copyrights, trademarks and trade secrets in the United States and in selected foreign countries where we believe filing for such protection is appropriate. Effective patent, copyright, trademark and trade secret protection may be unavailable, limited or not applied for in some countries. Some of our products and technologies are not covered by any patent or patent application. We cannot guarantee that:

- · any of our present or future patents or patent claims will not lapse or be invalidated, circumvented, challenged or abandoned;
- · our intellectual property rights will provide competitive advantages to us;
- · our ability to assert our intellectual property rights against potential competitors or to settle current or future disputes will not be limited by our agreements with third parties;
- any of our pending or future patent applications will be issued or have the coverage originally sought;
- · our intellectual property rights will be enforced in jurisdictions where competition may be intense or where legal protection may be weak;
- · any of the trademarks, copyrights, trade secrets or other intellectual property rights that we presently employ in our business will not lapse or be invalidated, circumvented, challenged or abandoned; or
- · we will not lose the ability to assert our intellectual property rights against or to license our technology to others and collect royalties or other payments.

In addition, our competitors or others may design around our protected patents or technologies. Effective intellectual property protection may be unavailable or more limited in one or more relevant jurisdictions relative to those protections available in the United States, or may not be applied for in one or more relevant jurisdictions. If we pursue litigation to assert our intellectual property rights, an adverse decision in any of these legal actions could limit our ability to assert our intellectual property rights, limit the value of our technology or otherwise negatively impact our business, financial condition and results of operations.

Monitoring unauthorized use of our intellectual property is difficult and costly. Unauthorized use of our intellectual property may have occurred or may occur in the future. Although we have taken steps to minimize the risk of this occurring, any such failure to identify unauthorized use and otherwise adequately protect our intellectual property would adversely affect our business. Moreover, if we are required to commence litigation, whether as a plaintiff or defendant as has occurred in the past, not only will this be time-consuming, but we will also be forced to incur significant costs and divert our attention and efforts of our employees, which could, in turn, result in lower revenue and higher expenses.

We also rely on customary contractual protections with our customers, suppliers, distributors, employees and consultants, and we implement security measures to protect our trade secrets. We cannot assure you that these contractual protections and security measures will not be breached, that we will have adequate remedies for any such breach or that our suppliers, employees or consultants will not assert rights to intellectual property arising out of such contracts.

In addition, we have a number of third-party patent and intellectual property license agreements. Some of these license agreements require us to make one-time payments or ongoing royalty payments. Also, a few of our license agreements contain most-favored nation clauses or other price restriction clauses which may affect the amount we may charge for our products, processes or technology. We cannot guarantee that the third-party patents and technology we license will not be licensed to our competitors or others in the semiconductor industry. In the future, we may need to obtain additional licenses, renew existing license agreements or otherwise replace existing technology. We are unable to predict whether these license agreements can be obtained or renewed or the technology can be replaced on acceptable terms, or at all.

When we settled a trademark dispute with Linear Technology Corporation, we agreed not to register the "MAXLINEAR" mark or any other marks containing the term "LINEAR". We may continue to use "MAXLINEAR" as a corporate identifier, including to advertise our products and services, but may not use that mark on our products. The agreement does not affect our ability to use our registered trademark "MaxL", which we use on our products. Due to our agreement not to register the "MAXLINEAR" mark, our ability to effectively prevent third parties from using the "MAXLINEAR" mark in connection with similar products or technology may be affected. If we are unable to protect our trademarks, we may experience difficulties in achieving and maintaining brand recognition and customer loyalty.

We have been and may in the future be subject to information technology failures, including data protection breaches and cyber-attacks, that could disrupt our operations, damage our reputation and adversely affect our business, operations, and financial results.

We rely on our information technology systems for the effective operation of our business and for the secure maintenance and storage of confidential data relating to our business and third-party businesses. In June 2020, we announced a security incident resulting from a Maze ransomware attack affecting certain but not all operational systems within our information technology infrastructure. Because we did not satisfy the attacker's monetary demands, on June 15, 2020, the attacker released online certain proprietary information obtained from our network. Although our internal information technology team, supplemented by a leading cyber defense firm, has been actively taking steps to contain and assess this incident, including implementing enhanced security controls, and develop and deploy viruses, worms and other malicious software programs that compromise our confidential information or that of third parties and cause another disruption or failure of our information technology systems. In addition, we have in the past and may in the future be subject to "phishing" attacks in which third parties send emails purporting to be from reputable companies in order to obtain personal information and infiltrate our systems to initiate wire transfers or otherwise obtain proprietary or confidential information. A number of large, public companies have recently experienced losses based on phishing attacks and other cyber-attacks. Any future security incident or compromise of our information technology systems could result in unauthorized publication of our confidential business or proprietary information, result in the unauthorized release of customer, supplier or employee data, result in violations of privacy or other laws, expose us to a risk of litigation, cause us to incur direct losses if attackers access our bank or investment accounts, or damage our reputation. The cost and operational consequences of implementing further data protection measures either as a response to specific breaches or as a result of evolving ri

Third parties with which we conduct business, such as foundries, assembly and test contractors, and distributors, have access to certain portions of our sensitive data. In the event that these third parties do not properly safeguard our data that they hold, security breaches could result and negatively impact our business, operations and financial results.

The use of open source software in our products, processes and technology may expose us to additional risks and harm our intellectual property.

Our products, processes and technology sometimes utilize and incorporate software that is subject to an open source license. Open source software is typically freely accessible, usable and modifiable. Certain open source software licenses require a user who intends to distribute the open source software as a component of the user's software to disclose publicly part or all of the source code to the user's software. In addition, certain open source software licenses require the user of such software to make any derivative works of the open source code available to others on unfavorable terms or at no cost. This can subject previously proprietary software to open source license terms.

While we monitor the use of all open source software in our products, processes and technology and try to ensure that no open source software is used in such a way as to require us to disclose the source code to the related product, processes or

technology when we do not wish to do so, such use could inadvertently occur. Additionally, if a third party software provider has incorporated certain types of open source software into software we license from such third party for our products, processes or technology, we could, under certain circumstances, be required to disclose the source code to our products, processes or technology. This could harm our intellectual property position and have a material adverse effect on our business, results of operations and financial condition.

#### Risks Relating to Reliance on Third-Partie

We do not have our own manufacturing facilities and rely on a limited number of third parties to manufacture, assemble, and test our products. The failure to manage our relationships with our third-party contractors successfully, or impacts from global supply shortages, natural disasters, public health crises, or other labor stoppages in the regions where such contractors operate, could adversely affect our ability to market and sell our products.

We operate an outsourced manufacturing business model that utilizes third-party foundry and assembly and test capabilities. As a result, we rely on third-party foundry wafer fabrication, including sole sourcing for many components or products. Currently, the majority of our products are manufactured by Global Foundries, Semiconductor Manufacturing International Corporation, or SMIC, Taiwan Semiconductor Manufacturing Corp, or TSMC, and United Microelectronics Corporation, or UMC, at foundries located in Taiwan, Singapore, and China. We also rely on Intel Corporation, or Intel, for certain products on a turnkey basis under a supply agreement with an initial term of five years. Foundries and other third-parties we rely upon are currently experiencing bottlenecks caused by a sudden increase in demand for electronics containing semiconductor chips and stockpiling of chips by certain firms in China blacklisted by the U.S., resulting in a global semiconductor supply shortage impacting our industry. We also use third-party contractors for all of our assembly and test operations.

Relying on third party manufacturing, assembly and testing presents significant risks to us, including the following:

- · capacity shortages during periods of high demand or from events beyond our control, including from the current global semiconductor supply shortage;
- · failure by us, our customers, or their end customers to qualify a selected supplier;
- · reduced control over delivery schedules and quality;
- · shortages of materials;
- · misappropriation of our intellectual property;
- · limited warranties on wafers or products supplied to us; and
- · potential increases in prices.

The ability and willingness of our third-party contractors to perform is largely outside our control. If one or more of our contract manufacturers or other outsourcers fails to perform its obligations in a timely manner or at satisfactory quality levels, our ability to bring products to market and our reputation could suffer. For example, in the event that manufacturing capacity is reduced or eliminated at one or more facilities, manufacturing could be disrupted, we could have difficulties fulfilling our customer orders, our net revenue could decline and our business, financial condition and results of operations would be adversely affected.

Additionally, our product shipment and manufacturing capacity may be similarly reduced or eliminated at one or more facilities due to the fact that the majority of our fabrication and assembly and test contractors are all located in the Pacific Rim region, principally in China, Taiwan, and Singapore. The risk of earthquakes in these geographies is significant due to the proximity of major earthquake fault lines, and Taiwan in particular is also subject to typhoons and other Pacific storms, and more recently, a drought impacting the water supply which chip manufacturers rely upon to fabricate chip products. Earthquakes, fire, flooding, drought, or other natural disasters in Taiwan or the Pacific Rim region, or political unrest, war, labor strikes, work stoppages or public health crises, such as the outbreak of COVID-19, in countries where our contractors' facilities are located could result in the disruption of our product shipments from China were temporarily delayed earlier in the first quarter of 2020. Although we continue to monitor the situation, it is currently unknown whether any resurgence of the outbreak will occur and disrupt our product shipments or impact

manufacturing in the region over future periods. If such disruption were to recur over a prolonged period, it could have a material impact on our revenues and our business. Any disruption resulting from similar events on a larger scale or over a prolonged period could cause significant delays in shipments of our products until we are able to resume such shipments, or shift our manufacturing, assembly, or test from the affected contractor to another third-party vendor, if needed. There can be no assurance that alternative capacity could be obtained on favorable terms, if at all.

We are subject to risks associated with our distributors' product inventories and product sell-through. Should any of our distributors cease or be forced to stop distributing our products, our business would suffer.

We currently sell a large portion of our products to customers through our distributors, who maintain their own inventories of our products. Sales to distributors accounted for approximately 46% and 45% of our net revenue in the six months ended June 30, 2022 and 2021, respectively. Upon shipment of product to these distributors, title to the inventory transfers to the distributor and the distributor is invoiced, generally with 30 to 60 day terms. Distributor sales are also recognized upon shipment to the distributor and estimates of future pricing credits and/or stock rotation rights reduce revenue recognized to the net amount before the actual amounts are known. If our estimates of such credits and rights are materially understated it could cause subsequent adjustments that negatively impact our revenues and gross profits in a future period.

If our distributors are unable to sell an adequate amount of their inventories of our products in a given quarter to manufacturers and end users or if they decide to decrease their inventories of our products for any reason, our sales through these distributors and our revenue may decline. In addition, if some distributors decide to purchase more of our products than are required to satisfy end customer demand in any particular quarter, inventories at these distributors would grow in that quarter. These distributors could then reduce future orders until inventory levels realign with end customer demand, which could adversely affect our product revenue.

Our reserve estimates with respect to the products stocked by our distributors are based principally on reports provided to us by our distributors, typically on a weekly basis. To the extent that this resale and channel inventory data is inaccurate or not received in a timely manner, we may not be able to make reserve estimates accurately or at all.

We do not have any long-term supply contracts with our contract manufacturers or suppliers, and any disruption in our supply of products or materials could have a material adverse effect on our business, revenue and operating results.

While certain products are supplied to us by Intel on a turnkey basis under the terms of a supply agreement with an initial term of five years, currently we do not have long-term supply contracts with any other third-party vendors, including but, not limited to Global Foundries, SMIC, TSMC, and UMC. We make substantially all of our purchases on a purchase order basis, and our contract manufacturers are not required to supply us products for any specific period or in any specific quantity. Foundry capacity may not be available when we need it or at reasonable prices. Availability of foundry capacity has in the past been reduced from time to time due to strong demand. Foundries can allocate capacity to the production of other companies' products and reduce deliveries to us on short notice. It is possible that foundry customers that are larger and better financed than we are, or that have long-term agreements with our foundry, may induce our foundry to reallocate capacity to them. This reallocation could impair our ability to secure the supply of components that we need. We generally place orders for products with some of our suppliers approximately four to five months prior to the anticipated delivery date, with order volumes based on our forecasts of demand from our customers. Accordingly, if we inaccurately forecast demand for our products, we may be unable to obtain adequate and cost-effective foundry or assembly capacity from our third-party contractors to meet our customers' delivery requirements, or we may accumulate excess inventories. On occasion, we have been unable to adequately respond to unexpected increases in customer purchase orders and therefore were unable to benefit from this incremental demand. None of our third-party contractors has provided any assurance to us that adequate capacity will be available to us within the time required to meet additional demand for our products.

We rely on third parties to provide services and technology necessary for the operation of our business. Any failure of one or more of our partners, vendors, suppliers or licensors to provide these services or technology could have a material adverse effect on our business.

We rely on third-party vendors to provide critical services, including, among other things, services related to accounting, billing, human resources, information technology, network development, network monitoring, in-licensing and intellectual property that we cannot or do not create or provide ourselves. We depend on these vendors to ensure that our corporate infrastructure will consistently meet our business requirements. The ability of these third-party vendors to successfully provide reliable and high quality services is subject to technical and operational uncertainties that are beyond our control. While we may be entitled to damages if our vendors fail to perform under their agreements with us, our agreements with these vendors limit

the amount of damages we may receive. In addition, we do not know whether we will be able to collect on any award of damages or that these damages would be sufficient to cover the actual costs we would incur as a result of any vendor's failure to perform under its agreement with us. Any failure of our corporate infrastructure could have a material adverse effect on our business, financial condition and results of operations. Upon expiration or termination of any of our agreements with third-party vendors, we may not be able to replace the services provided to us in a timely manner or on terms and conditions, including service levels and cost, that are favorable to us and a transition from one vendor to another vendor could subject us to operational delays and inefficiencies until the transition is complete.

Additionally, we incorporate third-party technology into and with some of our products, and we may do so in future products. The operation of our products could be impaired if errors occur in the third-party technology we use. It may be more difficult for us to correct any errors in a timely manner if at all because the development and maintenance of the technology is not within our control. There can be no assurance that these third parties will continue to make their technology, or improvements to the technology, available to us, or that they will continue to support and maintain their technology. Further, due to the limited number of vendors of some types of technology, it may be difficult to obtain new licenses or replace existing technology. Any impairment of the technology or relationship with these third parties could have a material adverse effect on our business.

#### Risks Relating to Our Common Stock

Our management team may use our available cash and cash equivalents in ways with which you may not agree or in ways which may not yield a return

We use our cash and cash equivalents for general corporate purposes, including working capital and for repayment of outstanding long-term debt. We may also, in the future, use a portion of our assets to acquire other complementary businesses, products, services or technologies. Our management has considerable discretion in the application of our cash and cash equivalents, and resources, and you will not have the opportunity to assess whether these liquid assets are being used in a manner that you deem best to maximize your return. We may use our available cash and cash equivalents and resources for corporate purposes that do not increase our operating results or market value. In addition, in the future our cash and cash equivalents, and resources may be placed in investments that do not produce significant income or that may lose value.

Anti-takeover provisions in our charter documents and under Delaware law could make an acquisition of us more difficult, limit attempts by our stockholders to replace or remove our current management and limit the market rice of our common stock.

Provisions in our certificate of incorporation and bylaws, as amended and restated, may have the effect of delaying or preventing a change of control or changes in our management. These provisions provide for the following:

- · authorize our Board of Directors to issue, without further action by the stockholders, up to 25,000,000 shares of undesignated preferred stock;
- · require that any action to be taken by our stockholders be effected at a duly called annual or special meeting and not by written consent;
- · specify that special meetings of our stockholders can be called only by our Board of Directors, our Chairman of the Board of Directors, or our President;
- establish an advance notice procedure for stockholder approvals to be brought before an annual meeting of our stockholders, including proposed nominations of persons for election to our Board of Directors;
- · establish that our Board of Directors is divided into three classes, Class I, Class II and Class III, with each class serving staggered terms;
- · provide that our directors may be removed only for cause;
- · provide that vacancies on our Board of Directors may be filled only by a majority of directors then in office, even though less than a quorum;
- specify that no stockholder is permitted to cumulate votes at any election of directors; and

· require supermajority votes of the holders of our common stock to amend specified provisions of our charter documents.

These provisions may frustrate or prevent any attempts by our stockholders to replace or remove our current management by making it more difficult for stockholders to replace members of our Board of Directors, which is responsible for appointing the members of our management. In addition, because we are incorporated in Delaware, we are governed by the provisions of Section 203 of the Delaware General Corporation Law, which generally restricts a Delaware corporation from engaging in any of a broad range of business combinations with any "interested" stockholder for a period of three years following the date on which the stockholder became an "interested" stockholder.

Our share price may be volatile as a result of various factors.

The trading price of our common stock is highly volatile and could be subject to wide fluctuations in response to various factors, some of which are beyond our control. For example, in the first six months of 2022, the trading price of our common stock ranged from a low of \$30.47 to a high of \$77.89. These factors include those discussed in this "Risk Factors" section of the Quarterly Report on Form 10-Q and others such as:

- · actual or anticipated fluctuations in our financial condition and operating results;
- · overall conditions in the semiconductor market;
- · addition or loss of significant customers;
- · changes in laws or regulations applicable to our products;
- · actual or anticipated changes in our growth rate relative to our competitors;
- · announcements of technological innovations by us or our competitors;
- · announcements by us or our competitors of significant acquisitions, strategic partnerships, joint ventures, or capital commitments;
- · additions or departures of key personnel;
- · competition from existing products or new products that may emerge;
- · issuance of new or updated research or reports by securities analysts;
- · fluctuations in the valuation of companies perceived by investors to be comparable to us;
- · disputes or other developments related to proprietary rights, including patents, litigation matters, and our ability to obtain intellectual property protection for our technologies;
- · acquisitions may not be accretive and may cause dilution to our earnings per share;
- announcement or expectation of additional financing efforts;
- · sales of our common stock by us or our stockholders; and
- · general economic and market conditions, including the impacts from sanctions against Russia and the military conflict in Ukraine, increased inflationary pressures and the global COVID-19 pandemic.

Furthermore, the stock markets have experienced extreme price and volume fluctuations that have affected the market prices of equity securities of many companies. These fluctuations often have been unrelated or disproportionate to the operating performance of those companies. These broad market and industry fluctuations, as well as general economic, political, and market conditions such as recessions, interest rate changes or international currency fluctuations, may negatively impact the market price of our common stock. In the past, companies that have experienced volatility in the market price of their stock have been subject to securities class action litigation. We have been and may continue to be the target of this type of litigation in the future. Securities litigation against us could result in substantial costs and divert our management's attention from other business concerns, which could seriously harm our business.

If securities or industry analysts do not publish research or reports about our business, or publish negative reports about our business, our share price and trading volume could decline.

The trading market for our common stock depends in part on the research and reports that securities or industry analysts publish about us or our business. We do not have any control over these analysts. If one or more of the analysts who cover us downgrade our shares or change their opinion of our shares, our share price would likely decline. If one or more of these analysts cease coverage of our Company or fail to regularly publish reports on us, we could lose visibility in the financial markets, which could cause our share price or trading volume to decline.

Future sales of our common stock in the public market could cause our share price to decline.

Sales of a substantial number of shares of our common stock in the public market, or the perception that these sales might occur, could depress the market price of our common stock and could impair our ability to raise capital through the sale of additional equity securities. As of June 30, 2022, we had approximately 78.3 million shares of common stock outstanding.

All shares of common stock are freely tradable without restrictions or further registration under the Securities Act of 1933, as amended, or the Securities Act, unless held by our "affiliates," as that term is defined under Rule 144 of the Securities Act

Our Executive Incentive Bonus Plan permits the settlement of awards under the plan in the form of shares of our common stock. We have issued shares of our common stock to settle such bonus awards for our employees, including executives, for the 2014 to 2021 performance periods, and we intend to continue this practice in the foreseeable future. We issued 0.5 million shares of our common stock for the 2021 performance period in February 2022. If we issue additional shares of our common stock to settle bonus awards in the future, such shares may be freely sold in the public market immediately following the issuance of such shares, subject to the applicable conditions of Rule 144 and our insider trading policy, and the issuance of such shares may have an adverse effect on our share price once they are issued.

We do not intend to pay dividends for the foreseeable future.

We have never declared or paid any cash dividends on our common stock and do not intend to pay any cash dividends in the foreseeable future. We anticipate that we will retain all of our future earnings for use in the development of our business and for general corporate purposes. Any determination to pay dividends in the future will be at the discretion of our Board of Directors. Accordingly, investors must rely on sales of their common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investments.

#### General Risk Factors

Global economic conditions, including factors such as high inflation that adversely affect consumer spending for the products that incorporate our integrated circuits, could adversely affect our revenues, margins, and operating results.

Our products are incorporated in numerous consumer devices, and demand for such products will ultimately be driven by consumer demand for products such as televisions, personal computers, automobiles, cable modems, and set-top boxes. Many of these purchases are discretionary. Global economic volatility and economic volatility in the specific markets in which the devices that incorporate our products are ultimately sold, including the impacts of current high rates of inflation, can cause extreme difficulties for our customers and third-party vendors in accurately forecasting and planning future business activities. This unpredictability could cause our customers to reduce spending on our products, which would delay and lengthen sales cycles. Furthermore, during challenging economic times our customers may face challenges in gaining timely access to sufficient credit, which could impact their ability to make timely payments to us. These events, together with economic volatility that may face the broader economy and, in particular, the semiconductor and communications industries, may adversely affect, our business, particularly to the extent that consumers decrease their discretionary spending for devices deploying our products.

Changes in trade policies among the United States and other countries, in particular the imposition of new or higher tariffs, could place pressure on our average selling prices as our customers seek to offset the impact of increased tariffs on their own products. Increased tariffs or the imposition of other barriers to international trade could have a material adverse effect on our revenues and operating results.

The United States has imposed or proposed new or higher tariffs on certain products exported by a number of U.S. trading partners, including China, Europe, Canada, and Mexico. In response, many of those trading partners, including China,

have imposed or proposed new or higher tariffs on American products. Continuing changes in government trade policies create a heightened risk of further increased tariffs that impose barriers to international trade. Our business and operating results are substantially dependent on international trade. Many of our manufacturers sell products incorporating our integrated circuits into international markets.

Tariffs on our customers' products may adversely affect our gross profit margins in the future due to the potential for increased pressure on our selling prices by customers seeking to offset the impact of tariffs on their own products. In addition, tariffs could make our OEM and ODM customers' products less attractive relative to products offered by their competitors, which may not be subject to similar tariffs. Some OEM and ODMs in our industry have already implemented short-term price adjustments to offset such tariffs and transitioned their production and supply chain to locations outside of China. We believe that increases in tariffs on imported goods or the failure to resolve current international trade disputes could have a material adverse effect on our business and operating results.

If we suffer losses to our facilities or distribution system due to catastrophe, our operations could be seriously harmed.

Our facilities and distribution system, and those of our third-party contractors, are subject to risk of catastrophic loss due to fire, flood, drought or other natural or man-made disasters. A number of our facilities and those of our contract manufacturers are located in areas with above average seismic activity. The risk of an earthquake in the Pacific Rim region or Southern California is significant due to the proximity of major earthquake fault lines. Any catastrophic loss to any of these facilities would likely disrupt our operations, delay production, shipments and revenue and result in significant expenses to repair or replace the facility. The majority of the factories we use for foundry, assembly and test, and warehousing services, are located in Asia, principally in China, Taiwan, and Singapore. Our corporate headquarters is located in Southern California. Our operations and financial condition could be seriously harmed in the event of a major earthquake, fire, or other natural or man-made disaster.

We have recorded goodwill and other intangible assets in connection with business acquisitions. Goodwill and other acquired intangible assets could become impaired and adversely affect our future operating results.

We account for business acquisitions as business combinations under the acquisition method of accounting, the total purchase price is allocated to net tangible assets and identifiable intangible assets of acquired businesses based on their fair values as of the date of completion of the acquisition. The excess of the purchase price over those fair values is recorded as goodwill. Our acquisitions have resulted in the creation of goodwill and recording of a large amount of intangible assets based upon the application of the acquisition method of accounting. To the extent the value of goodwill or other intangible assets become impaired, we may be required to incur material charges relating to such impairment. We conduct our annual goodwill and indefinite-lived intangible asset impairment analysis on October 31 each year, or more frequently if we believe indicators of impairment exist. Our reported financial condition and results of operations reflect the balances and results of the acquired businesses but are not restated retroactively to reflect the historical financial position or results of operations of acquired businesses for periods prior to the acquisitions. As a result, comparisons of future results against prior period results will be more difficult for investors. In addition, there can be no guarantee that acquired intangible assets, particularly in-process research and development, will generate revenues or profits that we include in our forecast that is the basis for their fair values as of the acquisition date. Any such impairment charges relating to goodwill or other intangible assets could have a material impact on our operating results in future periods, and the announcement of a material impairment could have an adverse effect on the trading volume of our common stock. As of June 30, 2022, our balance sheet reflected goodwill of \$306.7 million and other intangible assets of \$127.9 million. Consequently, we could recognize material impairment that the future.

Unanticipated changes in our tax rates or unanticipated tax obligations could affect our future results.

We are subject to income taxes in the United States, Singapore and various other foreign jurisdictions. The amount of income taxes we pay is subject to our interpretation and application of tax laws in jurisdictions in which we file. Changes in current or future laws or regulations, the imposition of new or changed tax laws or regulations or new interpretations by taxing authorities or courts could affect our results of operations and lead to volatility with respect to tax expenses and liabilities from period to period. The application of tax laws and related regulations is subject to legal and factual interpretation, judgment and uncertainty. We cannot determine whether any legislative proposals may be enacted into law or what, if any, changes may be made to such proposals prior to their being enacted into law. If U.S. or international tax laws change in a manner that increases our tax obligation, it could result in a material adverse impact on our results of operations and our financial position.

We are subject to examinations and tax audits. There can be no assurance that the outcome from these audits will not have an adverse effect on our operating results or financial position.

Excess tax benefits associated with employee stock-based compensation are included in income tax expense. However, since the amount of such excess tax benefits and deficiencies depend on the fair market value of our common stock, our income tax provision is subject to volatility in our stock price and in the future, could unfavorably affect our future effective tax rate.

Our future effective tax rate could be unfavorably affected by unanticipated changes in the valuation of our deferred tax assets and liabilities, and the ultimate use and depletion of these various tax credits and net operating loss carryforwards. Changes in our effective tax rate could have a material adverse impact on our results of operations. We record a valuation allowance to reduce our net deferred tax assets to the amount that we believe is more likely than not to be realized. In making such determination, we consider all available positive and negative evidence quarterly, including scheduled reversals of deferred tax liabilities, projected future taxable income, tax planning strategies, and recent financial performance. To the extent we believe it is more likely than not that some portion of our deferred tax assets will not be realized, we record a valuation allowance against the deferred tax asset. Realization of our deferred tax assets is dependent primarily upon future taxable income in the applicable jurisdiction. On a periodic basis we evaluate our deferred tax assets for realizability. Based upon our review of all positive and negative evidence, as of June 30, 2022, we continue to have a valuation allowance on state deferred tax assets, certain federal deferred tax assets in jurisdictions where we have cumulative losses or otherwise are not expected to utilize certain tax attributes. The impact of releasing some or all of such valuation allowance in a future period could be material in the period in which such release occurs.

Our corporate income tax liability could materially increase if tax incentives we have negotiated in Singapore cease to be effective or applicable or if we are challenged on our use of such incentives.

We operate under certain favorable tax incentives in Singapore which are effective through March 2027, and generally are dependent on our meeting certain headcount and investment thresholds. Such incentives allow certain qualifying income earned in Singapore to be taxed at reduced rates and are conditional upon our meeting certain employment and investment thresholds over time. If we fail to satisfy the conditions for receipt of these tax incentives, or to the extent U.S. or other tax authorities challenge our operation under these favorable tax incentive programs or our intercompany transfer pricing agreements, our taxable income could be taxed at higher federal or foreign statutory rates and our income tax liability and expense could materially increase beyond our projections. Each of our Singapore tax incentives is separate and distinct from the others, and may be granted, withheld, extended, modified, truncated, complied with or terminated independently without any effect on the other incentives. Absent these tax incentives, our corporate income tax rate in Singapore would generally be the 17% statutory tax rate. We are also subject to operating and other compliance requirements to maintain our favorable tax incentives. If we fail to comply with such requirements, we could lose the tax benefits and could possibly be required to refund previously realized material tax benefits, additionally, in the future, we may fail to qualify for renewal of our favorable tax incentives or such incentives may not be available to us, which could also cause our future taxable income to increase and be taxed at higher statutory rates. Loss of one more of our tax incentives could cause us to modify our tax strategies and our operational structure, which could cause disruption in our business and have a material adverse impact on our results of operations. Further, there can be no guarantee that such modification in our tax strategies and our operational structure, which could cause disruption in our business and have a materia

We have assumed certain unfunded defined benefit retirement plan obligations in an acquisition. Such obligations may require a significant amount of cash to fund in the future, and changes in assumptions underlying the obligation and return on plan assets may adversely affect our earnings, equity and contributions in future.

We assumed an obligation associated with certain defined benefit retirement plans, including a pension plan, which cover certain employees of an acquired business and generally provide benefits based on negotiated amounts for each year of service. These plans were underfunded by \$4.3 million as of June 30, 2022 based on current projections and plan assets. We had previously never managed defined benefit plans in our operating history. We are required to make contributions to the pension plan. Additionally, with respect to certain other defined benefit plans, if the unfunded status reaches certain levels, we could be required to make contributions to cover the shortfall. Our obligation to make contributions may be impacted by a number of factors, many of which are beyond our control, including but not limited to, performance of plan assets and legislative changes. The net benefit obligation and cost are materially affected by the discount rate used to measure pension obligations, level of plan assets available to fund such obligations and long-term rate of return on plan assets. While such plans

## Table of Contents

have not had a material impact on our results of operations, future changes in the discount rate used to measure the defined benefit obligation could result in a significant increase or decrease in the valuation of such obligations, affecting the reported funded status of our defined benefit plans as well as the net periodic pension cost in the following years. Similarly, changes in the expected return on plan assets, which may be significantly impacted by changes in investment performance or a change in portfolio mix, can result in significant changes in the net periodic pension cost in the subsequent years.

Investor confidence may be adversely impacted if we are unable to comply with Section 404 of the Sarbanes-Oxley Act of 2002, and as a result, our stock price could decline.

We are subject to rules adopted by the Securities Exchange Commission, or SEC, pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, or Sarbanes-Oxley Act, which require us to include in our Annual Report on Form 10-K our management's report on, and assessment of the effectiveness of, our internal controls over financial reporting.

If we fail to maintain the adequacy of our internal controls, there is a risk that we will not comply with all of the requirements imposed by Section 404. Moreover, effective internal controls, particularly those related to revenue recognition, are necessary for us to produce reliable financial reports and are important to helping prevent financial fraud. Any of these possible outcomes could result in an adverse reaction in the financial marketplace due to a loss of investor confidence in the reliability of our consolidated financial statements and could result in investigations or sanctions by the SEC, the Nasdaq Stock Market LLC, or Nasdaq, or other regulatory authorities or in stockholder litigation. Any of these factors ultimately could harm our business and could negatively impact the market price of our securities. Ineffective control over financial reporting could also cause investors to lose confidence in our reported financial information, which could adversely affect the trading price of our common stock.

Our disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives. However, our management, including our principal executive officer and principal financial officer, does not expect that our disclosure controls and procedures will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system may be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected.

April 26, 2022

Michelle M. Sayer 16 Teardrop, Irvine, CA 92603 msayer@gmail.com

Subject: Offer of Employment - Amended

Dear Michelle,

I would like to offer you our heartfelt congratulations on your selection as a final candidate for a position at MaxLinear. You have met the exacting meritocracy standards of personal and professional achievement to which we hold all our employees. We are truly excited to extend you an offer of employment at MaxLinear as specified below. Your acceptance of our offer will represent an important milestone in our rapid growth as a fabless, Communications IC company.

First and foremost, we immensely value your superior qualities of proven technical competence, and passion for excellence. Your personal attributes are congruent with our cherished EPIC values – "Excellence, People, Integrity, and Compassion". Together, with your able partnership, we aim to build a world class IC Company.

In our workplace, we foster an environment of risk-taking & reward, along with a relentless focus on customer-driven products. By being true to this principle, we are determined to create a company with a business model and an organization that will set altogether new and lofty standards in work culture. In addition, MaxLinear will constantly endeavor to uphold its commitment to making "Every working day a lot of fun". We thank you for your interest in MaxLinear and look forward to unparalleled success together as partners in the same adventure.

## **Employment Offer**

We are very pleased to offer you a full-time position with MaxLinear, Inc. (the "Company") as General Counsel, based in our Irvine office, reporting to Steve Litchfield, Chief Financial Officer & Chief Corporate Strategy Officer. We are offering you an annual salary of \$350,000, a sign-on bonus of \$50,000 minus all applicable taxes. You will also be eligible for participation in the MaxLinear Employee Annual Discretionary Bonus with a target of 50% of annual salary (prorated based on your start date); actual bonus award may be more or less than the target percentage. In addition, we will recommend that our Board of Directors (or an authorized committee) award you an equity grant of restricted stock units (RSUs) with an approximate value equal to \$1,500,000, subject to the Board or committee's approval and the vesting described below.

The number of shares will be determined by dividing \$1,500,000 by the closing price of the Company's Common Stock in trading, on the applicable exchange, on your first date of employment. The number of shares may be rounded down to the nearest whole share. If for any reason your first date of employment is not a trading day, the number of shares will be determined based on the closing price on the trading day following your first date of employment. You acknowledge and agree that the number of shares will be fixed as set forth in this paragraph. This position is salary exempt and not eligible for overtime wages.

In the role of General Counsel, you will be eligible to receive the Change in Control Benefits offered to those designated for Section 16 Officers of the Company. This program is offered exclusively to this senior level management. This legal document will be issued to you post hire by the law firm of Wilson Soinsini Goodwich &

Rosati. The CiC is usually issued within 30 days of hire. Benefits offered under this program are effective on the date of hire. The Board of Directors on April 25, 2022, approved the role of General Counsel to be included as a Section 16 officer of the Company and will execute the Change in Control program for the Section 16 Officers. The template of this agreement outlining the terms and conditions is sent via DocuSign on April 26, 2022.

Additionally, in this key management position of General Counsel you will be covered by the Company's Director & Officer Liability Insurance Policy. This policy contains indemnification provisions that explain the coverage for actions you may lead or be involved in during working on behalf of MaxLinear and is effective on your hire date. Individual indemnity documents, assigned to Section 16 officers, are approved by the Board of Directors. The Board of Directors on April 25, 2022, approved the role of General Counsel to be eligible to receive the indemnification agreement associated with Section 16 officer status and shall execute an individual indemnification agreement (substantially in the form attached) and a change in control and severance agreement (substantially in the form attached), with effective dates as of your hire date.

Your sign-on bonus will be paid following the first full payroll cycle after completion of thirty (30) days of employment. Should you voluntarily terminate your employment with MaxLinear at any time prior to twenty-four (24) months of service, you will be liable for reimbursing the company the full amount of the sign-on bonus, less applicable taxes paid.

## Payroll and Benefits

If you decide to join us, you will receive payments of salary every two weeks, minus all applicable taxes, in accordance with the Company's normal payroll procedures and you will also be eligible to receive certain employee benefits, such as participation in our 401K plan and employer contribution towards health insurance premiums, etc. You will be eligible for benefits the first day of the month following your start date. Senior Manager level positions and above participate in the Company's Time Away From Work Program and do not receive an accrued Paid Time Off (PTO) benefit or floating holiday. As a manager in the organization, you are expected to manage your time in and out of the office based on business need and in coordination with your manager. New-hire employees are automatically enrolled in the company's 401K plan at 5% contribution, but you can opt out or adjust this amount at any time. More detailed information of our employee benefits is included in the email along with this offer letter. You should note that the Company may modify job titles, salaries, and benefits from time to time as it deems necessary.

## **Equity Incentive**

The Company will recommend that its Board of Directors (or an authorized committee) approve equity related compensation of RSUs as specified in the compensation proposal above. This equity related compensation will be subject to the terms and conditions of the 2010 Equity Incentive Plan and the form of agreement approved by the Board. Your equity incentive award will be subject to a vesting condition. The award will vest over four years based on your continuing to provide services to the Company. No right to any shares will be earned or accrued until such time as they have become fully vested. In addition, the grant of equity awards and subsequent vesting will not confer any additional right to continued vesting or employment or modify in any way the "at will" status of the employment relationship.

The Company generally structures RSU vesting to ensure that the vesting dates occur during an open trading window under the Company's Insider Trading Policy. However, the Company cannot provide any assurance that the trading window will be open when RSUs vest as the Company may close the trading window at any time if it determines appropriate. Your RSU grant will vest over four years in four annual increments on the anniversary of your initial grant. For example, if you receive a restricted stock unit award for a total of 100 shares in April 15, 2022, 25 of those shares will vest on May 20, 2023, and an additional 25 shares will vest each year thereafter on May 20 (with the last 25 shares vesting on May 20, 2026), subject to continued service with MaxLinear. If you resign your employment before the vesting date the unvested RSUs will be forefeited

## Other Employment Terms

The Company is excited about your joining and looks forward to a beneficial and productive relationship. Nevertheless, you should be aware that your employment with the Company is for no specified period and constitutes at-will employment. As a result, you are free to resign at any time, for any reason or for no reason. Similarly, the Company is free to conclude its employment relationship with you at any time, with or without cause, and with or without notice. We request that, in the event of resignation, you give the Company at least two weeks' notice.

For purposes of federal immigration law, you will be required to provide to the Company documentary evidence of your identity and eligibility for employment in the United States. Such documentation must be provided to us within three (3) business days of the effective date of your employment, or our employment relationship with you may be terminated

MaxLinear conducts post offer background checks on all candidates. These are done by a 3rd party vendor. All offers however, are contingent upon successfully completing the required background check which may include areas such as employment verification, degree verification, civil, criminal and DMV record search. Once begun, the background check will take approximately 5 business days to be completed (longer for overseas verifications). You will be emailed information on this background check process once you accept the offer of employment with the Company.

We also ask that, if you have not already done so, you disclose to the Company any agreements relating to your prior employment that may affect your eligibility to be employed by the Company or that may limit the manner in which you may be employed. It is our understanding that any such agreements will not prevent you from performing the duties of your position, and you represent that such is the case. Moreover, you agree that, during the term of your employment with the Company, you will not engage in any other employment, occupation, consulting or other business activity directly related to the business in which the Company is now involved or becomes involved during the term of your employment, nor will you engage in any other activities that conflict with your obligations to the Company. This obligation, however, does not preclude you from engaging in civic, charitable, including serving on a board of directors of a charity, or religious activities or, with the consent of the Company's Chief Executive Officer, from serving on the boards of directors of companies that are not competitors to the Company. Similarly, you agree not to bring any third-party confidential information to the Company, including that of any former employer, and that in performing your duties for the Company you will not in any way utilize any such information.

As a condition of your employment, you are also required to sign and comply with an At-Will Employment, Confidential Information, Invention Assignment and Arbitration Agreement which requires, among other provisions, the assignment of patent and other intellectual property rights to any invention made during your employment at the Company, nondisclosure of the Company's proprietary information, and arbitration of disputes between you and the Company. Please note that we must receive this signed agreement on or before your effective date.

This letter, along with any agreements relating to proprietary rights between you and the Company and any change in control and severance agreement and indemnification agreement, sets forth the terms of your employment with the Company and supersedes any prior representations or agreements including, but not limited to, any representations made during your recruitment, interviews, or pre-employment negotiations, whether written or oral. This letter may not be modified or amended except by a written agreement signed by the Chief Executive Officer of the Company and you. We look forward to working with you as a member of the MaxLinear team,

By: /s/ Steven G. Litchfield By: /s/ Kathi Guiney

Steven G. Litchfield

Chief Financial Officer and Chief Corporate Strategy Officer

Kathi Guiney

Vice President of Global Human Resources

# Offer Acceptance

## Certification of Principal Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

- I, Kishore Seendripu, Ph.D., certify that:
- 1. I have reviewed this Form 10-Q of MaxLinear, Inc.;
- Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
